| Sioux City and Pacific bonds, 1862-64 | 1,628,320 00 | 8,141 60 |
| Totals | $64,623,512 00 | $323,117 56 |

Interest paid by United States, $35,957,629 14; interest repaid by transportation of mails, &c., $8,671,625 24; balance of interest paid by United States, $27,286,003 90.

The foregoing is a correct statement of the public debt, as appears from the books and Treasurer's returns in the Department at the close of business, July 31, 1877.

JOHN SHERMAN,
Secretary of the Treasury.

### Connecticut Western Railroad.

We find in the Hartford Post a statement in regard to the affairs of this road, which has passed into the bondholders' hands. The receipts for the eight months ending May 31, 1877, were $144,272 77. The operating expenses for the same time were $91,162 62, being a profit of $53,110 18. This is reduced to $44,107 by insurance, taxes, rents and interest. The statement gives tables showing the balance sheet May 31, the state of the floating debt, &c., and closes as follows:

"From this showing the total indebtedness of the road, without reckoning the 'Collins notes' amounting to $24,000, which are secured by mortgages on real estate, and have not been considered a part of the floating debt, is $158,458 24. The average receipts of the road per month for the eight months were $18,034 10; expenses per month, $12,520 72; receipts over expenses, $5,513 35. The new Board of Directors have acted on this report of the affairs of the road, have accepted it and placed it on record. They are highly gratified at the showing which is made, indicating a better state in the condition of the company than was anticipated at the preferred stockholders' meeting in the spring. With the economy and retrenchment of the new management, it is reasonably believed that the financial condition of the road at the end of the year will be mainly satisfactory to the stockholders and friends of the road."

The Post quotes the bonds at 24@26 flat.

### Redemption of Five-twenty Bonds.

The Secretary of the Treasury on the 3d inst. issued the fifty-fourth call for the redemption of five-twenty bonds of 1865—known as five-twenty bonds of the act of March 3, 1865, (consols of 1865.) The call is for $10,000,000, of which $7,000,000 are coupons and $3,000,000 registered bonds. The principal and accrued interest will be paid at the Treasury of the United States in the city of Washington on and after the 3d of November, 1877, and interest will cease on that day. The bonds designated are as follows:

Coupon bonds—Dated July 1, 1865, namely: $50, No. 40,001 to No. 44,000, both inclusive; $100, No. 66,001 to No. 76,000, both inclusive; $500, No. 50,001 to No. 57,000, both inclusive; $1,000, No. 85,001 to No. 96,000, both inclusive.

Registered bonds—Redeemable at the pleasure of the United States, after the 1st day of July, 1870: $50, No. 1,401 to No. 1,600, both inclusive; $100, No. 11,901 to No. 13,100, both inclusive; $500, No. 7,751 to No. 8,300, both inclusive; $1,000, No. 25,101 to No. 27,400, both inclusive; $5,000, No. 7,301 to No. 7,650, both inclusive; $10,000, No. 11,751 to No. 13,550, both inclusive.

The amount outstanding included in the numbers above is $10,000,000. All United States bonds forwarded for redemption should be addressed to the "Loan Division, Secretary's Office," and all registered bonds should be assigned to "The Secretary of the Treasury for redemption." Where parties desire checks in payment for registered bonds drawn to order of any one but the payee, they should assign them to the Secretary of the Treasury for redemption on account of the owner or owners.

The called bonds now outstanding fall due in the following order: On the 21st of August $10,000,000; 28th August $10,000,000; 11th September $15,000,000; 5th October $10,000,000, 16th October $10,000,000, 19th October $10,000,000, 27th October $10,000,000 and 3d November $10,000,000—total, $85,000,000, of which $57,000,000 are coupon, and $28,000,000 registered.

☞ The London News states that though the production of iron in the north of England has been ten thousand tons in excess of the previous quarter, the rail trade shows a most extraordinary state of depression, being in the proportion of only one ninth of the manufacture of four years ago. This is traceable to the great decline in the export of rails, particularly to the United States.

☞ At a meeting of the International Cotton Convention recently held at Liverpool, Eng., Mr. W. B. Forwood, President of the United Cotton Association, stated that although 7,000,000 tons of shipping had paid dues last year the trade of the port (Liverpool) had not been good for some time. Cotton was king if cotton was cheap, and if it were cheap it would bring increased trade.

☞ Philadelphia has been designated as a port from which imported merchandise may be shipped in bond for transit through the United States to Canada, under such regulations as the Secretary of the Treasury may prescribe.

### Virginia State Debt.

A statement of the debt of Virginia up to 1st July last has been furnished from the auditor's office in Richmond to the State. The different items of the debt are as follows:

| | |
|---|---|
| Total debt assumed under the funding bill, exclusive of the sinking fund bonds held by the literary board | $29,412,126 38 |
| Of this there are bonds with coupons receivable for taxes, and capable of being converted into such bonds | 20,237,015 80 |
| Unfunded bonds and funded bonds with coupons not receivable for taxes known as "Peelers" | 9,175,110 58 |
| Arrears of interest on debt, including July 1, 1877 | 3,198,522 17 |
| Coupons due and outstanding | 1,146,429 00 |
| Bonds belonging to the literary fund (provision is made for the payment of interest on these bonds at maturity) | 1,428,245 25 |
| Interest paid on bonds held by schools and colleges | 62,087 78 |

The statement shows that the additional interest to be raised by taxation is in round numbers $540,000, and adds:

A saving has already been effected in legislative expenses of at least $100,000 per annum. Criminal expenses can be brought down another hundred thousand, and thus leave only $340,000 as the necessary added revenue. Yet we are to throw away the very springs of our prosperity and existence to save a sum which is less than ten cents on the hundred dollars on the taxable property of the State—one dollar for every man who has a thousand dollars of property.

☞ The Clarke (Va.) Courier states that Vice President Boyce, of the Shenandoah Valley railroad, represents that he has received a proposition from a New York party to complete that road, a portion of which has been graded, provided all the present claims against the company can be funded in income bonds. These claims are said to amount to about $560,000, the Central Improvement Company of Pennsylvania and Mr. Thomas A. Scott being among the principal creditors.

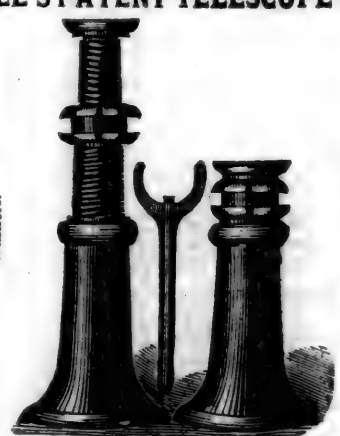
☞ The Connecticut Railroad Commissioners examined the Colchester Railroad on the 3d inst., and pronounced it to be "in a safe and suitable condition for public travel." The road has just been completed, is three and a half miles long, extending from Turnerville on the Air Line to Colchester, and cost $45,000. The first train over the line from Colchester to Willimantic was run on the 7th inst.

☞ The directors of the Southbridge and Brookfield (Mass.) Railroad Co. have determined to adhere to their plan of having the northern terminus of the road at East Brookfield, although the West Brookfield people raised their offer from $50,000 to $75,000. The East village is to contribute $40,000.

☞ The Rutland (Vt.) Globe says that the summer travel is increasing, still the trains are not so heavily laden as they might be. It is noticeable that the parlor cars are not so well patronized this season as in former years.

☞ The last, or 54th, call for 5 20s made $85,000 of the new 1865s called, leaving $117,000,000 of them yet to call. The last of the old 1865s ceased to bear interest on the 4th inst., the call for their redemption then maturing.

### Projected Railway in Germany.



A project for constructing a new line of railway, which will be of great importance in the event of future military operations on the western frontier of the empire, has been recently laid before the German federal council. The proposed railway is to join Metz and Saarlouis by a route some twenty-five kilometres shorter than the already existing line. Moreover, by thus directly joining the Saar railway with the Alsace-Lorraine system the new railway will give, by means of the Saar line and a line already in course of construction along the valley of the Fishbach, a second railway communication between Mayence and the Rhine fortresses generally and Metz, entirely independent of the Courcelles-Forbach-Neukirchen line.

☞ The contract has been let and work begun on the extension of the Central Branch Union Pacific Railroad to Concordia, Kansas, a distance of 47 miles. It is to be in running order by the 5th of December.

☞ J. D. Ellison, superintendent of the Little Miami Division of the Pittsburg, Cincinnati and St. Louis Railway, has been commissioned Lieutenant-Colonel on the staff of Gov. Young.

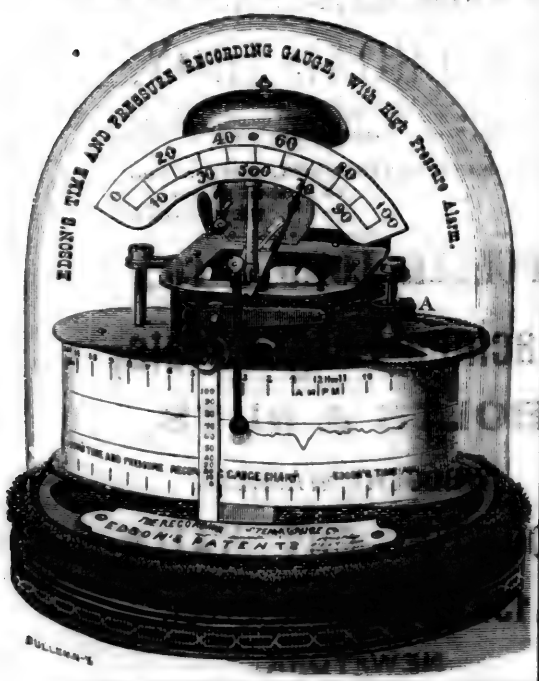
## FINANCIAL.

ALEX. FROTHINGHAM & CO., BANKERS AND Brokers, No. 12 Wall st., make for customers desirable investments of large or small amounts in stocks of a legitimate character, which frequently pay from five to twenty times the amount invested every thirty days.



Reliable stock privileges negotiated at favorable rates. Stocks bought and carried as long as desired on deposit of three to five per cent. Circulars and weekly reports sent 1y39

### The Coal Trade.

For the week ending the 28th ult., the total tonnage, as reported by the several carrying companies, amounted to 261,320 tons, against 417,607 tons in corresponding week last year, a decrease of 156,287 tons. The total amount of anthracite mined for the coal year is 11,398,552 tons, against 8,943,800 for same period last year, an increase of 2,454,752 tons. The quantity of bituminous coal sent to market for the week cannot be stated, the strikers interfering with reports from the Cumberland region. The total tonnage of all kinds of coal for the coal year we make up by adding the anthracite tonnage for the week ending 28th ult, whilst estimating the bituminous tonnage as it was the close of the previous week. The total tonnage for the coal year is 13,076,569 tons, against 10,927,062 to same date last year, an increase of 2,149,507 tons. The receipts at Perth Amboy for the week ending on the 28th ultimo were 17,058 tons, the shipments 31,831 tons, leaving a stock on hand of 114,649 tons. The quantity of coal and coke carried over the Pennsylvania Railroad for the fourth week in July was 19,971 tons of which 16,117 tons were coal, and 3,854 tons coke. The total carried for the year is 2,650,889 tons, of which 2,104,939 tons were coal and 496,278 tons coke. These figures embrace all the coal carried over the road, east and west.—*Phila. Ledger, Aug.* 6.

☞ The Trustees of the Sinking Fund of Cincinnati give notice that they are prepared to redeem the $100,000 of Cincinnati 7.30 bonds dated July 1, 1868, issued for common school purposes, and lettered P 2. Interest on these bonds will cease August 15, when they are payable either in Cincinnati or at the American Exchange Bank, New York.

## Steam Office Watchman!!

THIS GAUGE IS USED IN HOTELS, STEAMERS, Manufactories and Breweries.

The Inventors of this combined "Pressure Gauge" and "High-Pressure Alarm" have, after many years of persistent effort and at great expense, succeeded in perfecting a reliable and accurate instrument for measuring either air, steam or water, when subjected to pressure, and for denoting the same by an automatically written tracing upon Edson's Patent Logs or "Charts." No manufacturer or steam user can afford to be without them. Circulars sent on application to

### Railroad Museums.

A few years ago, during a visit to the Portsmouth Navy Yard located at Kittery, Maine, our attention was called to a room adjoining the chief engineer's office which had been fitted up and furnished for the special purpose of sampling and testing articles needed and used in the engineering department of the United States Navy. It was termed and known as the sample room. Although on a limited scale there was enough of it to prove its practical usefulness and advantages. Here were specimens of cast and wrought iron boiler plate; steel and copper by different manufacturers, exhibiting grain, sections and fractures; samples of oils, sulphur, black lead, cotton waste, packing, turpentine, rubber, rivets, red and white lead, etc. These had all been carefully selected, examined and tested, their peculiar features, properties and manufacture being recorded on attached labels. In addition to these were steam and vacuum gauges, thermometers, hydrometers and indicators, by the best makers. But *cui bono*? Simply this. In ordering stores for the construction and running of the machinery either in the workshops of the yard or in the steamships, contractors had to furnish the supplies according to samples approved by the heads of the bureau of engineering. We are not aware that this plan was adopted in a rigid, systematic manner at other navy yards, but it was new to us and its usefulness and practicability were suggestive. The late General Rodman, of 15-inch gun notoriety, instituted something of the same kind when commandant at the Watertown Arsenal (Mass.,) and was inflexible in its enforcement.

There is not a railroad that does not possess facilities and opportunities for instituting a repository of its own, where samples of railroad supplies—from car wheels, rails and chairs down to car window fastenings—could be kept, for a purpose similar to that named. Such a repository would in time partake of the character of a mechanical museum for the road. There could be preserved a broken rail or two, and sections of different iron and steel rails, models of new cars, ventilating apparatus, brakes, signals and switches, pieces of boiler plate after an explosion or so many years use, sections of car axles, and axle boxes after a certain number of miles run, etc. Civil and mechanical engineers, master mechanics and purchasing agents would find no difficulty in soon stocking a room with samples and specimens that would serve for several excellent purposes, among which we may name: the securing of good materials, the detection of flaws and appearance of fractures, the results of wear and tear, the durability of metals, the efficiency of contrivances, and the practicability of new devices. Oil, cotton waste, tallow, and other ingredients could be kept in sample and a labeled record of their ascertained qualities.

Of course neatness, system and intelligence would be needed in such an undertaking, and a well kept, systematic record of observations, facts and occurrences, would tend greatly to the extension of industrial science and improvements. We opine such a repository maintained on every road would be not only highly advantageous to the directors but would become a matter of general interest to all concerned in railroads. Nearly all future improvements for the furtherance of safety and economy must come from close observation and experience; and the plan we have marked out would certainly be one of the means for the promotion of railroad science. The men who could successfully and practically carry out and manage this enterprise are the superintendents, master mechanics and their associates who would probably appreciate the assistance and encouragement of the president and directors.

### Practical Talks on Mechanical Reform.

Two instances, one of a defective steam gauge, and another of a boy *engineer* without any steam gauge, have been cited to show how much parsimony and incompetency often exist in the care of boilers and machinery—parsimony that amounts to willful neglect on the part of proprietors and manufacturers, and incompetency surprising in those allowed to "run an engine." Which of the two is the more culpable, the man who, for the sake of saving a few dollars, neglects the inspection and repairs of machinery, and thereby proves himself indifferent to loss of life and property, or the man who, knowing himself to be ignorant of and unaccustomed to the requirements of steam machinery, assumes a position for which he is perfectly incompetent, and for the sake of getting a living and it may be for his family, misrepresents his qualifications? We think a majority will decide against the former.

But here is something remarkable. A manufacturer will decide on having first-class ma-

chinery in his works, and casts about to obtain that which he considers adapted for his particular manufacture. He insists upon having the *best*, and sees to it that it is properly erected, and delivered in perfect condition. He will quote to his associates and acquaintances the sometimes misapplied adage that "the best is always the cheapest," and will further feel no little pride in procuring machinery second to none in the market. Now his usual sagacity leaves him, by employing "cheap help" to take charge of that which has cost him thousands of dollars. The attendant may be a stranger in the land, and "wants a job;" or he may have been a faithful servant, can groom a horse, and "do chores;" he may be steady, industrious and willing; but these virtues, admirable and desirable as they are, do not balance with ignorance. Hence in one year's time the boiler, that was made of the best refined iron with any number of CCs to its brand, bears a lining or internal coat of crustation which adds greatly to the consumption of fuel and the burning out of the plates; steam gauges are out of order, bearings are worn out by dirty journals; pumps click and bang their valves away for want of cleaning; brasses are pounded out of shape for want of adjusting, and gradually the machinery assumes a loose character, unattractive in appearance and discreditable to both proprietor and attendant. And why is this, which so very many can attest as being frequently the case? We find the answer in the fact that an incompetent man is in charge, whose knowledge extends to the opening and shutting of a valve and throwing in fuel to a furnace. We are sick of hearing about an "intelligent Irishman," and "faithful darkeys" as good engineers. One cannot read, and another says vacuum means dirty water or foul air. Are these the men to be entrusted with the care of engines, boilers and machinery, and be responsible for life and property? Reduce the number of this class of *engineers* and a proportionate reduction in the number of accidents and repairs will be the result.

There is not an educated engineer in this or any other country but who knows that hundreds of lives are in jeopardy every day from incompetent men, and it is time that this subject should be again brought prominently forward before the public. Let them judge if with such a state of things it is worth while expending $100,000 of their money in boiler experiments; and whether it is worth while to enact laws and to pay boiler inspectors, when licensed and unlicensed engineers are on the same footing and hold the same responsible situations.

☞ The following gentlemen have been elected directors of the Springfield, Athol and Northeastern Railroad Company: Willis Phelps, Homer Foot, Wm. Birnie and Charles R. Ladd of Springfield, Edward Smith and Wm. B. Kimball of Enfield, S. P. Bailey of Greenwich, J. W. Goodwin of Dana, Constant Southworth of Hardwick, and John C. Hill and T. H. Goodspeed of Athol. The gross earnings of the company during the year were $95,566; expenses, $71,875; leaving the net earnings, $23,691. The gross earnings of the previous year were $105,726, while the operating expenses were $75,893.

### Chicago and Northwestern Railway.

The earnings of the Chicago and Northwestern Railway for the year ending May 31, 1877, were:

| | |
|---|---|
| Passengers | $3,918,322 79 |
| Freight | 6,261,585 72 |
| Express | 246,908 36 |
| Mail | 284,792 88 |
| Miscellaneous | 65,592 78 |
| Total | $11,877,500 03 |
| The operating expenses and taxes were | 6,547,680 06 |
| Leaving a balance of | $5,329,819 97 |

From which deduct—

| | | |
|---|---|---|
| Interest and sinking fund on bonds | $2,264,259 87 | |
| Premium on gold coupons | 122,163 95 | |
| Interest & exchange | 350 72 | |
| Balance of old tax on capital stock, 1874 | 14,515 19 | |
| Amount paid in exchange Old Galena and Chicago Union Railroad stock | 557 82 | |
| Rent of the Chicago, Iowa and Nebraska Railroad | 471,464 50 | |
| Rent of the Cedar Rapids & Missouri River Railroad | 621,489 69 | |
| | | 3,494,801 74 |
| Leaving the net income of the Chicago and Northwestern Railway proper for the year | | $1,835,018 23 |

The amount is debited with the deficit incurred in the operations of the proprietary lines, which was $756,791 96, leaving a clear profit for the united system of $1,078,226 27, equal to five per cent on the preferred stock.

The total charges have been reduced on the entire railway, including the proprietary lines, from $12,834,014 08 in the preceding year, to $11,954,874 69 in the last year, thus accomplishing a saving to the company of $879,139 39.

The capital stock and fractional scrip outstanding on the 31st of May last was $36,799,480 53, of which $21,696,334 56 was preferred and $15,103,145 97 common stock. The amount of $194,101 14 of preferred stock and $19,965 57 of common stock was issued during the year, a part in accordance with the original terms of consolidation with the Galena and Chicago Union Railroad Company, and a part thereof in conformity with rights of holders for exchanging their stocks and scrip as follows: for the residue of the capital stock and instalment receipts of the Beloit and Madison Railroad Company; for stock and scrip of the Galena and Chicago Union Railroad Company, and for the residue of the stock of the Chicago and Milwaukee Railway Company; for Peninsula Railroad bonds, and for fractional scrip of the Chicago and Northwestern Railway Company surrendered and cancelled. A great deal of effort has been made to get up and cancel all the shares of the old companies, and at the present time but twelve shares of the Galena and Chicago Union Railroad stock and twelve shares of Chicago and Milwaukee Railway stock are outstanding.

Consolidated sinking fund currency bonds, amounted to $65,000, have been issued during the year in substitution of the following issues of bonds purchased and cancelled, to wit: Preferred sinking fund bonds, $1,100; general first mortgage bonds, $29,100; funded coupon bonds, $7,800; Green Bay extension bonds, $18,000; Appleton extension bonds, $1,000; Peninsula Railroad bonds, $9,000; Galena and Chicago Union Railroad first mortgage bonds, $1,000; Galena and Chicago Union Railroad second mortgage bonds, $1,000; Elgin and State Line bonds, $1,000, and Mississippi River Bridge bonds, $1,000. Total, $65,000.

### Railroads of Iowa.

The following table, compiled from the annual report of the Secretary of State of Iowa, is interesting as showing the length of the several railroads in that State, the aggregate gross earnings, and the operating expenses, etc., of the same for the year 1876:

| | Number of miles Jan. 1, 1877. | Aggregate gross earnings. | Operating exp., repairs, & taxes. |
|---|---|---|---|
| Burlington, Cedar Rapids and Northern and branches | 369.7 | $1,128,070 | $869,845 |
| Burlington and Northwestern—narrow gauge | 33.9 | 1,783 | ..... |
| Burlington and Southwestern | 79.6 | 111,221 | 118,039 |
| Central of Iowa and branch | 202.5 | 717,824 | 587,078 |
| Chicago, Burlington & Quincy & branches | 492.5 | 3,832,012 | 2,653,919 |
| Chicago, Clinton and Dubuque | 45.2 | 154,141 | 121,202 |
| Chicago, Dubuque and Minnesota | 109.0 | 205,035 | 165,132 |
| Chicago, Milwaukee & St. Paul & branches | 335.6 | 774,524 | 603,843 |
| Chicago & Northwestern and branches | 432.3 | 3,289,556 | 2,089,745 |
| Chicago, Rock Island and Pacific and branches | 628.9 | 3,929,578 | 2,406,807 |
| Davenport and Northwestern | 160.5 | 170,914 | 185,734 |
| Des Moines and Fort Dodge | 87.2 | 170,154 | 149,837 |
| Des Moines and Minnesota—narrow gauge | 87.0 | 59,757 | 39,940 |
| Dubuque Southwestern | 54.8 | 112,466 | 100,460 |
| Illinois Central | 402.2 | 1,619,277 | 1,270,482 |
| Iowa Eastern—narrow gauge | 20.0 | 26,130 | 19,731 |
| Iowa, Minnesota and North Pacific | 17.0 | No report. | No rep. |
| Iowa Railway, Coal & Manufacturing Co. | 3.2 | 12,582 | 8,354 |
| Kansas City, St. Joseph and Council Bluffs | 53.8 | 366,886 | 195,245 |
| Keokuk & Des Moines | 162.2 | 602,902 | 465,596 |
| Missouri, Iowa and Nebraska | 14 8 | 18,880 | 14,719 |
| St. Louis, Keokuk and Northwestern | 0.2 | 288 | 420 |
| St. Louis, Ottumwa and Cedar Rapids | 43.8 | 75,455 | 90,105 |
| Sioux City and Pacific | 79.9 | 219,811 | 150,021 |
| Sioux City and Pembina | 17 6 | 24,677 | 23,357 |
| Sioux City & St. Paul | 57.2 | 108,262 | 78,202 |
| Toledo and Northwestern | 8.0 | 5,501 | 4,540 |

—showing the aggregate length of all the roads on the 1st of January, 1877, to have been 3,938.19,

the aggregate gross earnings $17,687,037 80, and the operating expenses, including repairs and taxes, $12,411,814 60.

### Portland and Kennebec Railroad.

The Supreme Court of the United States has rendered the following decision:

No. 240. Richard Sullivan, trustee, and Frederick Gardiner, appellants, vs. The Portland and Kennebec Railroad Company and John Patten, trustee—Appeal from the Circuit Court of the United States for the District of Maine.—The Kennebec and Portland Railroad Company was authorized to build a railroad from Portland to Augusta, both in the State of Maine. On the 30th of April, 1850, that a portion of the road between North Yarmouth and Portland, about twelve miles in length, was mortgaged to Ruel Williams, John Patten and J. B. Carroll, trustees, to secure the payment of $202,400 advanced to the company by the cestuis que trusts. The debt was represented by certificate, bearing interest at the rate of ten per cent per annum. On the 1st of November, 1850, the company mortgaged the whole line of the road to the Commissioners of the Sinking Fund to secure $800,000 lent to the company by other parties. On the 17th of October, 1851, the road and franchises were mortgaged to John Patten, Joseph McKeene and M. S. Hagar, in trust to secure bonds issued by the company to the amount of $280,000, known as first mortgage bonds. On the 15th of October, 1852, the road and franchises were mortgaged to the same trustees to secure the payment of a further issue of bonds to the amount of $250,000, known as the second mortgage bonds. In the progress of the work on the road the company issued certificates of preferred stock, known as old preferred stock, to the amount of $240,000. On this stock dividends of ten per cent per annum were to be paid. Two hundred thousand dollars of it in amount is averred to be still outstanding. On the 7th of October, 1852, a proposition was made by the company to the following effect:

The company was to waive its existing right to redeem at pleasure its road from North Yarmouth to Portland, and to make it irredeemable until November 1, 1870, provided the holders of the certificates of indebtedness would, by indorsement thereon, authorize the trustees, after paying the holders three per cent semi-annually upon the amounts severally represented by such certificates, "to pay over semi-annually to the treasurer of the company, for the use and benefit of the company, the balance of the income (for interest) which the stockholders are now entitled to receive—viz: two per cent—to be held by him and appropriated, as far as may be required or the same may go to the payment of interest to such preferred stockholders as shall surrender their old certificates of stock and receive new certificates of preferred stock bearing three per cent interest or income semi-annually in lieu of five per cent, as now stipulated. Said payment of three per cent to the holders of said certificates and of the balance aforesaid to the treasurer by said trustees semi-annually to be in full of the annual income of two per cent to which said certificate holders are now entitled." It was ordered by the company that if the proposed arrangement should be made with the North Yarmouth certificate holders the fund thereby saved should be applied in payment of the dividends accruing on the new certificates of preferred stock, as also proposed. Authority was given to the president of the company to issue such new certificates of preferred stock and to waive the right to redeem the North Yarmouth road until November 1, 1870, the time named in the proposition. None of the holders of the preferred stock accepted this proposition until September 1, 1853. The first new certificate bears date on that day. The other certificates were issued subsequently. On the 16th of December, 1858, the company ordered three per cent to be paid on the 1st of January then next to all the holders of the new certificates for the preferred stock. The company became hopelessly insolvent. The trustees of the second mortgage foreclosed that mortgage. The foreclosure was perfected and became absolute in May, 1862. In November, 1862, the bondholders under that mortgage formed a new corporation by the name of the Portland and Kennebec Company. The trustees conveyed to this company. The company went into possession and has since been in possession and operated the road and claimed to own it. This bill is filed by the complainants as holders of the new certificates of preferred stock for themselves and in behalf of the other holders not before the Court. The claim is to recover the four per cent per annum relinquished by the North Yarmouth holders of certificates of indebtedness pursuant to the proposition of the original company, and which proposition was also to give the holders of the new certificates of preferred stock what is claimed by this bill. The decree dismissed the bill, and is here affirmed, the Court finding the proceedings regular and that there was no privity between the complainants and the new corporation, and that the latter did not succeed to the liabilities of the old corporation.

Mr. Justice Swayne delivered the opinion.

### Railway and Manufacturing Notes.

The Central Vermont Railroad Company have completed the laying of steel rails from St. Albans to Essex Junction.

The project of a narrow gauge railroad between Elliott City and Baltimore is again being agitated.

A contract has been let at Amsterdam, Holland, for the delivery of 20,000 iron sleepers for the State railways.

An American palace car, with dining room attached, is doing a good business on a Belgian railroad.

In Wurtemburg a Royal decree has just declared that a sum of 22 millions of marks is to be devoted to railway construction. If this amount cannot be supplied from existing sources, it is to be raised, so far as may be necessary, by public subscription.

The syndicate of the great French railway companies which has undertaken the construction of the Great Girdle railway of Paris, has just thrown open the first section of the line from Noisy-le-Sec to Juvrisy, thus connecting the Eastern and the Orleans lines.

The Junction and Breakwater Railroad Company has concluded to extend their road to Rehoboth at once. The survey is now in progress under the direction of the chief engineer.

Of the 104 locomotives in the Pennsylvania Railroad roundhouses at the time of the fire, 50 have been pronounced worthless by the experts. The others are being sent to Altoona for repairs.

The Railway News say that the Belgian government has given orders to the Westinghouse Air Brake Co. to the extent of $50,000 for fitting the Air Brakes on the rolling stock of the State railways.

The city attorney of Chicago decides that as there is no common law liability and none is provided by the statutes of Illinois the city cannot be mulcted for any damage to property arising from the recent riot.

The Baltimore Sun says that the feature in the stock market is the advance in Virginia Consols, caused by the result of the Gubernatorial Convention at Richmond, and the attitude assumed towards the State debt.

Most of the Pittsburg oil refineries, which have been idle since the commencement of the railroad troubles have again resumed operations.

The Baltimore Gazette mentions the probable retirement of Mr. John W. Garrett from the presidency of the Baltimore and Ohio Railroad, and the accession of Mr. William Keyser, now Second Vice President, to the head of the company. The election will not, however, be held until October.

The Lehigh Car Wheel Works have just completed a number of wheels for the Great Eastern Railway of England. They have also some orders for South American railroads.

The Taylor Iron Works, of High Bridge, N. J., have just received an order from the Port Royal Railroad, of South Carolina, for 600 car wheels fitted to axles and 40 wheels loose.

The French Government has approved and adopted the improved revolving cannon invented by Mr. Hotchkiss an American inventor.

The Boston and Albany Railroad is about to make a trial of 42-inch wheels on the Boston and New York Express cars.

Instead of a bell and cord arrangement a patent electric system has been introduced on the Philadelphia, Wilmington and Baltimore Railroad.

There is a continuous automatic alarm on the locomotive whenever any portion of the train becomes accidently detached.

The Rev. A. Le Roy, of Utica, has invented a dust-guard for car windows. We hope it will be a success and if so generally adopted.

Messrs. Joseph Fenton & Sons, of England, have invented and patented a new method for fitting railway wheels and axles, which is highly spoken of and getting much attention. It is also applicable to fly wheels, pulleys, and many other appliances.

August 13th saw the consummation of rapid transit on Atlantic avenue, Brooklyn. Sixty trains now run to and from East New York, beginning at 5:30 A. M. and ending at 10:30 P. M. Fare five cents.

Iron instead of brass tubes are being put in new Boston and Albany engines, because of the high cost of brass. Brass tubes, however, are more durable.

At Roach's ship yard there is a new hydrostatic plate bending machine, capable of working up to a pressure of 4000 pounds to the square inch.

A very extensive mine of black lead has been discovered in Floyd County, Georgia, which will soon be opened.

It is said that 350 car loads of coal are sent daily over the Chattanooga Railroad, which speaks well for the coal and iron business of Tennessee and Northern Georgia.

Iron railroad ties are being tested on a section of the Central Pacific Railway. They cost twice as much as wood, but are supposed to be far more durable.

Ohio ranks next to Pennsylvania as an iron State, producing but little less than 20 per cent of the total pig iron product of the country.

The contract for the iron work upon the new Columbus avenue bridge, Boston, Mass., has been awarded to the Leighton Bridge and Iron Company of Rochester, N. Y.

The Vulcan Iron and Nail Works, Chattanooga, Tenn., are working double time, and have orders for light rail, merchant iron and fish plate, sufficient to run the works to their fullest capacity until next January.

### Railroad Crossings at Grade.

The Cleveland *Leader* briefly summarizes the opinion of Judge Albert Yeomans, of Trumbull County, Ohio, delivered in a case in which a railroad in process of construction seeks to "appropriate" the right to cross and a right of way across the track of the Atlantic and Great Western Railroad at grade, and at a point on the Atlantic and Great Western Railroad where the united grade and curvature of that road makes the maximum difficulty of operation going westward on that division of the road. The *Leader* says:

The grade is said to be more than 48 feet to the mile, and the curvature is equivalent to an addition to the grade of 8 feet to the mile, making the grade equal to 56 feet to the mile. The Atlantic and Great Western Railroad resists the appropriation upon the ground that the "necessity for the appropriation" cannot be shown, and that unless this necessity be shown "by satisfactory proof" to the Probate Judge of the county, there is no authority of law in Ohio under which an "appropriation proceeding" can go further, or any jury be summoned to assess damages. The court held substantially: that the jurisdiction of the question of "the necessity for the appropriation" of a particular point of crossing at grade by one railroad of another railroad's track in Ohio, rests in the Probate Court of the county in which the proposed crossing is situated; and that where the crossing at the proposed point would work unnecessary, unreasonable or unusually dangerous interruption to the service of the public in the operation of the original road, and it is reasonably practicable to select a point of crossing not open to either of these objections, an impartial public tribunal will not, in the exercise of the supervisory power delegated to it by the State over the exercise of the power of "eminent domain" by a corporation, decide that there is a necessity for the appropriation of the proposed crossing.

### Riehle Bros. Testing Machine.

TRIAL OF A MACHINE FOR TESTING THE STRENGTH OF METALS, WOOD, LEATHER, STONE, WIRE AND OTHER MATERIALS.

Yesterday morning, a number of gentlemen visited the scale manufactory of Messrs. Riehle Bros., on Ninth street, above Master, by invitation of the proprietors, for the purpose of viewing a trial of a new testing machine of 40,000 pounds capacity. Before the commencement of the experiments the party was escorted by Mr. Henry B. Riehle through the factory, where the various processes of building platform scales of all sizes were explained. A large railroad track scale was adjusted and tested in the presence of the visitors, and several special tools in use at the establishment for notching beams, grinding bearings to a true edge, &c., were exhibited.

The testing machine, which was the special object of the visit, was built for the University of Ohio, at Columbus, Ohio, for use in the technological education of the students. Its capacity is 40,000 pounds, and this amount of strain may be applied either as tension, crushing power or transverse bearing strain, the machine being so fitted that it may be applied to either of these modes. The machine has an upright frame, at the base of which is a hydraulic jack, from which the power is obtained by means of a small hand pump. The specimens to be tested are placed between grips, which communicate with a scale beam by which the amount of power in pounds is accurately shown during the entire test.

Some of the experiments were quite interesting, and the scientific results were closely noted by the gentlemen present. A piece of common wrought iron, one inch long and with one-half a square inch area at the ends, was stood on end, and was found to resist 39,970 pounds pressure before it yielded, after which the fibre was destroyed, and it was crushed to about half its original length and spread to nearly double thickness, its consistency at the close of the test having become entirely granular. A piece of white pine wood, 2 inches square and 4 inches long, stood on end, commenced to crush at 19,250 pounds pressure, the grain of the wood "telescoping" at about the centre, and the block losing about an inch in length. A piece of close-grained white ash wood of the same dimensions commenced to crush at 20,830 pounds, a wedge shaped section being forced out laterally from the centre of the block.

The next experiment was in crushing a round bar of cast-iron, of the same size as the piece of wrought iron mentioned, viz: one-half a square inch area at the ends and one inch long. This was stood on the end, and yielded to 16,000 pounds pressure, breaking diagonally in the centre, and showing a complete disintegration at the point of fracture, so much so that the particles of iron could be scraped from the surface of the fracture with the finger nail.

A piece of wire cord, about half an inch thick, with a cotton core, broke at 890 pounds, tensile strain, after stretching over 50 per cent.

A bar of cast iron, turned down to a half of a square inch section, was next submitted to tensile strain, when it broke at 18,020 pounds, showing a tensile strength of 36,040 pounds to the inch. A bar of common wrought iron of the same size yielded to 19,000 pounds strain, and commenced to stretch. At 2600 pounds strain it had lengthened, .33 of an inch in three inches. At 27,300 pounds strain the iron lost its "life," and afterwards broke, having lengthened .99 of an inch and reduced in diameter at the point of breakage nearly one-third.

Tests for lateral strain were next made. A common wrought-iron bar one inch square and one foot long between bearings, giving way at 4500 pounds pressure, and a bar of pine wood, two inches square and the same length, breaking at 2980 pounds pressure.

The Messrs. Riehle have also made for the Ohio University, at Columbus, a small testing machine of 100 pounds capacity, which is worked on the same principle, except that the power is obtained by a wheel and screw instead of from a hydraulic jack.

The machine tried yesterday was not by any means one of the most powerful made by the firm, its capacity being only 40,000 pounds, while they have constructed several of seventy-five tons, or 168,000 pounds capacity, some of which were made for the United States Government.—*Phila. Ledger, Aug.* 9.

### Delaware and Hudson Canal.

At a meeting of the directors of the Delaware and Hudson Canal Company on the 18th inst., a mortgage for $10,000,000 was executed upon the property of the company in Pennsylvania. According to a circular issued by President Dickson, the mortgage includes and covers the $5,000,000 debenture bonds of 1894, and the proceeds of the balance will be used in payment of such of the bonds of Nov. 1, 1877, as may not be renewed to retire the floating debt, now amounting to $1,500,000. The amount remaining after these purposes have been carried out will, it is said, "place the finances of the company in a position to meet all its requirements until 1880, even if the sale of coal is suspended at competitive points."

### Transfer of the Mails.

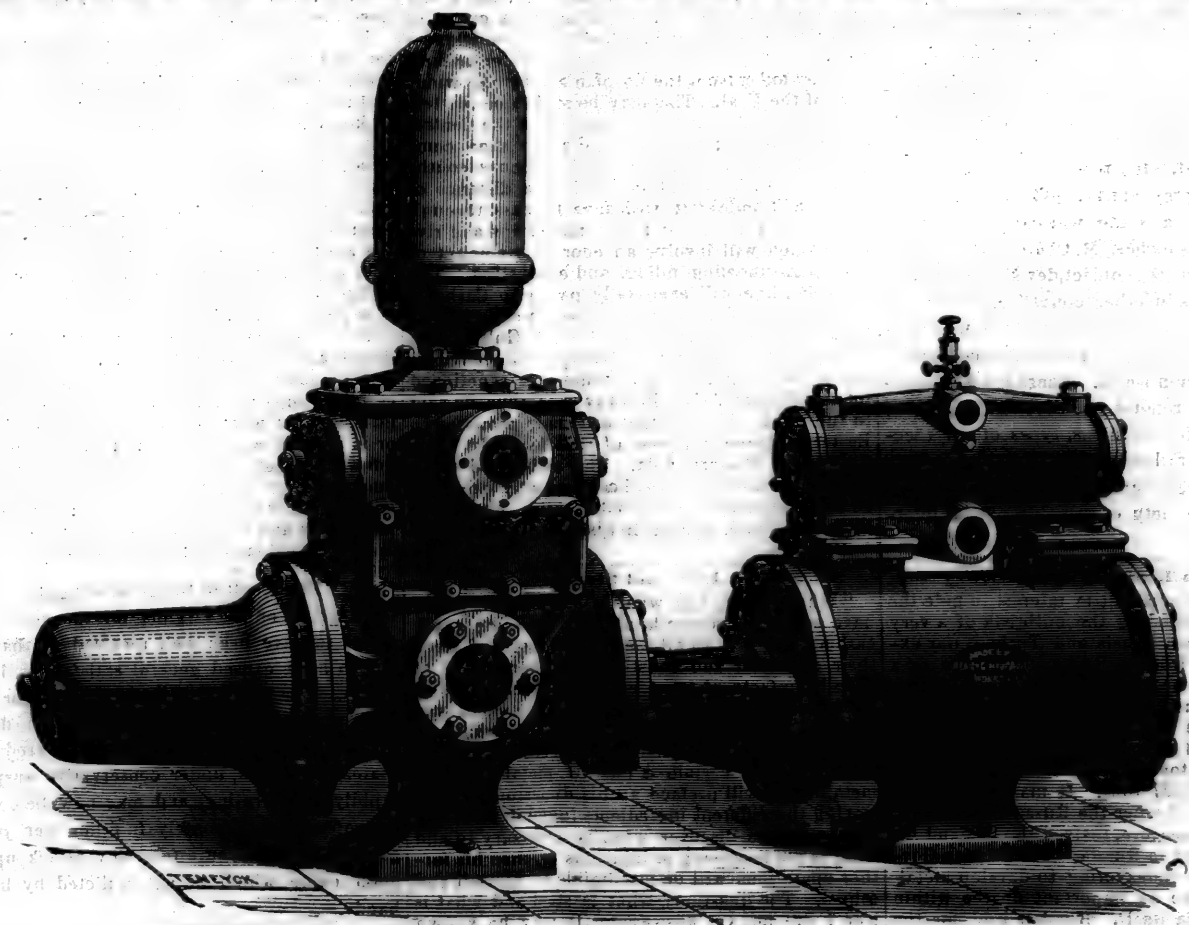
The statistics of the Post Office Department show a steady transfer of the mail service from what is known technically as the "star service" (which permits the contractor to carry the mails by any means that insures certainty, celerity and security) to the railroads. In 1868 the annual transportation by "star service" was 45,540,587 miles, or 54 per cent of the whole service, and by railroad during the same year 34,888,178 miles or 41½ per cent of the entire service. In 1876 the service by either mode was largely increased, but the ratio had been a little more than reversed in the latter year. The star service had increased to 54,824,003 miles, making, however, but 40 per cent of the whole service, while the railroad service had run up to 77,741,172 miles, and 57 per cent of the service.

### The Harris Steam Pumps.

There is no class of machinery in extensive use, that bears the imprint of engineering skill and mechanical ingenuity so conspicuously as steam pumps. Whether we confine our observation merely to their exterior form and general design, or go further and examine their interior structure and operation, we find there have been improvements in taste, design and mechanism. True there are a variety of shapes, no two manufacturers of pumps adopting just the same form and arrangement, and each maker claiming certain specialties in construction and advantages in operation, yet taking those best known and in the most extensive use, it is very evident that mechanical ability has been exerted to obtain durability and efficiency. The strong competition and rivalry among manufacturers of steam pumps can scarcely be wondered at, when the demand for this class of machinery is so constant and so great, and when a maximum of duty with a minimum of expense, great results and little outlay, seem to be the objects with purchasers. To the fact that there are pumps of a cheap kind for certain purposes and others that are admirable for their peculiar features, every mechanic and manufacturer can readily testify; but it is our province to illustrate and describe more particularly those of special design, remarkable for their novel features and general excellence; and in doing this we wish to avoid all fulsome praise, to speak of that correctly which merits notice, and to give that judgment which practical engineers and experienced mechanics consider due and just to the designers and constructors.

The Harris Steam Pumps are among the most prominent ones in this country. They are constructed at Reading, Pa. The officers of the company are A. B. Wood, president, John H. Harris, managing director, and Charles Swinecoe, secretary and treasurer. These gentlemen are well known for their spirit of enterprise, and remarkable energy. Their extensive ware rooms and offices are at 87 Liberty street, in this city, where can be seen a fine stock of pumps for different purposes. One of these is the steam pump for oil.

At the new oil works recently erected at Bayonne, N. J., owned by the Prentice Refining Company, there are ten Harris steam pumps—one for crude oil, eight-inch suction; capacity, six hundred gallons per minute, or nine hundred barrels per hour; one for water, same capacity; the others for pumping distillate benzine, tar, etc. They are simple, compact in their mechanism, of great power, direct action, and unexceptionable in regard to workmanship and finish. To the mechanical eye, which quickly discovers symmetry and unique



design in machinery, the disposition of the mechanism in these pumps appears admirable. By an ingenious arrangement, all outside connections, as tappet arms, valves, stems, collars, cranks, eccentrics, fly-wheels, etc., are dispensed with, so that liability to disarrangement by external blows or neglect is avoided. And yet there is easy access to all the working parts, which are positive, durable, and adapted to any condition of work.

From the handsome engraving given here, which is an exact representation of one of the Harris steam pumps for crude and refined oil, or distillate, the correctness of the previous statements will at least be partially substantiated. It represents a pump having a steam cylinder, 16 inches in diameter, pump plunger 9 inches in diameter, and a stroke of 18 inches. Another size of one of their oil line pumps is as follows: diameter of steam cylinder, 4 inches; diameter of plunger, 3 inches; stroke, 6 inches; gallons per stroke, 19; diameter of steam pipe ¼ inch; diameter of exhaust pipe, ¾ inch. A long experience in the construction of pumps, for working against heavy pressures, enables the company to warrant these pumps to do this class of work with great economy and in a very superior manner.

Connected with this subject of the Harris pumps, we may very properly refer to the great success of the boiler feed pumps by the same inventor. The following is a recent report by high and competent officials on one of the No. 3 boiler feed pumps, having a steam cylinder 5½ inches in diameter, a plunger 3¼ inches in diameter, and a stroke of 7½ inches:

CHIEF ENGINEER'S OFFICE,
NAVY YARD, NEW YORK, March 19, 1877.

*Sir*—In obedience to your order, we have carefully examined and tested the Harris Steam Pump. It is one of the direct acting kind, whose main valve is carried by a supplementary piston, which piston is operated by the direct action of steam upon it through a supplementary valve, which is lifted by the main steam piston, the entire operation being

THE HARRIS STEAM PUMP FOR OIL, AS CONSTRUCTED AT THE READING HYDRAULIC WORKS.

conducted internally in contradistinction to the class of pumps whose supplementary valves, or movable valve seats, are moved by the main piston through the agency of external arms, rods and tappets.

The water end is a double acting plunger pump, with disc valves. We were unable to make an absolute trial for economy as to the exact cost in steam of work done, but such tests were made as convinced us that there is no marked difference in economic performance between this and the other well known direct acting pumps.

In the test as to maximum performance, it worked fully up to the work claimed for it of eighty (80) gallons per minute, and it was regulated to run as slow as one stroke per minute.

It ran at its highest speed smoothly and with very little noise, and was readily started at all parts of the stroke.

The water valves were exposed for examination and the bonnets replaced in about thirty seconds.

The peculiarities of the Harris Steam Pump deserving special mention and commendation, are, that it takes but the intervention of two moving parts to move the main valve, that the steam piston cushions on compressed steam, thus avoiding danger of its striking the heads, that all the appliances for the admission and emission of steam are enclosed and beyond the control of meddlesome, ignorant and inefficient operatives, and by being encased are the more protected from injury.

The plunger on the water end, we think, is preferable to a piston, as it is much easier to pack, and the wear of the cylinder lining, inevitable in a piston, is avoided—the advantage of a plunger is particularly evident in pumping dirty water.

Finally we would recommend the pump as a whole on account of its compactness, fewness of working parts, for its absence of outside connecting or adjustable levers, and for the easy access to all its vital parts.

Respectfully,

ROBERT DANBY,
Chief Engineer, U. S. N.

A. W. MORLEY,
P. A. Engineer, U. S. N.

J. G. BROSNAHAN,
P. A. Engineer, U. S. N.

Besides the pumps already noticed the company construct steam pumps for many different purposes and some especially designed for railroad water stations, hotels, mines, quarries, fire apparatus for manufactories, and blowing engines.

### Street Railways in France.

Street railways were first introduced into France in 1853, by a Mr. Lombat, who, by permission, put down an experimental line on the Quai de Billy, Paris. In 1854 a concession for 30 years was granted to him to build a line from Vincennes to the Port de Sevres. From that time to 1876 twenty concessions altogether were made for street railways in France, the total length of the lines being 274 miles. The minimum width of roadway between foot-walks on which a track is permitted is 23 feet 5⅛ inches, and for a double track line, 32 feet 2 inches. M. Challot thinks that departures may be made from this rule, as in other countries it is permitted to use narrower streets. The tracks must be in the middle of the street, and it is required that the company shall keep the paving between the rails and for a certain distance each side of them in good order. Thus far the ordinary railway gauge of the country (4 feet 8½ inches) has been employed, but there is no restriction. The authorities may prescribe the form, weight, and mode of fastening the rails, but some liberty is allowed. In recent concessions the weight of rails prescribed is 32 pounds to 40 pounds per yard, and the width of the cars is limited to 7 feet ⅝ inches. M. Challot, who has just published a book on the subject, devotes some space to street railroads in other countries, brief notes of the steam, compressed air, and hot water engines for street railways in use in France, and to railways on common roads. There are 24 appendices, including reports and decrees, forms of concessions and retrocessions, types of cross section as for street railways adopted in the department of the Seine, Belgian laws relating to street railroads, and a variety of valuable official information.

### Russian Railway Progress.

It is a matter of some little interest to note the fact that notwithstanding the outbreak of a very serious war between Russia and Turkey, our exports of railway iron to Russia have been on a very considerable scale this year. Thus to June 30 we sent the Russians 43,535 tons of rails and accessories, while the corresponding exports in the same direction in the corresponding period of 1876 were 18,948 tons, and in the corresponding period of 1875 30,927 tons. It may, indeed, be fairly questioned whether the Russo-Turkish war has not, in some measure, revived the demand for English railway iron in Russia. The Russian Government has been endeavoring to develop metallurgical industry to an important degree within the area of Russia itself. Russian iron for the Russians has been emphatically the policy of the Czar's Government, and with this object it has even offered bonuses for the manufacture of Russian iron by Russian hands. But with the strain of a great war upon their energies, it is very possible that the Czar's advisers may show less eagerness to devote the pecuniary resources at their disposal to their pet policy of stimulating the Russian iron manufacture. At the same time, the Russians have not relaxed the vigor with which they have for several years past been pursuing the work of railway establishment. It may be true enough that the new Russian railways are of a strategic rather than of a commercial type; but whether this is the case or not, they still absorb considerable quantities of railway iron, and as this iron must be obtained from some source it is not very surprising that a rather increased demand has prevailed of late for English iron on Russian account.

One great undertaking has just received the authoritative approval of the Czar, or rather of the Czar's Government. We refer to the Central Asian Railway, which has been for some time under consideration in Russian business and official circles, and which is considered to possess a commercial as well as a military importance, although probably political considerations have prevailed over all others in inducing the Russian Ministry to press the undertaking on, in spite of the very serious public difficulties against which Russia has now to contend. One section of the Central Asian Railway may be said to have been already completed. The road commences at Moscow and it has been fully completed to Samara on the Volga, through Lower Novogorod, a distance of 600 miles. The original route planned out for the line continued through Lower Novogorod through Kazai to Ekaterineburg, east of the Ural Mountains, a distance of some 800 miles. The route of which a concession has been recently granted by the Russian Government runs, however, southeastwardly from Novogorod through Samara, so that it reaches Orenburg on the Ural river, a distance of 600 miles. It then follows a curve of that river east to Orsk, which is 150 miles east from Orenburg, 800 south from Ekaterineburg, and 600 miles from the Caspian Sea by the windings of the Ural. This may be said to be the termination of the European portion of the Central Asian Railway; the Asiatic division then commences. From Orsk the road continues southeastward to Tashkent in Khokan, a distance of about 800 miles; it will have to pass through swamps and deserts and over mountains and rivers, which will involve an enormous amount of bridging, tunneling, piling, and excavating. The projected line will eventually pass into Cashgar, where it will effect a junction with a contemplated line from Ormus on the Persian Gulf, which crossing Affghanistan into Cashgar is intended to be carried to Pekin. The route now sanctioned for the Central Asian Railway may thus be said to run a little north of that originally proposed in Eastern Europe, and east of that formerly mapped out in Western Asia. The authorized route secures Turkestan and will consequently strengthen Russian conquests in that quarter, but it lies, upon the whole, outside British territory in Asia. —*Herapath.*

### Iron and Steel.

"What is iron and what is steel?" we might have said in the above head, with the same application of reply. In all the tests of iron and steel, their character and constitutions, there seem to have been facts of what each specimen contains in the way of ingredients, but only in a small way has any attempt been made to discover what and how much of each ingredient is necessary for the production of certain kinds of metals. If the metallurgist will preface all his experiments with mixing the different ingredients found in steel and iron, and thus discover what is necessary to and what is not necessary or injurious to, then his further operations will be intelligible to himself and others. The questions, what is steel and what is iron? are not yet answered. It may be known what certain specimens contain by way of mineral characteristics, but while we know the character thus far, there is something else lacking to enable a uniform production, except by using such and such native-found ingredients in proportions found to produce, without being able to eliminate from or add to other ingredients differing in a small degree. To knowingly produce uniform iron and of a desired character is not yet possible. When will it be?

To know where and how far to use iron and how far steel, or both, is in the same unknown future as the production of these perfectly adapted metals. If their characteristics, as related to heat and cold, hardness and softness, strength or brittleness, were perfectly known, then the use of either or both would be readily determined. The only definition yet to be given to iron is that it is one of the metallic elements, and which exists under various circumstances and in connection with various chemical ingredients, some beneficial and some hurtful. The term steel indicates that this metallic element has lost or taken on some additional ingredients better adapting it to mechanical uses. All steel is iron, but not all iron is steel. There are no chemical ingredients in steel not found in iron, but many in iron not good in steel.

The only knowledge thus far is the slow one of experience. A bridge fails, but the reason is hard to discover. An iron or steel boiler or fire box burns and corrodes and bulges and crystallizes, and years of time, and perhaps fortunes and lives are lost to learn that the iron or steel was not of a character to stand the labor against it. Direct tests for direct knowledge is postponed year by year, when all the expense of such tests would be regained in a short time were the tests known. It is a simple matter to construct a boiler of a part of two or three kinds of iron, two or three kinds of steel, and steel and iron variously combined, and at once apply the test. If iron is better than steel, or steel better than iron, or steel outside or inside of iron better than either alone, then let us have the knowledge.

If high or low steel or iron of different character for structures will best resist the action of a jarring burden, and the heat and cold of climate, and fierce compression or tensile strain, then let us know it. The St. Louis bridge is build to resist compression, as the spans are arches; the Brooklyn bridge is built to resist tensile strain, as the spans are suspension. It has been proved that the finer the metal the greater the resistance from compression, but it can hardly be true that the hardest steel will better resist strain than a finer quality of homogeneous iron. The Niagara bridge is of iron, and aside from a slight corrosion is in perfect condition.

These tests are the coming points to be established, and the fact that certain uses are made of certain metals of unknown characteristics, and certain results produced from such use, is no definite idea of what would result at another time or in another way. Good and bad usage, and unknown characteristics, are thus leaving the true knowledge of iron and steel in doubt. Experiments by private individuals are always attended with delay and distrust, for the feeling of conservatism and jealousy is still abroad.—*Age of Steel.*

☞ The result of the great struggle which has been going on in Virginia for the governorship seems to have been well received in that State, and to have caused general satisfaction in other States. The nominee, Col. Holliday, is for "economy and solvency," and the platform demands "the maintenance of the honor and credit of the State." Virginia, under conservative auspices, is rapidly recuperating, and may now be considered capable of ultimately fulfilling her just engagements, and secure from any attack upon her good name which is not inflicted by her own hands.

☞ The certificate of incorporation of the Baltimore and Ellicott City Railroad Company has been filed in the office of the Secretary of State of Maryland. The termini are Baltimore city, thence through Baltimore county, by the most feasible and practicable route to Ellicott City. The capital stock of the company is $250,000. The incorporators are Daniel J. McCauley, and John C. Sullivan, of Baltimore county, and Sydney C. Long and Jas. G. McPheeters, of Baltimore city.

☞ The debt of Arkansas with interest computed to 1878 is as follows: Bonds held by the United States $1,557,166; new bonds $514,500; old funded bonds $498,225; new unfunded bonds $428,553; railroad bonds $7,834,895, levee bonds $2,820,686. Total $17,306,118. The outstanding floating debt is about $950,000.

# American Railroad Journal.

**Saturday, August 18, 1877.**

### Financial and Commercial Affairs.

Notwithstanding the increasing requirements of regular business interests, in the line of Money, the loan and discount market has been ruling comparatively easy throughout the week, on ample offerings of capital especially from private lenders, who have been quite prompt in meeting the applications of responsible borrowers at current quotations. The banks have been claiming firmer rates, and have been more discriminating in their advances, with a view to the exigencies of the immediate future, in connection, as well with mercantile affairs, as with Street speculative operations. The Fall trade is looked forward to quite hopefully as likely to prove liberal in amount, and fairly remunerative, the splendid harvest serving to encourage all parties. Call loans have been quoted here at 1½@3½, with most o. the important negotiations reported on the basis of 2@2½ per cent; and very choice to prime mercantile credits are rated at 4½@7, mainly 5@6 per cent per annum. The City banks, last week, reported a further increase in their specie reserve and circulation, with a decrease in their legal tender board, and in the average of loans and discounts, and of the deposits. The loan and discount average shows a reduction of $4,390,600, and the item of circulation an expansion of $104,200. The average of deposits was diminished $3,785,000. The legal tender reserve was reduced $1,167,900; and the specie average augmented $894,900.

The City banks reported their average of gold

last week at $15,030,700, as against $21,092,600 same date last year; and their greenback average at $53,094,800, as against $58,683,200 on Aug. 12. 1876. Their deposits stood at $215,431,600, against $226,515,100 same time in 1876. The loan item was $245,377,200 against $253,075,800 a year ago.

The City bank net reserve of specie and legal tender notes now shows an excess over the legal requirement of reserve to liabilities of $14,267,600, as against $13,606,250 the preceding week, $9,089,775 the week ending 14th April (the lowest footing of this item thus far in the current year,) and $24,781,800 on January 27 (which latter was the highest aggregate reached this year.) The City bank exchanges in currency reached $340,062,241, or a daily average of $56,674,040.

The U. S. Sub-Treasury in this city closed the week ending on Wednesday with a currency balance of $50,826,313, against $50,880,593 the preceding week; and a coin board of $82,590,698, against $81,335,088 on the return of a week earlier. The Customs revenue of the port during the past week was $2,286,000.

The aggregate of the outstanding U. S. currency of all denominations, August 1st, was $379,334,725. The outstanding amount of legal tender notes is $359,094,220. The National bank circulation is now $315,113,910 of currency notes and $1,425,770 of national gold bank notes.

National Bank notes received at the Treasury Department in July for redemption were to the amount of $4,186,000.

The income of the Government from internal revenues last week was about 2¾ millions, and during the fiscal year ending June 30, 1877, $118,438,279, against $116,700,732 in the preceding fiscal year; and from Customs last week about 3¼ millions, and in the last fiscal year $130,439,419, against $148,071,985 in the preceding fiscal year.

On Wednesday of this week the cash balances of the Treasury Department at Washington were: of Currency, $12,811,763; special deposit of legal tenders for the redemption of certificates of deposit, $57,900,000; Coin, $100,303,396, including of Coin certificates, $38,748,500.

Gold has been moving very uniformly, through out the week, the variations in price having been unimportant, and the demand moderate, as well on speculative account, as for shipment and Custom house purposes. The latest dealings indicated rather more firmness. The extremes of the price during the week have been 105⅛@105⅜, closing at 105⅜, as against 105⅜ on Wednesday of the preceding week. The lowest point yet touched by gold was 101¼, on Friday, March 2d. The specie outflow last week was only $277,087, making the total exports of specie hence since January 1, $21,626,906, against $38,480,922 the same time in the preceding year. The imports of specie at this port last week were $73,464, and since January 1st have been $7,749,111, as against $2,848,901 same time last year. The Customs demand for gold last week averaged $381,000 per day. Foreign Exchange has been less sought after, and has been quoted weaker and irregular in price, closing heavily. Bankers' sixty day bills on London closed on Wednesday at $4 83@ 84⅛; sight bills on London at $4 85@$4 86 to the £ sterling. The week's imports of Dry Goods and general merchandise were to the specie value of $5,040,949 as against $5,760,715 the corresponding week of 1876. The week's import entries of Foreign Merchandise at New York included $2,165,568 of Dry Goods and $2,875,386 of General Merchandise. The week's export of Domestic Produce and Miscellaneous Goods from this port were $4,464,346, against $4,519,341 same week in 1876.

Government securities have been moderately active, during the week, mainly on investment account and firmer in price. At the close the market was quoted rather buoyant leaving off on Wednesday as follows:

United States currency sixes, 124⅞@125⅛; do 6s, 1881, registered, 111⅜@111½; do. coupon 112¼@112⅜; do. 1865, new, registered, 106⅞@107⅛; do. coupon, 106⅞@107⅛; do. 1867, registered, 108⅞@109⅛; do. coupon, 109⅛@109¼; do. 1868, registered, 111¼@111¾; do. coupon, 111½@111¾; do. ten-forties registered, 109⅜@109½; do. coupon, 112¾@113; do. five per cents 1881, registered, 109⅞@110; do. coupon, 109⅞@110; do. 4½ per cents, 1891, registered, 107⅝@107¾; ex int., do. coupon, 108¾@108⅞; do 4 per cents, 1907, reg., 105⅜; Central Pacific Gold Bonds, 106¾@107.

The amount of U. S. bonds held by the Treasurer of the United States, as security for the National Bank circulation, is $337,598,600, and $18,706,000 as security for public deposits.

State and Railway bonds have been in fair request as a rule, and quoted toward the close some what stronger as to price in the instances of the more substantial loans. And in the line of Railway and Miscellaneous share property business has been moderately active but at fluctuating prices, leaving off irregularly.

A comparatively brisk business has been reported in the leading kinds of domestic produce especially in Breadstuffs but, as a rule, at lower prices. Foreign merchandise has been in fair demand at about previous figures. Sugars and Molasses have further declined on a moderate movement.

More inquiry has been reported for Hardware, Boots and Shoes and Dry Goods especially the latter with prices showing no very marked alterations.

The general movement in Metals, has been slow, with prices quoted weak and irregular. Eglinton Pig Iron quoted at $25 50; Glengarnock $27 50; Coltness $28 50@$29; No. 1 American Pig at $18@$19; No. 2 do. at $17@$18; Forge $16@$17; American Rails at works $32@$35; Old Rails $18@$19. Wrought Scrap $22@$25. Steel Rails, on the basis of $45@$48 at the mills (with 4000 tons for delivery at Chicago gold at $47 50). Ingot Copper more active but quoted down to 18¼@18⅜ for early delivery at which figures, some 2,000,000 lbs. were recently reported marketed.

Ocean freights have been more active, especially in the Grain and Petroleum interests, and have been quoted generally stronger. Liverpool steamer rates at the close for Grain, however, at 7d.@7½d, (as against 8d. on Tuesday) per bushel. Provisions, 37s. 6d.@55s.; Tallow, 35s.; Leather, 50s. Measurement Goods at 20s.@22s. 6d. per ton; Cotton, ⅛d. per lb., Liverpool, by sail, Cotton, 7-32; Grain, 6⅜d. Oil Cake and Slate, 12s. 6d @15s.; Measurement Goods 15s.@17s. 6d.; Tobacco 25s.@27s. 6d; Grain rates on charter hence for Cork and orders left off at 6s. 3d.@6s. 4½d.; for the Continent, at 6s. 3d.@6s. 6d. do. for Italy at 6s. 3d. @6s. 6d. and from Baltimore for Cork and orders, 5s. 9d.@6s. as to time of loading and from Philadelphia at 5s. 6d.@6s. per quarter. Refined Petroleum hence for Cork and orders, 4s. 4½d.@4s. 9d. for the Continent, 4s. 3d.@4s. 9d. per bbl.

The following quotations of sales of Railway and other securities are in addition to those given elsewhere in our columns:—

# FISK & HATCH,

## Bankers,

No. 5 Nassau St., New York.

U. S. Government Bonds bought and sold in amounts to suit investors: also, Gold, Silver and foreign coins: Deposits received in Currency or Gold, and interest allowed on Balances: Special attention paid to Investment Orders for Miscellaneous Stocks and Bonds.

Illinois Central Railroad Company, New York, July 18, 1877.

A DIVIDEND OF TWO (2) PER CENT HAS been declared by this company, payable on the 1st day of September next, to the holders of the capital stock of this company as registered at the close of the 14th day of August next, after which, and until the 5th day of September, the transfer-books will be closed.

L. V. F. RANDOLPH, Treasurer.

☞ A calculation is made that the new issues of stocks, loans and shares of various kinds in Europe during the first half of 1877 amounted to $288,400,000, of which $242,000,000 were for national and State loans, $14,000,000 for financial companies, and $32,000,000 for railway and industrial undertakings. Russia asked for nearly one-half of all these investments, $135,000,000 being for Russian government loans. The United States does not appear as asking for anything, and the fact is noted that the amount asked for railways and financial and industrial undertakings was smaller than during any half year for a long period.

☞ The National Association of Iron and Steel Workers, which convened at Columbus, Ohio, on the 7th inst., adjourned finally on the 11th. Prior to adjournment the following officers were elected for the ensuing year: President and Secretary, Joseph Bishop, of Pittsburgh; Treasurer, Edward McGinnis, of Youngstown, O.; Trustees of National Association, W. S. Irwin, Pittsburgh; David A. Plant, Columbus; Albert L. Wells, Wheeling, W. Va. A Vice President was chosen for each of the eight districts throughout the country, except the Fifth, which was left for the President to fill.

### Blast Furnace Industry.

Returns published in the Iron Age as to the condition of the blast furnaces of the United States July 1, show the capacity of those out of blast is one third greater than the capacity of those in blast, and the latter are by no means worked to their full capacity. The reports show that there were 87 charcoal furnaces, with a capacity of 7730 tons per week; 87 anthracite furnaces, with a capacity of 17,442 tons per week; and 85 bituminous or coke furnaces, with a capacity of 20,660 tons per week in blast July 1. The capacity of those out of blast at the same time was 63,467 tons. The number of furnaces in blast is considerably larger than the number reported for January 1 and April 1, but this is due to the season of the year, charcoal furnaces blowing in usually in May or June, and to the fact that many bituminous furnaces dependent on lake ore for supplies do not begin work until after the opening of navigation. The Iron Age thinks that the blast furnace industry has about held its own. Pennsylvania has furnaces in blast with a capacity of 21,131 tons per week, and furnaces out of blast with a capacity of 26,981 tons per week, so that its proportion of working furnaces is rather better than that of the country at large.

☞ The Russian Minister of Ways and Communications has directed that all persons connected with Russian railroads shall undergo an optical examination to ascertain their power of distinguishing colors. The result of this investigation is somewhat startling. No less than 48 persons in Finland alone, including a stationmaster and a signalman, have proved to be optically affected. A Russian paper suggests that exposure to the snow and the dust of the plains may have something to do with the prevalence of this complaint in Russia.

☞ About three months ago the Philadelphia and Reading Railroad Company sent out two agents to South America to endeavor to open up a new market for their coal. The agents will visit Rio Janeiro, Para, Montevideo and other points on the Atlantic coast, pass through the straits and stop at all places of importance on the Pacific coast as far as San Francisco. They carry samples of coal with them. The party will return in about six months' time. Until their return it is not likely that any shipments will be made.

☞ The sale of the Brownsville and New Haven Railroad, which was to have taken place at Connellsville on the 9th inst., has been postponed until the 21st inst. It is said it is the intention of the Pennsylvania Railroad Company to purchase the whole line and run the road from Brownsville to Uniontown, to connect with the Southwest Pennsylvania Railroad.

☞ The earnings of the Central Pacific Railroad company for the month of July, 1877, were $1,366,000, against $1,541,222 for July, 1876, and $1,536,225 for July, 1875. For the seven months ending July 31, 1877, the earnings were $9,066,000, against $9,568,166 for the same time in 1876, and $9,446,408 for the same time in 1875.

### The Coal Trade.

For the week ending the 4th inst., the total tonnage, as reported by the several carrying companies, amounted to 232,491 tons, against 380,048 tons in corresponding week last year, a decrease of 147,557 tons. The total amount of anthracite mined for the coal year is 11,712,890 tons, against 9,378,038 for same period last year, an increase of 2,334,852 tons. The quantity of bituminous coal sent to market for the week amounted to 89,520 tons, against 80,869 tons in corresponding week last year, a decrease of 41,349 tons. The total tonnage of all kinds of coal for the week is 272,011 tons, against 460,917 tons in corresponding week last year, a decrease of 188,906 tons. The total tonnage for the coal year is 13,520,613 tons, against 11,371,523 to same date last year, an increase of 2,149,090 tons. The receipts at Perth Amboy for the week ending on the 4th instant were 8,244 tons, the shipments 27,689 tons, leaving a stock on hand of 96,750 tons. The quantity of coal and coke carried over the Pennsylvania Railroad for the last two days of July was 15,622 tons of which 14,288 tons were coal, and 1,334 tons coke. The total carried for the year is 2,666,511 tons, of which 2,119,227 tons were coal and 497,607 tons coke. These figures embrace all the coal carried over the road, east and west.—*Phila. Ledger, Aug.* 13.

### British Railways in 1876 and 1875.

The annual report of the Railway Department of the British Board of Trade for 1876 contains the figures given below. The following shows the proportion in which the paid-up capital is made up of preference, guaranteed and ordinary stock:

| | Ordinary. | Guaranteed |
|---|---|---|
| England and Wales | £216,207,544 | £70,272,152 |
| Scotland | 29,560,892 | 10,185 909 |
| Ireland | 16,240,447 | 321,610 |
| Total | £262,008,883 | £80,779,671 |

| | Preference. | Total. |
|---|---|---|
| England and Wales | £117,704,236 | £404,183,932 |
| Scotland | 24,070,572 | 68,871,378 |
| Ireland | 9,353,513 | 22,915,570 |
| Total | £148,128,321 | £490,816,876 |

The following tables show the rates of dividend paid upon these various descriptions of stock:

| | Ordinary. | Guar. | Preference. |
|---|---|---|---|
| Nil (lines not completed) | £3,217,166 | £43,690 | £153,226 |
| Nil | 35,675,344 | nil. | 8,942,162 |
| Not exceeding 1 per cent. | 12,916,914 | nil. | 24,770 |
| 1 and not exceeding 2 | 4,296,158 | 101,180 | 5,478,233 |
| 2 and not exceeding 3 | 9,970,842 | 2,824,234 | 1,276,331 |
| 3 and not exceeding 4 | 26,864,038 | 18,930,686 | 21,294,732 |
| 4 and not exceeding 5 | 26,751,213 | 48,363,013 | 106,844,656 |
| 5 and not exceeding 6 | 70,210,846 | 7,319,251 | 3,128,530 |
| 6 and not exceeding 7 | 44,686,124 | 2,330,444 | 229,361 |
| 7 and not exceeding 8 | 21,050,549 | 680,570 | 297,500 |
| 8 and not exceeding 9 | 537,918 | nil. | 64,000 |
| 9 and not exceeding 10 | 885,326 | 184,603 | 229,840 |
| 10 and not exceeding 11 | 1,059,380 | 2,000 | nil. |
| 11 and not exceeding 12 | 3,857,065 | nil. | 165,000 |
| 12 and not exceeding 13 | 30,000 | nil. | nil. |

Of debenture loans and stocks, which form the first charges upon the tolls and profits of the railways, there are some which receive no dividend, and others which receive only a very moderate return, as will be seen from the subjoined figures:

| | Debenture Loans. | Debenture Stocks. |
|---|---|---|
| Receiving no interest | £8,000 | £864,566 |
| Not exceeding 1 per cent. | nil. | nil. |
| 1 and not exceeding 2 | 5,000 | 180,531 |
| 2 and not exceeding 3 | 5,562 | 561,855 |
| 3 and not exceeding 4 | 22,739,966 | 78,231,587 |
| 4 and not exceeding 5 | 9,569,937 | 52,734,684 |
| 5 and not exceeding 6 | 212,750 | 2,702,368 |
| 6 and not exceeding 7 | nil. | nil. |
| 7 and not exceeding 8 | 11,200 | 20,000 |

The year 1876 was generally considered one of great depression in business, but the receipts both from goods and passengers increased, and the amount of net revenue compares favorably with that of 1875. The following figures show the general results of the working of the past as compared with the previous year:

| | 1876. | 1875. |
|---|---|---|
| Number of passengers carried | 538,287,295 | 506,975,234 |
| Amount received | £26,163,551 | £25,714 681 |
| Goods traffic | 33,754,317 | 33,268,072 |
| Miscellaneous receipts | 2,297,907 | 2,254,247 |
| Total receipts from all sources | 62,215,775 | 61,237,000 |
| Working expenditure | 33,535,509 | 33,220,728 |
| Net receipts | 28,680,266 | 28,016,272 |
| Rate per cent. | 54 | 54 |
| Proportion of net receipts to paid up capital | 4.86 | 4.45 |
| Miles open | 16,872 | 16,658 |
| Cost per mile open | £39,012 | £37,883 |

### Extension of the Postal Union.

The Post Office Department gives notice that on and after Sept. 1, 1877, Persia, the Argentine Republic, Greenland, and the Danish Colonies of St. Thomas, St. Croix, and St. Jean become a part of the General Postal Union formed by the Treaty of Berne, subject to all the provisions of said treaty, and to an additional postal charge—except as hereinafter stated with respect to direct mails to St. Thomas, St. Croix, and St. Jean, and to correspondence for Persia forwarded by other routes than that via the Persian Gulf—to cover the expenses of sea transportation beyond the limits of the General Postal Union as originally formed by the Berne Treaty. The rates of postage are as follows: for prepaid letters, 10 cents per 15 grammes, (½ ounce;) for unpaid letters received, 15 cents per 15 grammes, (½ ounce;) for postal cards, 4 cents each; for newspapers, if not over 4 ounces in weight, 4 cents each; for books, other printed matter, patterns, &c., 4 cents per each weight of 2 ounces or fraction of 2 ounces; for the registration fee on all correspondence, 10 cents. The General Union rates of postage will be levied and collected in the United States on and after Sept. 1, 1877, on the prepaid correspondence received from the Danish Colonies of St. Thomas, St. Croix, and St. Jean, when the transportation is performed by direct steamers or other vessels, and on the prepaid correspondence sent to and the unpaid correspondence received from Persia forwarded by the routes using only the territory of the original Postal Union, viz: for prepaid letters, 5 cents per 15 grammes, (½ ounce;) for unpaid letters received, 10 cents per 15 grammes, (½ ounce); for postal cards 2 cents each; for newspapers, if not over 4 ounces in weight, 2 cents each; for books, other printed matter, patterns, merchandise, &c., 2 cents for each weight of 2 ounces or fraction thereof; for the registration fee on all correspondence, 10 cents.

### Imports of Dry Goods at New York.

The imports of foreign dry goods at New York for the month of July, were:

ENTERED FOR CONSUMPTION.

| | 1876. | 1877. |
|---|---|---|
| Manufactures of wool | $906,111 | $1,290,975 |
| " cotton | 725,846 | 1,107,272 |
| " silk | 1,123,050 | 1,477,785 |
| " flax | 445,570 | 598,069 |
| Miscellaneous dry goods | 294,702 | 311,252 |
| Total | $3,494,779 | $4,780,303 |

☞ The St. Louis, Fort Scott and Colorado Railroad Company was organized at Fort Scott, Arkansas, on the 2d inst., and thirteen directors chosen, six of whom are from St. Louis, headed by M. S. Carter, and seven from Kansas. Fort Scott and Humboldt were named as points on the proposed route. Energetic efforts will be at once inaugurated toward building the road. Work is to be commenced at once. The road is already graded between Fort Scott and Humboldt.

# RAILROAD AND CANAL DIVIDEND STATEMENT.

Showing the amount of Stock Outstanding, the Dividend Periods and the date of last Dividend.

### Strikes, and Foreign Competition.

Mr. Macdonald, M. P., has recently been addressing the miners and other bodies of workmen on the subject of Trades Unions. In one of his addresses to the miners of Hanley he stated that 'the fear of foreign competition was simply a bug bear invented by greedy employers to help them to grind down their workpeople." To this the *Mining Journal* replies with much vigor, and says that Mr. Macdonald either ignorantly or willfully perverts facts which should be patent to all, more especially to those who attempt to lead others. "Why," says this journal, "will Mr. Macdonald ignore official facts and figures convincing to other minds and repudiate evidence of an overwhelming character?

"Is it not a fact that England to-day is driven out of the markets of which she a few years ago possessed an almost complete monopoly? Is not Germany, and France, and America keenly competing with us in our iron and steel works, our iron hardwares, and many of our staple productions? No matter what the cause, the fact remains patent to all who are not persistently blind or willfully ignorant. Strikes, and the suicidal policy of the leaders of Trades Union, in insisting upon ever increasing wages, have produced in this country a state of things which it is unwise and impolitic to attempt to ignore or under-estimate. The demand for high wages and the refusal of the working classes to abate one jot or title of their fancied rights and privileges, have given immense advantages to the mechanics and artizans of other countries, which they have not been slow to avail themselves of, and foreign workmen now stand shoulder to shoulder with our best English mechanic and artizan in the production of articles in which we once held supreme away, and our merchants find it increasingly difficult to place English goods in foreign markets where only a few years since they were appreciated and sought after. Mr. Macdonald's asseveration that it is 'utterly impossible for America to touch us in the markets of the world,' simply stands for nothing in the face of stern facts and realities. Manufacturers and merchants know too well by painful experience that the United States are rapidly superseding us, not only in foreign markets, but in many of our own colonies, more especially in Australia and Canada. We say these facts are known, or should be known, by Mr. Macdonald, as a leader of the working classes, and he has a heavy and serious responsibility resting upon him in withholding these truths, and lulling our mechanics and artizans into a state of false security.

"A successful diagnosis of disease in the surest way to a remedy. Our staple trades are depressed and prostrate to an extent never before experienced in the commercial history of the present generation. Let us have a clear perception of the reason and we may hope for revival, although not perhaps complete recovery. We say already that strikes are at the bottom of our present trade depression and commercial stagnation? and we may say, notwithstanding the assertion of Macdonald, that England, as a manufacturing nation, cannot afford to treat foreign competition as a 'bugbear.' Strikes must in future be discountenanced, and our working classes must treat as stern facts and realities the severe competition of other nations in our manufactures and arts, and when all shall have learnt to disregard the voice of the charmer in the shape of the counsels of the Trade Unionists, and realize our true position as having determined rivals with whom to contend, then and then only, may we expect to find our trade and commerce once more firmly re-established."

☞ At a meeting of the stockholders of the Pittsburg, Wheeling and Kentucky Railroad Co. held at Wheeling, W. Va., on the 9th inst., the draft of the lease proposed to be made of the road to the Pittsburgh, Cincinnati and St. Louis Railway was submitted, approved and ordered to be executed The present President and Directors of the road were continued, viz: President C. D Hubbard, and Directors John McClure, H. H Lazear, William Thaw, M. Reilly and Thomas D. Messler.

☞ The receipts of the Midland Railway of Canada for the seven months ending July 31, 1877, were $140,095 17; for the same period of the previous year $146,348 14—a decrease of $6,252 97.

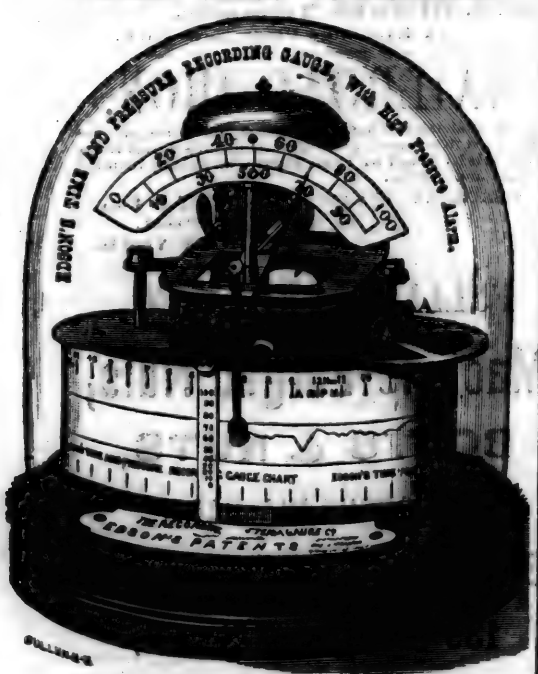
ALEX. FROTHINGHAM & CO., BANKERS AND Brokers, No. 12 Wall st., make for customers desirable investments of large or small amounts in stocks of a legitimate character, which frequently pay from five to twenty times the amount invested every thirty days.
Reliable stock privileges negotiated at favorable rates. Stocks bought and carried as long as desired on deposit of three to five per cent. Circulars and weekly reports sent 1y23*



### Dismal Swamp Canal.

A correspondent, writing from Norfolk, Va., says that the capital stock of the Dismal Swamp Canal amounts to $486 000. Of this amount the Government owns $200,000, or about two fifths of the whole stock. The State of Virginia held also $190,000 of the same stock, and individuals the remainder, $96,000. In 1854 a new company was chartered by the States of North Carolina and Virginia, under the name of the Albemarle and Chesapeake Canal Co., with a capital of one million five hundred thousand dollars. The stock was taken by citizens and an entire new canal built, uniting the waters of Chesapeake Bay with those of Albemarle Sound in North Carolina. In consequence of the trade being diverted from the Dismal Swamp Canal, it had not enough traffic to pay expenses, hence the State of Virginia sold its stock several years ago at public sale, realizing only about five per cent. on the investment. The company not being able to pay the interest on its mortgage bonds, the canal was advertised to be sold on the 9th inst. The sale has been postponed at the request of the Secretary of the Treasury, that Congress may take such action in the matter as they may deem expedient.

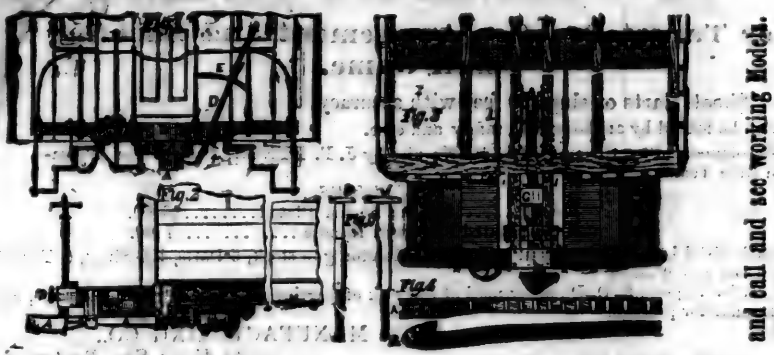
AND
**MECHANICS.**

THE COMPLETE PRACTICAL MACHINIST by Joshua Rose. Price, $2 50. Address JOSHUA ROSE, P. O. Box, 5546, New York City.

**Steam Office Watchman!!**



THIS GAUGE IS USED IN HOTELS, STEAMERS, Manufactories, Breweries, etc.

The Inventors of this combined "Pressure Gauge" and "High-Pressure Alarm" have, after many years of persistent effort and at great expense, succeeded in perfecting a reliable and accurate instrument for measuring either air, steam or water, when subjected to pressure, and for denoting the same by an automatically written tracing upon Edson's Patent Logs or "Charts." No manufacturer or steam user can afford to be without them. Circulars sent on application to

**M. B. EDSON, 91 Liberty St., N. Y.**

**MILLER'S TRUSSED PLATFORMS,**
**COMPRESSION BUFFERS & AUTOMATIC COUPLERS**
FOR RAILROAD PASSENGER CARS.

**OFFICE: 6 Park Place, New York.** **E. MILLER, Patentee.**

**CORYDON WINCH,**
**Manufacturer of RAILROAD, SHIP, BOAT & DOCK SPIKES.**

Rolling Mill and Factory, Canal Street, near Second and Laurel, Philadelphia.

**MISFIT CARPETS.**

English Brussels, Three-Ply and Ingrain, also, Stair Carpets, Velvet Rugs, Crumb Cloths, Oil Cloths, etc., very cheap at the Old Place,
**112 FULTON STREET, NEW YORK.**
Carpets carefully packed and sent to any part of the United States free of charge.
☛ Send for Explanatory Circular. **J. A. BENDALL.**

**EDWARD W. SERRELL,**
**CIVIL ENGINEER,**
78 & 80 BROADWAY,
NEW YORK CITY.
**Railroads, Bridges, Explorations.**
☞ Particular attention given to the Examination of Public Works for Capitalists seeking Investments.

**PATENTS,**
**T. D. STETSON,**
Solicitor of American and Foreign Patents.
**23 Murray Street, New York,**
(Near New Post Office.)
Send for circular.

**R. Stuart Willis,**
ATTORNEY & COUNSELOR AT LAW.
**NOTARY PUBLIC.**
**241 Broadway, New York.**
Special attention paid to Railroad, Mining and Manufacturing Interests.

**OFFICES TO LET,**
WITH ALL THE MODERN IMPROVEMENTS, SPLENDID LIGHT & VENTILATION, SUITABLE FOR
Banks, Bankers, Brokers, Merchants, Lawyers, Railway, Insurance, and other Companies,
IN BUILDINGS
38 39, 40, 42, 57, 64, 66, 69, 71, 73, 76 and 80

### "Puffing Billy."

The world may be said to have slept in the belief that locomotive engines could not drag trains along lines of rail until 1812. In that year the "Viewer" of the Wylam Colliery, was an ingenious man, named William Hedley. Wylam is distant from Newcastle-upon-Tyne, Eng., about eight miles, and lies close to the north bank of the river Tyne. The village, with few inhabitants and uninviting in appearance, may be considered the cradle of the locomotive. The year 1812 is memorable as one of Napoleon's retreat from Russia, when his great army perished in the snows—a terrible year of cold and distress, when wheat in England reached the highest point it had attained for a hundred years, and famine stared people in the face. It was at this time that Jonathan Forster, engineer of Wylam Colliery, relaid the wagon-way and conducted experiments under the superintendence of Mr. Blackett and William Hedley. The end and aim of these experiments was the substitution of steam for horse power on the wagon way. By 1813 the experiments had succeeded and a patent for a locomotive was taken out in Hedley's name dated March 13th, in that year. In this case as in many others before and since necessity proved to be the mother of invention, for owing to the scarcity of necessaries, the high price of fodder for cattle was a trouble that haunted the mind of William Hedley. All the coals from the Wylam Colliery were carried by a long tramway in trucks dragged by horses to the place of shipping; and Hedley knew well that unless something could be invented to supersede horses in the conveyance of the coals, it would be impossible to continue to work the tramway. He saw nothing before him but the prospect of closing the colliery, and of being cast with his wife and family on the world. In a state of despondency he retired to bed one night in the autumn of 1812; but it was not to find repose. Suddenly the idea flashed across his mind that if all the wheels of a moving carriage were connected, a tendency in any particular set of wheels to surge or revolve on their axes without moving forward might possibly be overcome by the remaining wheels. He determined to ascertain if this was the fact. On the following morning he ordered a frame and wheels to be made, and with the help of a clockmaker in Newcastle, completed his model. It was successful, and he had the satisfaction of seeing his notions realized within twenty-four hours; and eventually of inventing and building the first locomotive engine moving by the friction of the wheels upon the road. It was extremely slow in its movements, but it served his purpose, and above all *consumed neither hay nor oats*—wanted nothing, in short, but that coal in which the neighborhood abounds.

The original Wylam locomotive is now in the Patent Museum at South Kensington, London. A rude, old, weather-beaten, rusty machine of gigantic size and ponderous appearance; it was nevertheless in constant use at the Wylam Colliery from 1813, when it was constructed, until June, 1862, when it was removed to the honorable asylum in which it now finally rests from its labor. At Wylam it was called by the country people "Puffing Billy," from the great noise it made, and it never received any other name. The career of "Puffing Billy" had almost come to a premature close, while its owner narrowly escaped a lawsuit in his defence. The perpetual puffing and snorting along the road was voted a nuisance; landlords complained, and great lawyers were appealed to, on legal cases solemnly drawn up. But "Puffing Billy" was too good a friend to Newcastle folks to be allowed to be put down. The colliery went on, William Hedley retained his employment, remained at Wylam for many years, and died in 1842.

It was at Wylam that George Stephenson's father worked as engineman for seven or eight years, and where George was born, on June 9, 1781.

### Steam on Brooklyn Street Railways.

A trial trip of the new steam passenger car which is to be run, with several others of like character, on the Third Avenue Railroad in Brooklyn, between Twenty-fifth Street and Fort Hamilton took place on the 21st inst. It is the property of the Brooklyn City Railroad Company, and is similar in construction to those in use on Market Street, Philadelphia. The trip from the ferry to the city line was made in 33 minutes, being five minutes less than the time usually occupied by the horse cars. The engine made no noise and was quickly stopped; it was found to run easy, and there was no difficulty experienced in rounding curves, or in ascending the heaviest grades; it made little or no smoke, and did not frighten the horses along the route. The car weighs 15,900 pounds, is three feet longer than the ordinary street car, and will comfortably seat 26 persons. The boiler is under the front platform, and the machinery is under the car. At the end of the car is a large mirror, at each side of which are

two narrow windows. Between these windows and within easy reach are small knobs, around which are printed the words: "To stop the car, touch the knob." When the knob is pressed a bell over the rear platform notifies the conductor that a passenger wishes to alight. A speaking tube also runs from the rear to the front platform, and through this the conductor and engineer can communicate with each other. It is expected that four other motors will be finished and ready for use in a week or ten days, by which time the officers of the road expect to formally introduce steam travel between Fulton Ferry and Greenwood. The roadbed is being put in perfect order.

### Incombustible Mineral Wool.

During the exhibition held by the American Institute, of this city, in 1875, the article termed incombustible mineral wool received much attention from those interested in that class of non-conductors adapted for engineering and mechanical purposes. Since then it has been demonstrated, by means of tests, experiments and extensive practical application, that this remarkable substance is of great value as a non conducting material for protection against fire, and prevention of radiation of heat. This material differs from all others commonly used for the purpose named, and has no resemblance whatever to them. It is made by blowing steam or air through molten scoriaceous substances, such as the slag of blast-furnaces, which are thereby converted into fine fibres intermixed with globules or shot, formed by the rapid cooling of the particles. The slag consists chiefly of silica, lime, magnesia and alumina, and the percentage of iron in it seldom reaches one-half of one per cent. The wool made from it, therefore, consists practically of the best non-conducting mineral substances worked into a woolly or fibrous mass, which has the essential requisite of a good non-conductor or insulator of heat, cold and sound, viz: Air confined in a finely sub-divided state. Mineral wool shares this last named characteristic with the well known organic non-conductors, such as cotton felting, hair, charcoal, sawdust, shavings, etc., but has the paramount advantage that it can neither rot nor burn, and that it is indifferent to atmospheric influences. At the Franklin Institute, Philadelphia, mineral wool was tested by the Committee on Science and the Arts (see Report No. 861, Philadelphia, April 15th, 1872), and found to be over 10 per cent better than felting as a non-conductor of heat. These tests were made on the first experimental productions, and the mineral wool—as now made—is much superior in quality.

The uses to which this material is now applied, here and abroad, are very numerous. In the large English cities and towns, as London, Liverpool, Manchester, Leeds, Hull, Newcastle-on-Tyne, and other manufacturing localities and seaports, where it is sold under the name of silicate cotton, it is extensively employed on board steamships, on boilers, steam pipes in manufactories, etc., to prevent radiation of heat; it is also advantageously used to prevent freezing in water pipes, cisterns, tanks and hydrants to prevent cooling and condensation; to arrest the spread of fire; to deafen walls and floors in dwelling houses; to line ice-boxes, refrigerators, cold storage houses, etc.

Over one hundred and fifty firms in this country have already used mineral wool. The smaller quantities are taken by manufacturing companies, for covering steam boilers and pipes, say from 250 to 10,000 pounds each—whereas the beer-brewing interest is represented by such large orders as 215,000 pounds, 176,000 pounds, etc. It must be remembered that the whole process of fermenting and storing lager beer has to be performed at a temperature not exceeding 45° Fah., and that the large breweries have store rooms for from 10,000 to 20,000 barrels capacity, which require several thousand tons of ice to keep the temperature at the required limit. The cold storage houses of lager beer breweries are therefore practically large refrigerators, and instead of lining them, as heretofore, with from 15 to 30 inches of sawdust, shavings or ashes, they are now lined with 3 inches of mineral wool, which proves to be as good a non conductor, or better, than the bulky linings before mentioned, and saves considerable space.

The U. S. patents for the methods of making Mineral Wool and for its applications as herein described are controlled by Alexander D. Elbers, No. 26½ Broadway, N. Y., who is also the patentee of several improvements in the manufacture of mineral wool and of mineral wool feltings, which have been patented by him in this country, in England and on the Continent of Europe. At present mineral wool is made here only by R. D. A. Parrott, at the Greenwood Iron Works, Orange Co., N. Y., near Turner's station, on the Erie Railway, where about one million pounds of it have been made within 18 months past; but there is no doubt that as the practical value of this material becomes better known, the rapidly increasing demand for it will soon necessitate its manufacture in every State of the Union.

In the depressed state of our iron industry the utilization of a waste material, which thereby may yield a handsome revenue, should receive special attention from our blast furnace owners, among whom may be found some of our most energetic and representative business men.

### Practical Talks on Mechanical Reform.

Have employers any right to use machinery which is out of repair and dangerous? This will appear to some a superfluous question, and of course intelligence answers in the negative, but observation discovers that steam machinery on land, in steam boats and ocean steamers is allowed to be in operation when repairs are needed. The reason frequently assigned for this state of things is, that there is no time for repairs. Mills must be kept running to fill orders, and steamers must run on time at the risk of the machinery breaking down entirely. We will grant that such cases are important and that the pressure of circumstances is sometimes embarrassing, but there are nevertheless few cases where, if proper preparation and despatch were used, machinery could be overhauled and put in a proper condition.

The practice is to look to the engineer or attendant for repairs. If a rod thumps, he is expected to know how to adjust it and "do it during meal hour" or "after working hours." A competent and careful engineer will do this for his own reputation's sake, an ignoramus will neglect it or botch it, and a new difficulty will either arise or former matters get worse. Hence another reason for the employment of competent engineers. They save their employers hundreds of dollars in a year; they become familiar with the machinery, get interested in it, take a pride in keeping it clean and in good working order, and will work after "working hours" without extra compensation rather than let the machinery in their charge look slovenly or get out of good condition. And just here let us say that unless special agreement has been made between employer and engineer as to compensation, so much money for services rendered without extra compensation for what is termed "over time," no engineer should be allowed to perform duty during meal hours or at night without compensation. This is right, this is justice. If a man finds it necessary to work on the engine or other machinery attached to it at these times, in order to keep things all right, thereby saving his employer trouble and expense, he most certainly can demand compensation and should receive it unless, as we said before, a special arrangement specified no compensation to be paid for extra services. There is a spirit of meanness sometimes displayed that is contemptible, where wealthy manufacturers or employers refuse to pay their engineers for extra services. We heard recently of a man who had charge of engine, boiler, shafting, etc., who on account of the condition of the machinery had frequently to work at nights so as to be able to "start up" in the morning at the regular work hour, and who said that if he did not do this he might as well throw up his job, but he did not get allowed one cent for his extra labor and trouble; and this man's wages were under $15 per week. We say this is contemptible, because the employer is taking advantage of the man's circumstances—who would of course rather do this than be thrown out of employment and impoverish his family. But to return to the matter of repairs. If proper foresight and preparation in the furnishing of materials and necessaries have been made, and a sufficient number of hands are engaged to go promptly to work at the proper time, boilers and engines and other machinery can frequently, not always, be repaired in a few hours. And again it appears that a competent engineer, knowing the absolute need of repairs, will plan, prepare and get ready all contrivances and disposition of work, so that they will be done in the best manner and with the greatest despatch.

There is seldom any excuse and should be none for allowing steam machinery to be out of repair and in a dangerous condition. It is the spirit of running a risk for the sake of saving expenditure which we condemn. It is competency of attendants, careful and constant supervision on the part of employers and su-

perintendents, and the adoption of all reliable means for the prevention of explosion and accident that we advocate.

### Portland and Ogdensburg Railroad.

At the meeting of the stockholders of the Portland and Ogdensburg Railroad (Vermont division) held at Hyde Park, Vt., on the 14th inst., the following gentlemen were elected directors: Franklin Fairbanks, J. D. Bell, J. H. George, A. A. Bell, George W. Hendee, Waldo Brigham, Orange Buck, R. S. Read, D. D. Wead, O. S. Rixford and A. B. Jewett. About 40,000 shares of stock were represented, and the election was unanimous. Great enthusiasm prevailed at the completion of the project. Short speeches were made by Governor Hendee, Colonel Fairbanks, President Brigham and others, and the utmost good feeling prevailed. The directors elected Waldo Brigham President, John H. George Clerk, and D. D. Wead Treasurer.

☞ At a meeting of the bondholders and shareholders of the Erie Railway Company, held in London on the 20th inst., Sir Edward Watkins presiding, a resolution was adopted authorizing the laying down of a third rail between Binghamton and Waverly.

### Chicago and Northwestern Railway.

The earnings of this road for the years ending May 31, 1876 and 1877, were as follows:

| | 1875-'6. | 1876-'7. |
|---|---|---|
| From passengers | $3,145,749 63 | $3,018,622 79 |
| " freight | 9,001,177 95 | 8,261,583 72 |
| " express | 262,253 83 | 246,908 36 |
| " mails | 289,182 98 | 284,792 38 |
| " miscellaneous | 75,346 96 | 65,592 78 |
| | $12,773,711 35 | $11,877,500 03 |
| Expenses, viz: | | |
| Repairs of engines | $533,747 21 | $437,547 42 |
| " cars | 636,934 83 | 517,335 25 |
| " buildings | 132,918 09 | 91,296 63 |
| " fences, etc | 61,753 73 | 63,377 20 |

| | | $2,990,620 16 |
| And deduct their charges, viz: | | |
| Interest on bonds and premium on gold | $933,973 03 | |
| Operating expenses | 937,093 06 | |
| Taxes | 41,327 80 | |
| | | 1,912,393 89 |
| Leaving net income for the whole system | | $1,078,226 27 |
| Dividend of 2½ per cent on preferred stock Dec. 22, 1876 | | 536,810 00 |
| Leaving a balance of | | $541,416 27 |
| Add balance to credit of income May 31, 1876 | | 3,817,329 53 |
| Balance of income account May 31, 1877 | | $4,358,745 80 |

It will be observed that the profits of the Chicago and Northwestern Railway proper, after payment of operating expenses, taxes, rentals, interest on bonds, including interest on the outstanding general consolidated gold bonds, and all other items, amounted to $1,835,018 23; this amount is debited with the deficit incurred in the operations of the proprietary lines which was $756,791 96—leaving a clear profit for the united system of $1,078,226 27, equal to five per cent on the preferred stock.

The aggregate gross earnings of all the roads amounted to $13,033,101 96; and the operating expenses, interest on bonds, taxes and total charges, to $11,954,875 69—leaving net for the whole system, as stated above, $1,078,226 27, against $1,179,716 89 for the preceding year, a decrease of $101,490 62.

There was a decrease in gross earnings of $980,680 01, and a decrease in operating expenses, interest, etc., of $879,139 39, making the decrease in net earnings, as above, $101,490 62.

Of the entire decrease in gross earnings, $896,211 32 was upon the Chicago and Northwestern Railway, and $84,118 69 upon the proprietary lines.

The per centage of operating expenses, taxes, etc., to gross earnings was 58 per cent for the Chicago and Northwestern, and 59.04 for the combined property for the fiscal years 1875-'76; while for the last year, with its decreased revenue, they were 55.13 and 57.75 per cent respectively.

The miles of road embraced in the operations of the Chicago and Northwestern Railway proper, inclusive of 1.20 mile laid during the year in an extension to the Bessemer mine, are 1,502.10; and the miles of proprietary roads, 491.18—total, 1,993.28 miles.

The equipment of the whole road, (1,993.28 miles) on the 31st of May, 1877, consisted of 342 locomotives, and 8,252 cars, viz: 2 parlor cars, 142 first-class and 29 second-class passenger cars, 65 baggage and express cars, 15 mail cars, 140 caboose and way cars, 4 paymasters', directors', officers', and business cars, 18 boarding cars, 4,273 box freight, 1,025 platform, 504 stock, 26 dump, 1,957 iron ore, 40 ditching, and 12 pile driving, wrecking, etc., cars. And of the Winona and St. Peter Railroad, 27 locomotives, and 1,087 cars as follows: 7 first-class passenger, 2 baggage, mail and express, 2 caboose, 893 box freight, and 183 platform cars. Total number of engines, 369; total number of cars, 9,289.

The number of miles run by locomotives on the whole road for the fiscal year ending May 31, 1877, were: passenger, 2,682,981; freight, 4,427,695; wood train, 59,899; gravel train, 595,447; switch, 1,915,172—total, 9,631,104, against 9,921,155 for the preceding year—a decrease of 290,011, or 2.92 per cent. Cost per mile run, 22.12 cents.

Number of miles run by passenger trains, 2,682,981; average distance run by each passenger train, 98.77 miles; average number of passengers carried on each passenger train per mile run, 44.40; average number of miles each passenger was carried, 84.92.

Number of miles run by freight trains, including switching, 6,342,777; average distance run by each freight train, 195.90 miles; average number of tons of freight hauled in each freight train per mile run, 76.52; average number of miles each ton of freight was carried, 142.19.

Average earnings per mile run: by passenger trains, $1 53; by freight and switching, $1 42; by passenger and freight trains, $1 45. Average cost of running above trains one mile, including taxes, 88.85 cents. Average net earnings on each mile run by above trains, 61.35 cents.

The gross earnings per mile upon the Chicago and Northwestern Railway (1,502.10 miles) were $7,907 26; the operating expenses and taxes, $4,359 02—and the net earnings, $3,548 24.

The gross earnings per mile for the entire system (1,993.28 miles) were $6,688 52; the operating expenses and taxes, $3,775 74—and the net earnings, $2,762 78.

The total number of passengers carried was 3,347,853, a decrease of 159,290, or 5.08 per cent, from the movement of the preceding year; and the number carried one mile was 116,902,435, a decrease of 4.40 per cent. The average rate per passenger per mile was 2.89 cents, the average distance traveled by each passenger 34.92 miles, and the average rate received from each passenger $1 00.91, being an increase of 2.17 per cent.

The aggregate quantity of freight transported on all the lines was 3,413,398 tons, a decrease of

58,529 tons, or 1.69 per cent. The total number of tons carried one mile was 485,357,900, a decrease of 17,774,488 tons, or 3.53 per cent. The average rate received per ton per mile was 1.86 cent, against 1.95 cent in the preceding year, the average number of miles each ton of freight was hauled was 142.19, against 144.19 for the preceding year, and the average rate received for each ton of freight carried $2 64, against $2 43 the preceding year, a loss of 6.71 per cent. The small reduction in the rate per ton per mile, applied to the whole movement of freight, as compared with the average rate of the previous year, makes a difference of $459,200 48 against the revenue of the company.

The total charges on the entire railway has been reduced from $12,834,015 08 in the preceding year to $11,954,875 69 in the last year, a saving to the company of $879,139 39, notwithstanding there has been an increase of $54,539 47 in the total charges paid for proprietary roads.

The operating expenses upon the Chicago and Northwestern Railway proper for five years previous to the last fiscal year averaged $7,551,059 99 per year, and for the last fiscal year they were $6,230,088 23, being a decrease of $1,314,371 76 below such average.

The gross earnings of the proprietary roads were $1,155,601 93, against $1,240,020 62 in the previous year, a decrease of $84,418 69. The expenses were $1,912,398 89, against $1,857,854 42, an increase, as stated above, of $54,539 47.

Two parlor cars and 50 stock cars were added to the equipment during the year, and the amount expended for these additions and the Westinghouse brake, etc., was $61,522 81. The principal renewals were the rebuilding of 7 first class and 3 second class passenger cars, 2 baggage, 22 box, 2 stock, 64 platform and 15 caboose cars, besides the fitting and renewal of 7,038 car wheels and axles, at a total cost of $167,286 67.

Nine locomotives were rebuilt, 5 of which were reconstructed for the burning of coal, and 149 were taken up and put in thorough order, besides the usual repairs, etc., of engines in service.

During the year 151.73 miles of steel track were laid, making 591.93 miles in use on the 31st of May last; this will be increased to about 750 miles during the present year.

The amount of track renewed with steel and iron rails on the Chicago and Northwestern Railway proper was upwards of 186 miles; and 720,195 cross ties, equaling 257.21 miles of road, were laid down. A corresponding supply of fish plates, nuts, bolts, and spikes were consumed in these renewals.

The expenditure for construction purposes during the year was $665,801 85, of which amount $482,723 81 was for the Chicago and Northwestern Railway proper, and $183,079 04 for the proprietary roads. The total expenditure for construction and equipment purposes was $727,824 66. The report says:

A branch road of about 25 miles, called the Menominee River Railroad, is constructing from a point on our line 22 miles west of Escanaba, to open up this new mining region. This branch will be equipped with the ore equipment of this company, and operated in its interest.

A lateral road is being constructed as a branch of our Cedar Rapids and Missouri River leased railroad in Iowa, by and at the expense of the parties interested in the latter road. This branch, called the Maple River Railroad, connects with our main line at a point about five miles west of Carroll station, and extends northwesterly to the valley of the Maple River, in Ida County; thence through that valley, southwesterly, to a point at or near Mapleton, in Monona County, a distance of about 60 miles. The road is far progressed, and expected to be completed to the Maple Valley by the ensuing fall. Arrangements have been made with our company to lease and operate it as a branch of the leased main line, and upon a similar scale of rental, based on earnings, but with limitations that the minimum rent shall not fall below $400 per mile per annum, not exceed the maximum of $1,350 per mile per annum, however much its earnings. This road will open some of the best and most fertile portions of Western Iowa, and become a feeder to 400 miles of the present main line to Chicago.

By a mutually advantageous agreement with the Green Bay and Minnesota Railway Company in Wisconsin, to whom we have given contracts for the joint use of our track on the La Crosse, Trempeleau and Prescott Railroad, we have secured a permanent arrangement of a reciprocal nature, for the joint use of their branch, extending from Onalaska, on the La Crosse, Trempeleau and Prescott Railroad toto the City of La Crosse.

The latter road and our Madison Extension were formerly about three miles away from La Crosse at their point of junction, and were precluded from sharing any portion of its business. This difficulty is now overcome by a reciprocal contract for the right of trackage, without any expenditure of capital by this company for the object.

GENERAL BALANCE SHEET, May 31, 1877.

| | | |
|---|---|---|
| Old construction: | | |
| Cost of consolidated road, equipment and property | | $39,658,019 76 |
| New construction since June 1, 1864: | | |

President.—ALBERT KEEP.

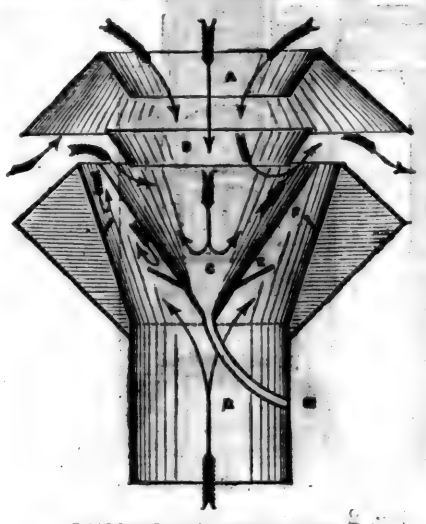
Vice Pres't, Sec'y & Treas.—M. L. SYKES, JR.

Directors.—A. G. Dulman, Harvey Kennedy, David Dows, R. P. Flower, Samuel M. Mills, M. L. Sykes, Jr., John Bloodgood, Jay Gould, Sidney Dillon, John M. Burke, New York; Wm. L. Scott, Erie; Albert Keep, Henry H. Porter, Wm. H. Ferry, Marvin Hughitt, Chicago; James H. Howe, Kenosha, Wis.; J. L. Ten Have Pzn, Amsterdam, Holland.

Ass't Sec'y & Ass't Treasurer.—S. O. HOWE.

Gen'l Manager and Gen'l Sup't.—M. HUGHITT.

Ass't Gen'l Sup't.—C. C. WHEELER.



☞ The proposed extension of the St. Croix and Penobscot Railroad from Princeton to Passaquumkeag was voted upon by the citizens of Calais, Me., on the 12th inst., resulting in almost a unanimous vote for the extension. The vote

was 929 yeas to 60 nays. The amount of aid voted for from the city was $90,000 to be paid when the road is completed.

☞ The Philadelphia and Reading Railroad Company announces a dividend of one dollar and forty cents per share on the preferred stock and seventy cents per share on the common stock of the Schuylkill Navigation Company, payable in Reading Railroad scrip August 22. This scrip is dated July 1, 1877, bears 6 per cent interest, and is payable in five years. These payments are to settle the dividends on these stocks until July 1, 1878.

### Ventilation of Railway Cars.

The present system of so called ventilation of passenger cars is annoying and absurd while it is extravagant in cost and detrimental to health. It is annoying because it so profusely covers the passengers with dust and cinders, clogging the throat, blistering the eyes and ruining the clothes. It is absurd in that ventilation is not accomplished, extravagant in cost in that it utterly wastes three-fourths of the fuel used in winter, and detrimental to health because the vitiated and cold air is carefully retained at the bottom of the car, while the fresh air coming into the car naturally rushes direct to the stoves or heating apparatus to supply the place of the heated air that is continually rising to and passing out the large traps which the present system provides all along both sides of the car, leaving the passengers to suffer with cold and carbonic acid

RAILROAD CAR VENTILATOR.

gas, unless near enough to roast by the heating surface. Now a little common sense would avoid all this trouble and annoyance. If the cars were built so as to have pipes between the casing and lining, or even in the inside leading from register face plates at the bottom of the sides up to ventilators placed on top of the cars like the one illustrated herewith called Abbott's Patent, then every wind which blows across it, and the rush of air caused by the headway of the car would produce a suction which would draw off the heavy cold air and gases from the bottom of the car. Then dispense with the large trap holes at the top and retain the heated air from the stoves to make comfortable every part of the carriage, and do it to with far less coal than is now used and wasted. For summer use, registers could be placed in said pipes near the top of the car which with the aid of the ventilators would draw off the heated air and leave the car cool and much more comfortable than now and yet prevent the influx of the cinders and dust. The cut will show the sectional construction of this ventilator—the arrows indicating the direction of the currents—a continuous upward flow in the pipe D, notwithstanding the rush from almost every direction above. These ventilators are manufactured by Messrs. West & Cannon at 40 Cortlandt Street, this city, and we have seen their operation and strongly commend them to the public.

### New Machine Shop.

A small but neat machine shop has recently been fitted up by John Hartrick & Co., at No. 47 Gold Street, in this city. The advantages of having a machine shop in that locality are obvious. There are great quantities of machinery in the neighborhood, which of course need at times more or less repairs; there are pattern makers and model makers whose business frequently requires the aids found in a machine shop supplied with lathes, planers, drilling machines, vises, etc.; there are inventors who wish to have their machines built in the centre of the city and who wish to avoid crossing to Brooklyn or Jersey City, or going two or three miles "up town," whenever they wish to have work done; and again this machine shop is well adapted for the construction of small engines and light machinery. The Messrs. John Hartrick & Co., have had experience in designing and constructing machinery; they are mechanics of great ability, not only in their designs of iron work, but as practical workmen who understand how to turn out strong and well finished work. To those about putting into the market new machines of a light character, as small steam engines, tools, pumps, presses, sewing machines, or models of machinery for the Patent Office and exhibitions, we commend the practical experience and good facilities now offered in this new enterprise.

### The Rider Compression Engine.

For railroads, city and suburban residences, French flats, hotels, etc., the engine represented here is highly serviceable. The engine itself is of the plainest, most simple and inexpensive character, well adapted as a pumping engine and suitable wherever small power is required. It is in operation on the Maine Central; Kansas City, St. Joseph and Council Bluffs; Chicago, Rock Island and Pacific; Atlantic, Mississippi and Ohio; New Jersey Southern and other railroads, and has proved itself a safe, reliable and economical motor. We can recommend it from personal observation and the expression of educated engineers, who have spoken highly of it in our hearing. The *London Railway Record* in speaking of it says: "It meets all former difficulties, and at the same time supplies what may be called a domestic servant. Inexpensive in the outlay and highly economical in the working." The *London Times* also says: "In this new Caloric Engine (Rider Compression Engine) the difficulties encountered by many eminent inventors are successfully overcome. Light the fire, and this little wonder of one-fourth to 2 horse power begins to work immediately, driving a chaff cutter or a printing machine, or pumping water 100 feet high. The working parts show the utmost simplicity of arrangement, and for a small power, the consumption of coal is not heavy."

The motion of this motor is produced by the use of highly compressed cold air. This is heated thoroughly without change of volume, and its efficient expansion to a point at or below the pressure of the atmosphere utilizes all the force or mechanical effect possible. All these changes are consecutively and rapidly effected in this motor without the use of valves, springs, levels, or, in fact, any delicate parts whatever, the moving parts being reduced to the lowest possible number, namely, the pistons, shaft and connections. As may be seen by the annexed sectional engraving, Fig. 2, the engine consists essentially of a compression cylinder, A, and a power cylinder, B, with their respective pistons, C D, and connections, and a regenerator, H. The lower portion of the compression cylinder, A, is kept cold by a current of water which circulates through the cooler, E, which surrounds the lower portion of the cylinder, while the lower portion of the power cylinder is kept hot by the action of the fire below the heater, F. The heating and also the cooling of the air is instantaneously effected by its alternate presentation to the surfaces of the heater and cooler in a thin annular sheet.

The compression piston, C, extends downward to the base of the engine, and is a trifle smaller than the interior of the cooler, E, thus leaving a thin space on all sides for the air to pass downward and become thoroughly cooled on its way to the bottom, and through which space it flows on its way back to the heater. The power piston, D, likewise extends downward into the heater, F, which presents to the action of the fire a narrow annulus all round the bottom. Within this heater is the telescope, G, which is a thin iron cylinder about one-fourth of an inch less in diameter than the interior of the heater. It is fitted to the interior of the power cylinder, and extends nearly to the bottom of the heater. Its office is to cause the air which flows from the compression cylinder to be presented in a thin sheet all round the interior surface of the heater, and particularly at the lower and hotter portion. By this means the air is thoroughly and rapidly heated.

The same air is used continuously, as there is neither influx nor escape, the air being merely shifted from one cylinder to the other. Between the compression and power cylinders is

situated the regenerator, H, composed of a number of thin plates slightly thickened at their edges, which, while affording a free passage to the air, subdivides it into thin sheets. It is so placed between the cylinders as to be traversed by the air in its passage each way between the hot and cold cylinders.

The other portions of the engine are readily understood on inspection of the engraving. The two pistons are attached directly to the cranks, I I, by simple connecting rods, J J, and all the movements of the various parts are uniform, being solely derived from regular, circular, and rectilinear motion; and as there is an entire absence of all complicated parts and the irregular intermittent impulses which characterize caloric engines, a high rate of speed and smooth action may be safely and easily obtained. K K are the packings, which are in duplicate for each cylinder. The lower one has its lap downward to resist the escape of air below the piston, while the upper one has its lap upward to prevent the lubricating material from entering too freely into the cylinder. Between them is a patent relief ring to relieve the friction of the packings. L is a simple check-valve which supplies any light leakage of air which may occur.

The operation of the engine is briefly as follows: The compression piston, C, first compresses the cold air in the lower part of the compression cylinder, A, into about one-third its normal volume, when, by the advancing on upward motion of the power piston, D, and the completion of the down stroke of the compression piston, C, the air is transferred from the

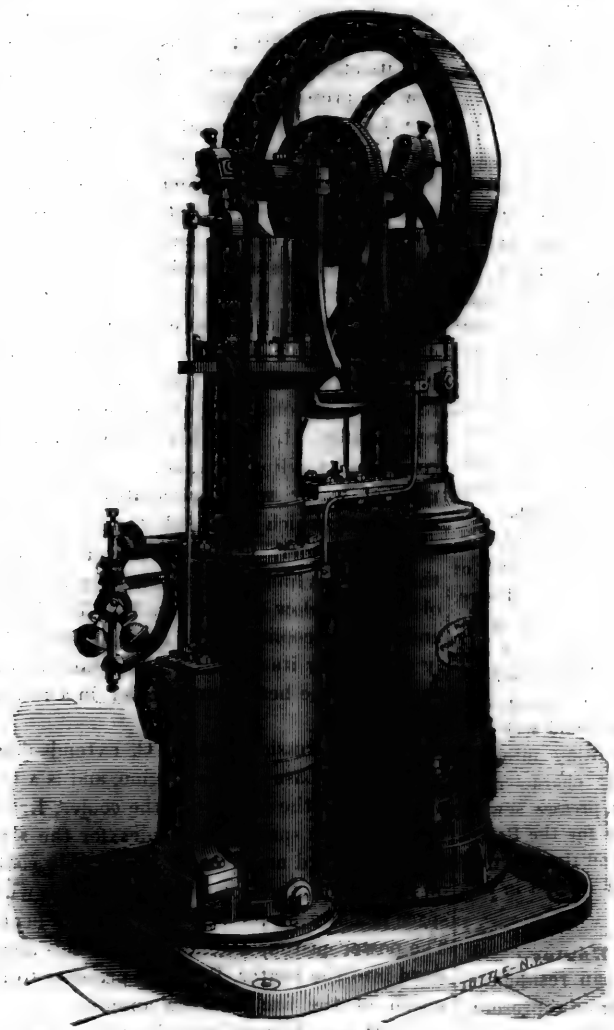


Fig. 1.

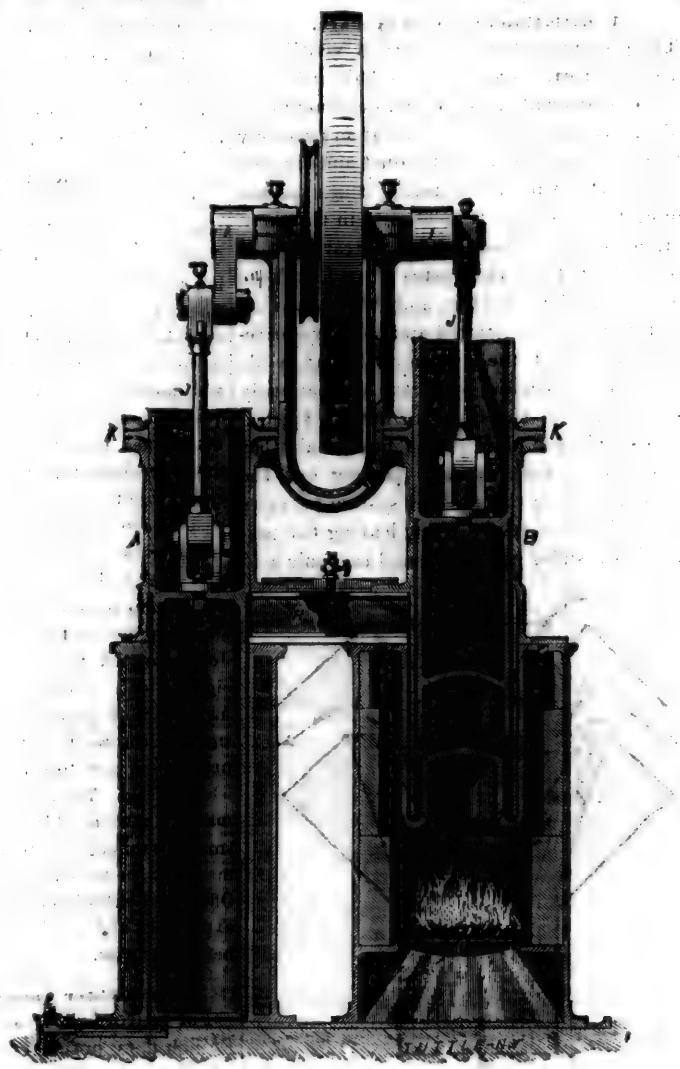

Fig. 2

compression cylinder, A, through the regenerator, H, and into the heater, F, without appreciable change of volume. The result is a great increase of pressure corresponding to the increase of temperature, and this impels the power piston, D, up to the end of its stroke. The pressure still remaining in the power cylinder, and reacting on the compression piston, C, forces the latter upward till it reaches nearly to the top of its stroke, when, by the cooling of the charge of air, the pressure falls to its minimum, the power piston descends, and the compression again begins. In the meantime the heated air, in passing through the regenerator has left the greater portion of its heat in the regenerator plates, to be picked up and utilized on the return of the air toward the heater.

The motors are valveless, noiseless, simple, and claimed to be absolutely safe; emit no heated air or unpleasant oder, as is the case with caloric engines; require no steam, cannot explode, do not increase risk of fire or cost of insurance, and can be operated by any one who can manage an ordinary stove.

One of these little six inch pumping engines (household size) has, we are informed, pumped for 6 months, without intermission or stoppage from derangement, each consecutive day of ten hours, 10,000 gallons of water to a height of from 70 to 100 feet; and the engine required the services of an attendant less than thirty minutes each day, and consumed only 20 lbs. of coal per day, thus pumping 2,000 gallons of water 100 feet high at a cost of only one cent.

As may be seen by Fig. 1, the pump is placed on the side of the cooler, and worked directly from the compression piston. All the water is passed directly through the cooler on its way to the tank or outlet.

For further information, address Cammeyer & Sayer, 93 Liberty Street, New York City, where the engine may be seen in operation.

# American Railroad Journal.

**Saturday, August 25, 1877.**

## Financial and Commercial Affairs.

More activity has been noted in Money, due, in good part, to the more vigorous preparations now in progress here and in the interior for the Fall trade, to which operators generally look forward very hopefully; but in part also to the more extensive movement at the Stock Exchange, chiefly speculative, which has quickened materially the inquiry for temporary accommodation, in the financial line, and served to strengthen rates. Call loans have been quoted here at the close at 2@5, with most of the important negotiations reported on the basis of 2½@3 per cent; and very choice to prime mercantile credits are rated at 4½@7, mainly 5@6 per cent per annum. The City banks, last week, reported a decrease in their specie reserve and circulation, as also in their legal tender board, and in the average of loans and discounts, and of the deposits. The loan and discount average shows a reduction of $1,480,900, and the item of circulation of $148,600. The average of deposits was diminished $2 017,000. The legal tender reserve was reduced $898,800; and the specie average $1,581,000.

The City banks reported their average of gold last week at $18,449,700, as against $19,873,400 same date last year; and their greenback average at $52,696,000, as against $57,584,300 on Aug. 19, 1876. Their deposits stood at $213,414,600, against $226,000,600 same time in 1876. The loan item was $248,896,300 against $253,839,400 a year ago.

The City bank net reserve of specie and legal

tender notes now shows an excess over the legal requirement of reserve to liabilities of $12,792,050, as against $14,267,600 the preceding week, $9,039,775 the week ending 14th April (the lowest footing of this item thus far in the current year,) and $24,781,800 on January 27 (which latter was the highest aggregate reached this year.) The City bank exchanges in currency reached $344,757,974, or a daily average of $57,459,662.

The U. S. Sub-Treasury in this city closed the week ending on Wednesday with a currency balance of $50,414,889, against $50,326,818 the preceding Wednesday; and a coin board of $83,654,575, against $82,590,698 on the return of a week earlier. The Customs revenue of the port during the past week was $2,240,000.

The aggregate of the outstanding U. S. currency of all denominations, August 1st, was $379,334,725. The outstanding amount of legal tender notes is $359,094,220. The National bank circulation is now $314,988,170 of currency notes and $1,425,770 of national gold bank notes.

National Bank notes received at the Treasury Department in July for redemption were to the amount of $4,251,000.

The income of the Government from internal revenues last week was about two millions, and during the fiscal year ending June 30, 1877, $118,438,279, against $116,700,782 in the preceding fiscal year; and from Customs last week about three millions, and in the last fiscal year $130,439,419, against $148,071,985 in the preceding fiscal year.

On Wednesday of this week the cash balances of the Treasury Department at Washington were: of Currency, $11,760,668; special deposit of legal tenders for the redemption of certificates of deposit, $59,585,000; Coin, $102,961,360, including of Coin certificates, $38,996,500.

Gold has been offered more freely, in good part on speculative account, and has receded in price, on a moderately active business. The customs call has been moderate for the season and the export drain light. An early revival of imports of specie from Europe is confidently looked for. The extremes of the price during the week have been 104⅞@105⅜, closing at 104⅛, as against 105⅜ on Wednesday of the preceding week. The lowest point yet touched by gold was 104¼, on Friday, March 2d. The specie outflow last week was only $226,555, making the total exports of specie hence since January 1, $21,853,461, against $39,058,742 the same time in the preceding year. The imports of specie at this port last week were $350,141, and since January 1st have been $8,099,252, as against $3,120,001 same time last year. The Customs demand for gold last week averaged $378,384 per day. Foreign Exchange has been depressed, and quoted generally lower, closing heavily on a restricted inquiry. Bankers' sixty day bills on London closed on Wednesday at $4 82@$4 83; sight bills on London at $4 84@$4 85 to the £ sterling. The week's imports of Dry Goods and general merchandise were to the specie value of $7,275,817 as against $5,179,595 the corresponding week of 1876. The week's import entries of Foreign Merchandise at New York included $2,208,425 of Dry Goods, and $5,071,892 of General Merchandise. The week's export of Domestic Produce and Miscellaneous Goods from this port were $5,781,979, against $5,163,182 same week in 1876.

Government securities have been in generally fair demand during the week, chiefly on home investment account, but have been variable in price as influenced mainly by the course of Gold. At the close the market was quoted steady, leaving off on Wednesday as follows:

United States currency sixes, 124; do. 6s, 1881, registered, 110¾@110⅞; do. coupon 111¾@112; do. 1865, new, registered, 106¼@106⅛; do. coupon, 106¼@106⅛; do. 1867, registered, 108⅜@108½; do. coupon, 108½@108⅝; do. 1868, registered, 110¾; do. coupon, 110⅞; do. ten-forties registered, 108¾@108⅞; do. coupon, 112¼@112½; do. five per cents 1881, registered, 109⅛@109¼; do. coupon, 109⅛@109¼; do. 4½ per cents, 1891, registered, 107@107⅛; do. coupon, 108@108⅛; do. 4 per cents, 1907, reg., 104⅜@104½.

The amount of U. S. bonds held by the Treasurer of the United States, as security for the National Bank circulation, is $337,590,650, and $18,651,000 as security for public deposits.

State and Railway bonds have been moderately sought after, yet as a rule quoted generally about steady as to price in the instances of the more substantial loans which have not been offered with much freedom. And in the line of Railway and Miscellaneous share property business has been decidedly more active, at much stronger and buoyant prices, though toward the close values were fluctuating under speculative manipulations, leaving off heavily.

More animation has been reported in the leading kinds of domestic produce especially in Breadstuffs which have been more sought after for home use and shipment, leaving off, as a rule, buoyantly. Provisions and Cotton have been fairly active, but at generally lower figures. Foreign merchandise has been attracting more attention on the previous basis as to prices in most instances. Sugars and Molasses have further receded under a pressure to realize. Coffee also weaker.

A good demand has been reported for Hardware, Boots and Shoes and Dry Goods, with prices of seasonable classes of stock generally well supported.

Business in Metals has been comparatively tame, with prices favoring purchasers. Eglinton Pig Iron quoted at $24@$24 50; Glengarnock $25 50@$26; Coltness $26@$27; No. 1 American Pig at $18@$18 50; No. 2 do. at $17@$17 50; Forge $16@$17; American Rails at works $32@$36; Old Rails $18@$19. Wrought Scrap $22@$25. Steel Rails, on the basis of $45@$47 50 at the mills. Ingot Copper moderately active on the basis of 18⅛@18¼ for early delivery, and 18⅜ for September and October deliveries.

A much brisker movement has been reported in the line of Ocean freights, especially in the Grain interest, and rates have been quoted generally higher, closing very firmly. Liverpool steamer rates at the close for Grain, quoted at 9½d.@10d, Provisions, 40s. @60s.; Tallow, 40s.; Leather, 60s. Measurement Goods at 20s.@25s. 0d. per ton; Cotton, ½d. per lb., Liverpool, by sail. Cotton, 7-32; Grain, 8d. Oil Cake and Slate, 20s.; Measurement Goods 17s. 6d.@20s.; Tobacco 30s.; Grain rates on charter hence for Cork and orders left off at 6s. 9d.@7s.; for the Continent at 6s. 6d.@7s., do. for Italy at 6s. 3d. @6s. 9d., and from Baltimore for Cork and orders, 7s. and from Philadelphia at 6s. 3d.@6s. 9d. per quarter. Refined Petroleum hence for Cork and orders, 4s. 3d.@5s., for the Continent, 4s. 6d.@5s. per bbl.

# FISK & HATCH,

## Bankers,

No. 5 Nassau St., New York.

U. S. Government Bonds bought and sold in amounts to suit investors: also, Gold, Silver and foreign coins: Deposits received in Currency or Gold, and interest allowed on Balances: Special attention paid to Investment Orders for Miscellaneous Stocks and Bonds.

Illinois Central Railroad Company,
New York, July 18, 1877.

A DIVIDEND OF TWO (2) PER CENT HAS been declared by this company, payable on the 1st day of September next, to the holders of the capital stock of this company as registered at the close of the 14th day of August next, after which, and until the 5th day of September, the transfer-books will be closed.

L. V. F. RANDOLPH, Treasurer.

**Claims for Goods Destroyed by the Rioters.**

The President of the Pennsylvania Railroad Company has issued a circular in which he states that parties having claims for goods destroyed by mob and riot on the premises of the Pennsylvania Railroad Company, in the city of Pittsburg, Allegheny county, Pennsylvania, on July 21 and 22, 1877, are notified if their claims are made out according to directions, which he gives at length, and forwarded to him, they will be examined and put into shape and presented by counsel to the proper authorities of said county without expense to the claimant, the said county being responsible to the owners of said goods for such loss. If it should be necessary to institute suit against the county, such suit will be prosecuted by counsel without charge, upon the execution of the proper power of attorney for that purpose, form of which will be furnished.

☞ The attorneys for the Union Trust Company of New York have dismissed without prejudice, in the United States Circuit Court at St. Louis, the suit which has been standing there some months against the St. Louis, Iron Mountain and Southern Railroad, and filed a new bill asking for the foreclosure of the mortgage and the appointment of a Receiver for the road. The new bill is based upon the same general grounds as the old one, in default of interest on bonds.

**Calumet and Hecla Mining Co.**

At the annual meeting of the Calumet and Hecla Mining Co. of Michigan, held in Boston on the 15th inst., the treasurer made the following statement of the assets and liabilities of the company April 30, 1877: Assets—cash at Boston office, $186,885 96; cash at mine office, $19,704 03; United States bonds, $305,962 62; loans, $337,000; copper on hand at 17 cents net, $1,600,447 84; supplies at mine, $269,943 59; total assets, $2,669,893 54. Liabilities—drafts in transitu, $19,769 04; bills payable at mine, $130,456 27. Excess of assets over liabilities, $2,519,668 23. Alexander Agassiz, Quincy A. Shaw, George Higginson, H. H. Hunnewell and James N. Wright were chosen directors, and subsequently organized by the choice of Alexander Agassiz as President and Charles W. Seabury, Treasurer and Secretary.

☞ The Chief Engineer of the Victoria (Canada) Railway has been instructed to go on with the building of the road from Kinmount to Haliburton. A force of men will be immediately employed between the points named. The Canadian Land and Emigration Co. have agreed to the proposals made by the railway company, and arrangements have been effected for the necessary amount of bonds.

☞ Chancellor Alken, in the Chancery Court at Little Rock, Ark., has decided the suit of the Memphis and Little Rock against the St. Louis and Iron Mountain Railroad, that the latter be enjoined from impeding the use of any part of the track connecting with the roads or interfering with the depots, etc, of the former road. The Memphis road is required to give bonds in the sum of $5,000 for the payment of tolls, etc.

☞ The earnings of the Great Western Railway of Canada for the month of June, 1877, were $279,700, the expenses $238,000, and the net earnings $41,700; in June, 1876, the earnings were $307,900, the expenses $281,000, and the net earnings $26,900—showing a decrease in earnings of $28,200, a decrease in expenses of $43,000, and an increase in net earnings of $14,800.

☞ The first sod of the Atlantic end of the Nictaux and Atlantic Central Railway was turned on the 7th inst, on the line of Mr. Macdonald's five mile contract, commencing at the end of James A. Grant & Co.'s contract and running through Mahone Bay and Block House towards Bridgeport.

☞ After the 4th of September the holders of 235,000 $10 shares of centennial stock will be paid the interest on the instalments paid up to January 1, 1876, and a distribution of the remaining assets, equal to about $1 75 per share. But for the adverse decision in the $1,500,000 case about 80 per cent of the investment would have been returned.

☞ The returns from the various counties of the State of West Virginia indicate that Charleston has been chosen as the permanent seat of Government. By the terms of the law submitting the question to the people, the Capital remains at Wheeling until May, 1880.

### Railroad and Manufacturing Notes.

A narrow gauge railroad, two feet wide, between Billerica and Bedford, Mass., will soon be finished. Its passenger cars, now building at Laconia, N. H., will have a row of single seats on each side. The road is eight miles and a half long, and will cost about $50,000, or less than $6,000 per mile, only one-eighth of the cost of ordinary railroads.

Grading and track laying on the Waynesburg and Washington (Penn.) railroad are progressing rapidly, and it is anticipated that by the 1st of September the track will be laid across the divide at West Union, and on the start down Bate's Fork, in Greene county.

The work of track laying on the extension of the Scioto Valley road, is progressing rapidly and in a highly satisfactory manner.

Work on the Columbus and Gallipolis (Ohio) railroad is in progress at Eagle Furnace, Vinton county.

The subscribers to the Baltimore and Delta Narrow Gauge railway had a meeting at Belair on the 11th inst. The subscriptions to the Belair route was stated at $76,050, and the Twining's Valley route $57,650. The following gentlemen were elected directors: A. W. Bradford, James L. Sutton, Wm. H. Waters, Stevenson Archer, E. Stanley Rogers, Foulk Jones and Philip T. George.

Ex-Governor Groome has been appointed receiver of the Maryland and Delaware railroad.

The Grafton (W. Va.) Sentinel states that the Baltimore and Ohio Railroad Company is advertising to receive proposals to furnish meals to its employees. The company proposes to furnish meal tickets to men in its employ and become responsible for the payment of the same. It is said that this is done to save the men trouble in getting boarding, and at the same time protect the keepers of boarding-houses.

Wm. H. Clements has been appointed Assistant Master of Transportation of the Baltimore and Ohio Railroad, including the Main Stem, Locust Point, Washington, Bladensburg and Alexandria, Metropolitan, Frederick, Washington county, Harper's Ferry, Parkersburg and Wheeling, Pittsburg and Baltimore branches.

W. W. Peabody has been appointed Master of Transportation of the Ohio and Mississippi Railroad, vice E. H. Graves resigned.

D. M. Henderson has been appointed Superintendent of the Pittsburgh, New Castle and Lake Erie Railroad, but will not assume charge until six more miles of the new road are completed.

As an evidence of the revival of trade, it is stated that the Rogers Locomotive Works, at Paterson, New Jersey, have received orders for two new engines, and the Danforth Works for five. The Paterson Press says: "This would once have been looked upon as a small number, but at the present time it is a very respectable showing of 'first drops of the shower.'"

The Vise and Tool Works, of Trenton, New Jersey, have resumed operations.

The hull for a dredging machine for the American Dredging Company, of Philadelphia, is under way at the yard of the Harlan & Hollingsworth Company, Wilmington, Del.

The Tredegar Iron Works at Richmond, Va., are now filling large contracts for railroad cars. The plate, spike and other mills are in full operation, and it is expected that the puddlers will resume operations at once. At that time there will be from nine hundred to one thousand men employed.

An immense fire proof elevator is to be constructed at the terminus of the Erie Railway in New Jersey on the pier formally occupied by the White Star Steamship Company. The building will cost $600 000, and have a storage capacity of 1, 500,000 bushels.

The Ætna Iron Works, of this city, have been re-organized, and are now styled the Ætna Iron Company. The specialties of which will be architectural work and large castings.

The Gaylord Rolling Mill Co., of Cincinnati, claim to have a process of making steel which is superior to the Siemens-Martin or Bessemer.

The Barney & Smith Company of Dayton, Ohio, have supplied the Cincinnati Southern Railroad with five locomotives.

A bolt factory 40×110 and one story high is about to be erected on Greenpoint Av., Brooklyn, by C. F. A. Dambman.

### Commerce of New York.

The foreign imports at New York for the month of July, 1877, are officially stated as follows:

| | 1876. | 1877. |
|---|---|---|
| Entered for consumpt'n, | $9,833,959 | $10,830,513 |
| Do. for warehousing.... | 4,943 729 | 10 934,505 |
| Free goods..... | 4 836,431 | 6,101,170 |
| Specie and bullion..... | 418,960 | 328,274 |
| Total entered at port... | $20 033,079 | $28,194,462 |
| Withdrawn fr. wareh'use | 5,707,543 | 6,224,659 |

The foreign imports at New York for seven months from January 1, were:

| | 1876. | 1877. |
|---|---|---|
| Entered for consumpt'n | $75,099,075 | $82,814,781 |
| Do. for warehousing... | 52,684,809 | 59,153,909 |
| Free goods..... | 47,916,186 | 55,585,572 |
| Specie and bullion..... | 2,670,245 | 7,683,261 |
| Total entered at port.. | $178,870,265 | $205,237.523 |
| Withdrawn fr. wareh'se | 47,464,939 | 42,233,721 |

The duties received at New York for seven months ending with July, were:

| | 1876. | 1877. |
|---|---|---|
| January..... | $8,160,728 44 | $8.058,938 72 |
| February..... | 9,473,003 56 | 8,224,434 61 |
| March..... | 10,237,275 86 | 8,695,637 63 |
| April..... | 7,764,457 04 | 7,569,482 75 |
| May..... | 7,575,997 28 | 7,054 082 33 |
| June..... | 6,619,735 25 | 6,102,426 72 |
| July..... | 7,497,199 39 | 7,132,747 46 |

| Specie and bullion.... | 36,830,120 | 23,140,146 |
| Total exports..... | $186,062,010 | $179,985,277 |
| Do. exclusive of specie. | 149,231,890 | 156,845,131 |

### Columbus and Gallipolis Railroad.

The route of this road is through the counties of Gallia, Vinton, Hocking, Fairfield, Pickaway and Franklin, in Ohio. The grading is completed in Gallia county 19 miles, and in Vinton county 28 miles, on which about four miles of iron are laid, and 12 miles in Hocking county—making 59 miles of completed grade.

The road is a direct extension of the Chesapeake and Ohio Railroad, and is the only railroad crossing the State of Ohio that can offer a desirable connection with that road, having but twenty miles to construct to complete the connection, —thus forming a great trunk line from Norfolk and Richmond, Va., across the State of Ohio to Columbus, 92 miles in length, located exactly in the direct channels of freight and passenger traffic.

It is 13 miles less than by any other route from Columbus to Washington City and Baltimore. For a distance of 35 miles at its southern end, the road passes through one of the richest mineral districts in the State, abounding in iron ore and coal of the best quality.

It is an improvement which, with more certainty than any other in the State, will continue to increase in its revenues for many years to come. It is rendered so by its geographical, topographical and mineralogical features. It forms a system which, with its connections, secures its perfect independence and security against any present or future rival.

The following furnaces are tributary to the line: Vinton, Eagle, Keystone, Buckeye and Lincoln. The road enters the coal fields fifty miles from Columbus, a shorter distance than any other line.

The company now intend to complete and perfect the road, to extend it into Columbus, and to make it in every respect a first class work, thus placing it in a position to command public confidence which will insure to it the traffic to which it is entitled.

### The Coal Trade.

For the week ending the 11th inst., the total tonnage, as reported by the several carrying companies, amounted to 887,062 tons, against 426,200 tons in corresponding week last year, a decrease of 39,138 tons. The total amount of anthracite mined for the coal year is 12,099,952 tons, against 9,816,459 for same period last year, an increase of 2,283,493 tons. The quantity of bituminous coal sent to market for the week amounted to 57,457 tons, against 79,003 tons in corresponding week last year, a decrease of 21,546 tons. The total tonnage of all kinds of coal for the week is 444,-519 tons, against 505,003 tons in corresponding week last year, a decrease of 60,684 tons. The total tonnage of all kinds of coal for the coal year is 13,965,132 tons, against 12,057,643 to same date last year, an increase of 1,907,489 tons. The receipts at Perth Amboy for the week ending on the 11th instant were 23,041 tons, the shipments 84,104 tons, leaving a stock on hand of 86,628 tons. The quantity of coal and coke carried over the Pennsylvania Railroad for the first week of August was 64,984 tons of which 54,616 tons were coal, and 10,368 tons coke. The total carried for the year is 2,731,495 tons, of which 2,171,843 tons were coal and 507,975 tons coke. These figures embrace all the coal carried over the road, east and west.—*Phila. Ledger, Aug.* 20.

☞ The Georgia Constitutional Convention, after a long discussion, has decided to give the Legislature power to regulate freights and fares on railroads.

## BOOKS AND MAGAZINES.

The American Builder, a Journal of Industrial Art, published by the American Builder Publishing Co., 176 Broadway, New York.

We are in receipt of the August number of this magazine which is an excellent one, the articles being of unusual interest and the illustrations more numerous than usual. A new feature has been introduced which will be appreciated by its readers and will undoubtedly add to its popularity. It is only surprising that the energetic Charles D. Lakey, the present president of the company, has not made the "New Departure" a prominent department in his journal before; but "better late than never." We allude to the two columns under the caption of "Important New Buildings," comprising a number of paragraphs about buildings and fine edifices in course of construction. The illustrations consist principally of Working Men's Cottages, St. Peter's Church, Rosendale, N. Y., A Charming Country Villa, A Model Stable, and others illustrative of improvements in the industrial arts. The subscription is three dollars per annum.

The Churchman, a weekly newspaper and magazine formerly published by M. H. Mallory & Co., in Hartford, Conn., is now published by the same company at 47 Lafayette Place, opposite the Astor Library, in this city.

The new quarters are advantageously located, extensive, and handsomely fitted up.

The journal is of high tone, ranks among the very best of its class, is in its twenty third year and is edited with acknowledged ability. The circulation is large chiefly among the clergy and laity of the Protestant Episcopal Church. Subscription per annum (52 numbers) $4 00.

The Church Magazine, published by Thomas E. Bartow, Brooklyn, is a monthly journal of the Protestant Episcopal Church.

The number for July, number five, volume four, is an excellent one. The papers on British Cathedrals and their bells, by John Harris, C. E., and "The Cathedral" by Rev. Wm. A. Leonard are both interesting and instructive.

☞ Judge Welford of the Circuit Court of Richmond, Va., has entered an order for the payment by the Chesapeake and Ohio Railroad Company of taxes due the State. These taxes have been accumulating since the troubles began on the road which finally culminated in its being thrown into the hands of a receiver. The arrearage of taxes and interest thereon and taxes for the present year amount to $96,264.

☞ According to the report of the mayor of St. Louis the total funded debt of that city is $23,067,000, and the bonds are quoted in London at 7@8 per cent premium. The total receipts for the fiscal year just closed were $5,784,701, and expenditures $5,067,777.

☞ J. W. McDonald of Campbelltown, N. B., has invented a self-discharging ballast car by which he claims that ballast can be distributed over the track in transit, thus expediting the work of ballasting and rendering fewer hands necessary.

☞ J. McDaniels, one of the Central of New Jersey Railroad strikers, has been sentenced by the Vice Chancellor at Newark to pay a fine of $50 and to remain in the Warren county jail until further orders of the court,

INCOMBUSTIBLE MINERAL WOOL.

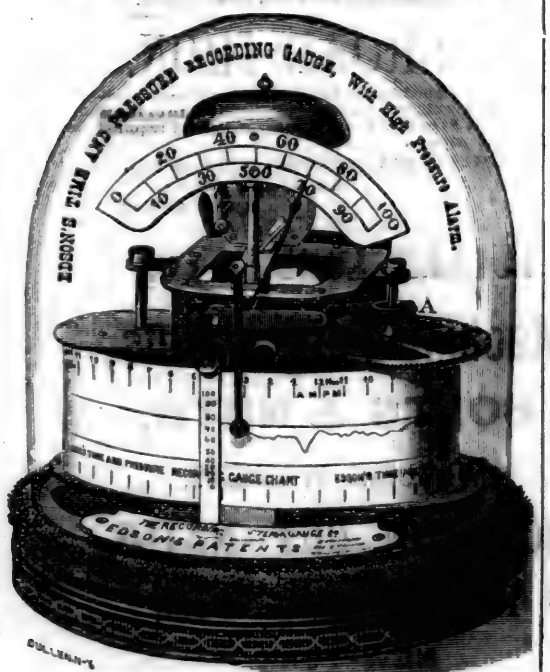
## FINANCIAL.
ALEX. FROTHINGHAM & CO., BANKERS AND Brokers, No. 12 Wall st., make for customers desirable investments of large or small amounts in stocks of a legitimate character, which frequently pay from five to twenty times the amount invested every thirty days.

Reliable stock privileges negotiated at favorable rates. Stocks bought and carried as long as desired on deposit of three to five per cent. Circulars and weekly reports sent ly23

☞ The Patterson and Little Falls (N. J.) Horse Railroad has been sold, at Master's sale, by order of the Chancellor, for $300—over and above the $7,000 preferred claims—to Hon. G. A. Hobart, in the interest of the first mortgage bondholders, who intend to continue running the road. The capital stock of the company was $30,000, besides $72,000 in bonds, with a floating debt of $27,000, and accrued debts of $3,000.



☞ The Car Trust of Pennsylvania announces dividend of one and one half per cent on "series C" stock, payable September 1st, at the office of the Pennsylvania Company for Insurance on Lives, &c.

☞ The survey of the proposed extension of the Worcester and Somerset railroad has been completed to Bloodgood's Landing, on the seaside below Horntown, a distance of 10½ miles below Newtown, Md.

☞ Charles Ashby, the last of the railroad strikers awaiting trial in Cincinnati has been sentenced to thirty days' confinement in the workhouse and the payment of a fine of $500, and required to give bonds to keep the peace.

AND
**MECHANICS.**
THE COMPLETE PRACTICAL MACHINIST by Joshua Rose. Price, $2 50. Address JOSHUA ROSE, P. O. Box, 5546, New York City.

**Steam Office Watchman!!**

THIS GAUGE IS USED IN HOTELS, STEAMERS, Manufactories, Breweries, etc.
The Inventors of this combined "Pressure Gauge" and "High-Pressure Alarm" have, after many years of persistent effort and at great expense, succeeded in perfecting a reliable and accurate instrument for measuring either air, steam or water, when subjected to pressure, and for denoting the same by an automatically written tracing upon Edson's Patent Logs or "Charts." No manufacturer or steam user can afford to be without them. Circulars sent on application to
**M. B. EDSON, 91 Liberty St., N. Y.**

**MILLER'S TRUSSED PLATFORMS,**
**COMPRESSION BUFFERS and AUTOMATIC COUPLERS**
FOR RAILROAD PASSENGER CARS.

**OFFICE: 6 Park Place, New York.** **E. MILLER, Patentee.**

**CORYDON WINCH,**
**Manufacturer of RAILROAD, SHIP, BOAT & DOCK SPIKES.**

Rolling Mill and Factory, Canal Street, near Second and Laurel, Philadelphia.

**MISFIT CARPETS.**
English Brussels, Three-Ply and Ingrain, also, Stair Carpets, Velvet Rugs, Crumb Cloths, Oil Cloths, etc., very cheap at the Old Place,
**112 FULTON STREET, NEW YORK.**
Carpets carefully packed and sent to any part of the United States free of charge.
☞ Send for Explanatory Circular. **J. A. BENDALL.**

**EDWARD W. SERRELL,**
**CIVIL ENGINEER,**
**78 & 80 BROADWAY,**
**NEW YORK CITY.**
**Railroads, Bridges, Explorations.**
☞ Particular attention given to the Examination of Public Works for Capitalists seeking Investments.

**PATENTS.**
**T. D. STETSON,**
Solicitor of American and Foreign Patents
**23 Murray Street, New York,**
**(Near New Post Office.)**
Send for circular.

**D. Stuart Willis,**
**ATTORNEY & COUNSELOR AT LAW.**
**NOTARY PUBLIC.**
**241 Broadway, New York.**
Special attention paid to Railroad, Mining and Manufacturing Interests.

**OFFICES TO LET,**
WITH ALL THE MODERN IMPROVEMENTS, SPLENDID LIGHT & VENTILATION, SUITABLE FOR
Banks, Bankers, Brokers, Merchants, Lawyers, Railway, Insurance, and other Companies,
IN BUILDINGS
38 39, 40, 42, 57, 64, 66, 69, 71, 73, 78 and 80

New York, Saturday, September 1, 1877.

### The Outlook.

The recent railroad and coal mine strikes, although foolish in conception and formation, illegal in execution, and disastrous in consequences, should nevertheless be studied and remembered by all thoughtful men. The storms are over, or nearly so, and the calm is evidently approaching. Employees have resumed their employment, and arbitration has soothed rashness and passion into a calmer and more rational state of feeling. Promises have been made on both sides, and in one instance has been given an almost financial guarantee for the fulfillment of the company's pledge. While employees are smarting from their own self-inflicted punishment, in loss of time and money, and in some cases loss of friends and relatives, the companies are repairing the damage done and preparing for brisk business and a busy fall trade. There is a time, and that is just now, for calm and demure reflection on these recent events that shall be profitable hereafter. Facts have come to light which prove that amid the millions of workmen in this country, there is a turbulent element which, although crushed and smothered, is not or cannot be completely and effectually extinguished. But that element can be kept in check by sound and judicious policy, by measures that will tend to smooth and not ruffle its nature; it can be kept in abeyance and diminished so as to be less dangerous and less powerful if it should strike an attitude of defiance. The responsibility of capitalists and railroad companies is a heavy one, and they are aware of it. Some journals have magnified certain proceedings to such an extent that they appear to blame the railroad companies for the recent troubles. This is unjust. There may have been instances of grasping, a spirit of selfishness developed, a thoughtlessness respecting the condition and needs of employees, and an overbearing conduct towards them, but this has been the exception and not the rule. We believe, nay we are sure, that in a survey of railroad companies there will be found the highest education, intelligence and good judgment. If it were not so, the prosperity of this country would be very materially affected. It is easily seen that a well managed railroad, liberal officers, and a contented set of employees will ever be the most desirable state of things to both company and passengers, and to all the patrons of the road, and therefore it is the state of affairs that all companies aspire to. Any deviation from good policy and judgment is instantly felt by the public, and remonstrances soon correct what is absolutely unjust and wrong. No man who values property will abuse or destroy it; ignorance, want of feeling, spite or passion may predominate at times, but calm thinking and judicious policy will ever be the characteristics where prosperity, success, liberality, justice and contentment are to be established. We regret past occurrences; they have their teachings. We are prepared to see firmness and discipline tempered with liberality and consideration exercised in the future; we are prepared to find a better general feeling between employers and their workmen; we are prepared to see efforts made to give employment at fair rates of remuneration; and a tide of prosperity set in which will put all the wheels of business in active and progressive motion.

Cannot our railroad companies as far as practicable institute reading rooms and libraries and schools during the coming fall and winter for the benefit of employees and their children. We need not expatiate on their benefits, but we know that in many instances they work well, serve as means to build up a good feeling, and pay both ways.

### Alabama and Chattanooga Railroad Bonds.

We have been favored with a copy of the circular of Messrs. EMILE ERLANGER & Co., to the holders of the above bonds, from which we learn that after failure of the successive efforts of the English Committee and of the Council of Foreign Bondholders to secure the requisite subscription to provide for the purchase of the line under the foreclosure, the railroad and property was again put up for sale, but the purchasers having failed to make good their biddings, the railroad was for the third time offered, and was knocked down to local creditors upon terms which entirely excluded the bondholders. After the sale Messrs. Erlanger & Co. entered into negotiations with these parties for the transfer of their contract, and finally became the purchasers in their place for the sum of $1,480,096 68, with the intention of giving the bondholders another and final opportunity of participating in the purchase and covering their loss. It is estimated that $330,000, in cash or the equivalent, will be required in the first six months to complete, repair and equip the line; and $180,000 in the second six months to complete repairs and equipments—which, together with the actual expenses of the purchase, etc., say $80,000, will raise the total outlay to $2,110,096. It is proposed to form a new company either in London or under the laws of Alabama, entitled the "Alabama

Great Southern Railway Company, Limited," with the object of owning and working the road. They design to issue a first mortgage bond of $1,750,000 at 6 per cent interest; 15,660 preferred shares of £10 each, bearing a cumulative interest of 6 per cent extending to six years' arrears, to be increased *pari passu* with the dividend on the ordinary shares as soon as the earnings on the road are sufficient to pay 6 per cent on the latter, and 156,600 ordinary shares of £10 each. The bond holders may, upon payment of 10 per cent, or £20 on each $1,000 Alabama and Chattanooga first mortgage indorsed bond of 1869, become entitled to two preferred shares and to 20 ordinary shares in the new railroad. After Sept. 10, should any preferred shares remain unapplied for, bondholders may receive an excess allotment of both styles of shares, on condition that they apply for them at the time of making their *pro rata* application. This option is not to interfere with the right of bondholders to participate in the benefits of the compromise made by the council of foreign bond holders with the State of Alabama, by which the State offers to give direct bonds in the proportion of about one for five of the old indorsed bonds. A copy of the circular may be obtained, together with forms of subscriptions, from Messrs. Flock & Co., 51 William street, New York, who are the agents of Messrs. Emile Erlanger & Co., of London.

### Practical Talks on Mechanical Reform.

Enough has been said to show that no class of men are entrusted with greater responsibilities, none hold in their keeping more important interests of life and property, than those having the charge of steam boilers; and that, in consideration of this fact, it is incumbent on those owning steam machinery to put it in charge of competent engineers. The instances of ignorance and incompetency we have cited are not by any means "fancy sketches," but actual occurrences; and others might be added which, if they failed to arouse, would certainly astonish manufacturers and steam users. But is there no remedy for this state of things, and what have the public in the shape of protection? It must be remembered that steam machinery is constructed now from thousands of different designs and patterns. Every maker has his own views and peculiarities, some advocating one method and mode of construction, others a totally different one. Hence a visit to marine, stationary and locomotive engine works, or even a stroll through the machinery depots in the center of our own city, reveals an immense number of different designs and arrangements of steam boilers and engines. They all have their peculiar features—multitubular, flue, cast iron sectional, vertical, horizontal, revolving, fire-box boilers; and horizontal, vertical, inclined, oscillating steam engines, some stationary, some portable, others semi-portable, etc. Then, again, there are depots for second hand steam machinery, the resorts of farmers and small manufacturers who want "an engine and boiler that ain't going to cost all creation." And it will ever be thus; there will be good, bad and indifferent steam machinery so long as competency and incompetency, science and ignorance, reputation and avarice, selfishness and liberality, recklessness and caution, honesty and dishonesty, are interwoven in its manufacture and sale. It is precisely the same with buildings and other works: there are notional and ignorant architects, as well as experts and studious ones who will not sacrifice their reputation for the sake of "filthy lucre." And yet buildings fall, and give way, and rot, owing to the want of practical knowledge or the willful ignoring of it, the employment of cheap help and cheap materials "in order to make the job pay." No matter if boilers are thin or of inferior iron, or worn out in places and patched; no matter if buildings are flimsily erected and poorly supported, having defective flues, and semi-rotten beams; in short, no matter if boilers blow up and buildings fall down, causing the loss of hundreds of lives *annually*, so long as money is made by the manufacture, sale or rent. This is all wrong. It is customary, it is tolerated, it is just as daily observation and experience inform us; but, we repeat, it is wrong; wrong in men selling what they know to be weak and unsound and dangerous, in erecting defective buildings, in employing incompetent men and "cheap help" in responsible situations; but they are wrongs that can be remedied, and that with little difficulty, and should receive the attention of our eminent engineers and manufacturers. Men will always differ in their ideas of strength as well as in their ideas of necessity. Too many are always willing to run risk; but a strict, careful, disinterested inspection and thorough examination of steam machinery held at certain times of the year by thoroughly educated and practical engineers, who are above bribery and not politicians, who can be depended upon in the discharge of their duties, and will not flinch, nor shirk, nor make oversights, nor fail to inquire and examine and test and enforce—is one means that can be employed for effecting mechanical reform. There are inspectors now, laws, rules, regulations, certificates, licenses, etc.; what mean then these explosions, these disasters, these dreadful occurrences, neglects and incompetency at our very doors and all around us.

### The Des Moines Rapids Canal.

The Government Canal around the Des Moines Rapids of the Mississippi River was formally opened on the 22d ult. The canal is 7.6 miles in length, 300 feet wide in embankment, and 250 feet wide in excavation, extending along the Iowa Shore from Keokuk to Nashville. The water in the canal will be from five to eight feet deep, which is sufficient to float the steamboats of the Upper Mississippi. The fall is 18¾ feet. The two lift locks and one guard lock, which are built of cut-stone masonry, are 350 feet long and 80 feet wide, and cost from $360,000 to $725,000. The lower lock is at Keokuk. The orignal estimate of cost was $3,890,000, but changes in the plans were of course made, and the cost has already reached $4,231,000, with the prospect that $100,000 more will be required to complete the work. The machinery for operating the immense lock gates and wickets is operated by hydraulic power, under the control of one man. The gates can be opened or closed in a minute or less, and the lock fills in about three minutes, so that a steamer may pass through in eight to twelve minutes. Work was begun on the canal in October, 1867.

### Connecticut and Passumpsic Rivers R. R.

From the report of the directors of this company, which is to be presented at the annual meeting of the stockholders to be held at Newport, Vt., on the 5th inst., we learn that the gross earnings during the year ending June 30, 1877, were $604,595 67, and the expenses $360,285 35, leaving the net earnings for year $245,310 32. From which has been paid: coupons on bonds and other interest, $180,273 62; balance of floating debt, $54,110 53—leaving balance of earnings on hand $59,926 17.

The financial condition of the corporation July 1, 1877, was as follows:

| | |
|---|---|
| Mortgage bonds payable in 1893 | $1,186,500 |
| Mortgage bonds payable in 1881 | 123,000 |
| 6 per cent. bonds due Dec. 1, 1876, not presented for payment | 1,300 |
| Notes in bank for money borrowed to pay bonds which became due Dec. 1, 1876 | 160,000 |
| | $1,471,300 |

It will be seen that the issue of $1,500,000 mortgage bonds of 1893 will cover all our indebtedness, and leave on hand belonging to earnings $28,700.

By referring to the report of last year it will be seen that $678,000 of the then reported indebtedness became due on the first day of December last, and in order to sustain and carry out the principle early adopted and always practiced by this company, of meeting its obligations at maturity, the money was provided and in the bank on that day, to pay all demands which could be presented. Those bonds have all been paid and cancelled, with the exception of $1800 which have not yet been presented. We were enabled to borrow the money for the time being at a much less rate of interest than that borne by the mortgage bonds, thus making a saving to the Corporation of several thousand dollars; and without calling in the aid of bankers or brokers, we have been able to dispose of the bonds at par and a premium as fast as was desirable. We are now selling them at $108, and we feel warranted in saying that, in our judgment there is no cheaper or better security on the market. We feel justified in congratulating the stockholders on the present financial condition of the company, that notwithstanding the very great depression in all branches of business which has existed for the last two years or more, we have been able, after keeping the road up in as good or better condition than ever before, and paying interest on all indebtedness, to save enough from the net earnings to pay our entire floating debt, and leave a surplus for future contingencies of more than $50,000.

It would have been very pleasing to the Directors to have declared and paid a dividend on the first of August had they not deemed that a proper regard for the permanent interest of the corporation required the withholding of one more dividend. It is now thought that the financial condition is such that hereafter dividends may be resumed, and that the net earnings, after keeping up the property in good condition, and paying interest on the bonds, should be paid to the stockholders in semi annual dividends.

There has been no change in our business relations with connecting roads since our last report, the arrangement with the Boston, Concord and Montreal Road in regard to the lease of the South Eastern continuing as heretofore. The road and equipment have been kept in good repair. The

inability of Col. Foster to obtain the promised funds from England have prevented his completing the South Eastern Road between Waterloo and Acton, and we are running under the lease the same number of miles as at last report.

The gross earnings as compared with last year were,

| | 1876. | 1877. |
|---|---|---|
| Passengers | $254,844 87 | $230,714 02 |
| Freight | 345,628 22 | 333,823 76 |
| Mail | 21,959 49 | 19,978 74 |
| Rents | 7,141 28 | 12,079 15 |
| Express | 8,000 01 | 8,000 00 |
| | $637,558 87 | $604,595 67 |

Showing a decrease in gross earnings for the year of $32,958 20. By the utmost economy and diligence in the management we have been able to reduce the operating expenses $36,313 97. Showing an increase in net income of $3355 77.

The present officers of the corporation are: Emmons Raymond, President; T. P. Redfield, Vice President; N. P. Lovering, Treasurer; Elijah Cleveland, Secretary, and H. E. Folsom, Superintendent.

### Railroad and Manufacturing Notes.

It is expected that the Narrow-gauge railroad between Glasgow Junction and Mammoth Cave, Ky., will be completed by the first of January next.

At a special meeting of the Fredericton (N. B) Railway Co., held on the 16th ult., it was decided to reduce the gauge of the road on or about the 16th inst., at the same time with a similar movement by the European and North American Railway Co.

The St. Albans (Vt.) Messenger says that the Supreme Court has not come to any decision in the great railroad consolidation case heard in July, and that, owing to its magnitude, novelty and difficulty, they will likely take some time to consider. A decision may not be expected before November.

Ground has been broken for the proposed improvement of Myrtle avenue Brooklyn, from the Kings County line, through Newtown, to the Jamaica line. The improvement of the road will cost about $60 000. A movement is also on foot to extend the Myrtle avenue horse car line through to the Jamaica line.

Mr. John Gilman, with three engineers and twelve men, has begun to survey another railroad route from West Brookfield, Mass., to Southbridge by way of Fiskdale.

The St. John News says that the iron for the Albert County Railway has come to hand, and that in all probability the road will be in running order within a couple of months.

Adams H. Merrill, owner of one of the slate quarries at Brownville, Me., proposes to build a railroad, two feet gauge, from the quarries at Brownville to connect with the Bangor and Piscataquis Railroad at Milo, providing the two towns will grant him the right of way.

Her Majesty, Queen Victoria, has conferred upon Captain Tyler, late Chief Inspector of Railways, the honor of knighthood, in recognition of the eminent services rendered by him during the many years he held that appointment. Sir H. W. Tyler is now President of the Grand Trunk Railway Company of Canada.

Wm. Massey has been elected President of the Philadelphia and Atlantic City Railway Co., vice Samuel Richards resigned.

Wm. H. Clements has been appointed President of the Cincinnati Southern Railway Co., vice Rufus King resigned.

Wm. M. Clements, the recently appointed Master of Transportation of the Baltimore and Ohio Railroad, will make his headquarters at Cumberland, Md.

The Lewiston (Maine) Machine Company has contracted to build three hundred looms for a Southern cotton mill. The looms are specially constructed for the weaving of coarse cottons.

The great Corliss engine in Machinery Hall, Philadelphia, has been taken down and packed ready for removal to Providence, R. I. Seventy railroad cars will be needed to carry it.

It is stated that first class canal boats are scarce on the Erie Canal, and that to carry the grain that is expected to come to the seaboard this season a number of new boats will be necessary.

Work in the locomotive shops of the Philadelphia, Wilmington and Baltimore R. R. Co., at Wilmington Del., has been resumed, and all hands previously laid off have been re-employed.

The Cambria Iron Company of Johnstown, Pa., is importing iron ore from Spain at a cost of only $3 a ton, and this in a region abounding in iron ore, but which the strikers refuse to handle except at higher rates than the iron masters can afford to pay.

The Baltimore Water Board has awarded the contract for five thousand tons of water mains for the permanent supply to Jesse Starr & Sons, Camden, N. J., at $25 45 per ton, the lowest bid. The contract amounts to $127,250.

The Cincinnati Southern Railroad has five locomotives in all now in use.

### Steam on the Brooklyn City Railroad.

We noticed last week the trial trip of a steam car over the railroad tracks of the greatest thoroughfares in Brooklyn, in the busiest hours of the day. On the succeeding day it took its station on the road between 25th steet and Fort Hamilton. Four more cars of similar construction will soon be placed on the same line. It was found that the motor could be stopped within two feet; that it was even more easily handled than the ordinary street car; that it neither puffed nor swung a noisy bell; that it did not fill the street with black smoke and escaping steam; that, in fact, it appeared to be simply a street car, moving automatically, neither a nuisance nor a cause for fright or danger. President Sullivan has made a move in the right direction, and we hope he will be enabled to introduce these steam motors generally, to run from the ferries. Then quick transit will be accomplished and the result will be highly satisfactory—to business men an immense accommodation and convenience, and an addition to the prosperity of the city.

### Self-discharging Ballast Car.

The work of removing ballast from the cars to the road is now done by hand. Ballast trains have to be attended by large gangs of men, who first shovel the ballast from the cars to the sides of the road and then shovel it over the road bed. This, as is well known to all railway men, is a slow and costly style of work. Several attempts have been made to produce a car from which the ballast could be discharged without this laborious shovelling, but hitherto, we believe, none has come up to the requirements of railway men. Messrs. J. W. & A. McDonald of Campbelltown, N. B., have invented and patented an apparatus which certainly seems to supply the want so long felt. It may be best described as a travelling platform, constructed like an endless belt. When the ballast train arrives at the place where the ballast is required the apparatus is set in motion. The endless belt platform travels forward with its load of ballast, and drops it over the end of the car. A contrivance called a spreader, at the end of the car, receives the ballast, as it is discharged from the rolling platform, and spreads it evenly over the road. A car is discharged in fifteen seconds, and it is claimed that, with its aid, two men will do as much work as a hundred under the present system.

### Delaware and Hudson Canal.

The following is a summary of the report of the committee of stockholders appointed at the meeting held on the 8th of May, to investigate the affairs of the Delaware and Hudson Canal Company:

The company has been 54 years in existence, has marketed 37,000,000 tons of coal and has divided among its shareholders $33 552,604 in cash and $5,268,500 in stock. Its liabilities are as follows:

LIABILITIES.

| | | |
|---|---|---|
| Capital stock | | $20,000,000 00 |
| Funded debt | | 15,116,000 00 |
| Mortgages on property Union Coal Company | | 1,000,000 00 |
| Mortgages on New York City property | | 75,000 00 |
| Sinking Fund B. H. and E. Bonds | | 274,545 19 |
| Interest & dividends payable Jan. 1 | | 760,765 90 |
| December bills, payable in January | | 502,590 71 |
| Depositors | | 684,818 99 |
| Taxes payable in January | | 57,833 54 |
| Interest and dividends unclaimed | | 85,721 80 |
| Bills payable | | 856,000 00 |
| Total | | $39,311,776 13 |
| Contingent Liabilities: | | |
| £800,000 6 per cent. first mortgage gold bonds of the New York and Canada Railroad Company, due 1904 | $4,000,000 | |
| Consolidated mortgage bonds of the Albany & Susquehanna Railroad Company, 7 per cent., due 1906, less $420,000 held by the Delaware and Hudson Company | 1,540,000 | |
| | | 5,540,000 00 |
| Total liabilities | | $44,851,776 13 |

The company's property at Weehawken is subject to a mortgage for $20,000; the Brooklyn property, $150,000, less held by the company, $10,000—$140,000, and the Newark property, $22,250. To provide for which the company holds bonds of 1877, $178,000, and bonds of 1891, $10,000.

The composition of the funded debt is stated as follows: Bonds of 1877, $1,500,000; bonds of 1884, $3,500,000; bonds of 1891, $5,000,000, making a total of $10,000,000, secured by mortgage on the company's property in the States of New York and New Jersey; debenture bonds of 1894 unsecured by mortgage, containing a clause providing that if a mortgage shall be hereafter made upon the coal lands of the company these bonds shall be secured thereby, $4,745,000; debenture bonds of 1878 unsecured by present or promised

mortgage, $871,000, making a gross total of $15,116 000.

The floating debt is set down on Jan. 1 as $2,846,230. On Aug. 1 it was $2,090,000.

ASSETS.

| | |
|---|---|
| The company owns 25,230 acres of coal lands, estimated to still contain between 341,712,820 and 600,000,000 tons of coal, and charged on the books at $5,862,522 50 or $232 per acre, but estimated by the committee at $500 per acre, or | $12,615,000 00 |
| Railways and structures lying outside the coal region, comprising 271.73 miles, valued at | 6,693,568 00 |
| Equipment | 1,188,745 00 |
| Twenty-two colleries, with improvements | 3,800,000 00 |
| Mining tools and implements | 205,974 86 |
| Horses and mules, (at about $155 apiece) | 87,609 43 |
| Buildings in Pennsylvania | 486,000 00 |
| Land in Pennsylvania | 138,838 28 |
| Land and buildings in New York State on the canal line, (valued in 1874) | 212,119 50 |
| Land and buildings at Rondout | 500,000 00 |
| Thirty-five lots and buildings in Brooklyn | 150,000 00 |
| Balance due on property sold at Hudson | 6,940 66 |
| Coal-yard property at Rochester, (cost $17,851 60) | 13,019 98 |
| Property at Buffalo, (cost $428,720 33) | 400,029 66 |
| Farm of 332 acres at Allegany, N. Y., taken for debt | 10,000 00 |
| Eighteen lots in Utica, taken for debt | 13,000 00 |
| Farm of 147 acres at New Hartford, N. Y. | 20,000 00 |
| One-third of shops at Schenectady, (at cost.) | 13,716 11 |
| Company's office in New York City, cost $1,567,693 33, bringing net rental (partly rented) of $37,813 | 800,000 00 |
| Land and buildings at Weehawken, (cost $1,000 000) | 900 000 00 |
| Property in Newark | 30,000 00 |
| Property in Bridgeport, taken for debt | 75,000 00 |
| The canal has a total length of 108 miles, a draught for average boats of 130 tons, and a capacity of 2,000,000 tons of coal annually; carries annually on an average 1,500,000 tons, bringing receipts of $1,872,500; costs to operate $1,350,000 annually, leaving an annual profit of $522,500: is in excellent condition; valued by the committee at | 7,000,000 00 |
| Boats and Barges | 954,125 00 |
| Value of equipment of leased railroad lines, belonging to Delaware and Hudson Canal Company | 845,276 00 |
| Value of company's telegraph lines | 14,734 80 |
| Value of supplies | 1,319,601 88 |
| Cherry Valley Railroad, (20.91 miles) | 200 000 00 |
| Eight palace cars | 50,000 00 |
| Gravity Railroad | 2,698,568 84 |
| Coal yards, tools, and fixtures | 100,000 00 |
| Coal depots at interior points | 78,200 90 |
| Culm-pressing machine | 10,000 00 |
| Coal on hand, (240,322 tons) | 698,758 15 |
| Advances to leased lines, payable in stocks and bonds | 427,500 88 |
| Bonds | 2,311,641 50 |
| Stocks | 1,714,910 00 |
| Advanced royalties | 521,179 32 |
| Cash on hand | 624,584 19 |
| Cash assets | 1,907,135 04 |
| Total assets | $47,615,972 48 |
| Apparent surplus | 2,764,196 30 |

These figures are not the same arrived at in the committee's totals. They make out a total of liabilities of $39,811,776 13, a total of assets of $44,286,725 79, and a surplus of $5,514,949 66. They make no reckoning however, of the contingent liabilities, and deduct some of the real estate mortgages from the estimated value of property items. There are also several discrepancies between the valuations in the body of the report and in the balance sheet. For instance, in the former the real estate at Buffalo is valued at $400,029 66, and in the latter at $345,000; in the former the real estate at Rochester is set down as worth $13,019 98, and in the latter as worth $8,000. These figures given above are those taken from the body of the report. A noticeable fact is that the committee's valuations of assets are largely in excess of the company's estimates in their annual report, except in the matter of stocks and bonds. Until these latter are reached the aggregate excess of the committee's valuations foot up $8,238,710 81. Here, however, a reduction is made by the committee of fully $3,505,982 90 from the company's estimates.

The statement furnished of last year's business summarized gives the following result:

EXPENSES.

| | |
|---|---|
| Mining coal | $2,754,778 20 |
| Transportation and repairs | 542 155 54 |
| Freight of coal and canal expenses | 1,032.430 79 |
| Rondout expenses | 142,755 38 |
| Freight paid other lines | 428,839 53 |
| Harbor and yard expenses | 59,861 74 |
| Taxes | 221,177 69 |
| Salaries, rent, miscellaneous, and law expenses | 172,984 04 |
| General interest account | 1,187,886 07 |
| Loss on leased lines | 555,405 90 |
| Coal on hand Dec. 31, 1875 | 737,627 55 |
| Coal purchased | 120,599 47 |
| Total | $7,956,501 90 |

RECEIPTS.

| | |
|---|---|
| By sales of coal | $6,495,427 69 |
| Canal tolls | 43,444 59 |
| Net earnings of company's roads | 356.615 21 |
| Interest on investment | 289.228 64 |
| Miscellaneous profits | 381,047 81 |
| Coal on hand Dec. 31, 1876, (240,322 tons | 698,758 15 |
| Total | $8,264 522 09 |
| Balance profit | $308,020 19 |

The committee say: "Fixed charges, which include interest on bonds and rentals of leased lines, are less than $2,000,000 annually. Applicable to these are incomes from railroads and all sources except coal, amounting to $2,000,000, leaving to be met by profit on coal a deficit of rather less than $1,000,000. In the first half of the year a profit has been made notwithstanding the low prices for coal which prevailed. Upon present production, average receipts of $3 per ton would cover fixed charges, and all in excess of that sum would be applicable to dividends. Upon a production of 2,500,000 tons, average receipts of $4 per ton would pay all charges and restore to the corporation its former prosperity. The company's mines and equipment are of a capacity to produce, annually, 4,000,000 tons of coal.

The committee are also responsible for the following statement: "Wages, as well as the price of coal, have been unduly depressed. An advance of both would benefit all interests."

Their conclusions are as follows: "It is a corporation well and honorably managed, having and deserving that reputation in the community. Its policy has been conservative, but nevertheless progressive. Errors in management have occurred, but they have been rare. It has been wonderfully successful, its dividends having been large, and for 38 years continuous. The depressed condition of its securities is due chiefly to the low price of coal. For this, responsibility does not rest upon the managers. Some investments, prematurely made, have been unprofitable. The troubles entailed by extremely low prices for coal and the locking up of capital have been aggravated by the reiterated misstatements of unscrupulous persons. The corporation is financially strong. Its property is enormous in extent and value, and admirably cared for by men of superior qualifications. The markets which they have opened for coal make possession of the leased lines necessary and profitable. The loss which nominally accrues will doubtless soon give place to a direct profit. With coal at reasonable prices, which cannot long be withheld, success equal to that of the past is assured."

The report has the following addendum:

"Since the foregoing report was written, the Board of Managers has executed a mortgage of $10,000,000 upon the company's property in Pennsylvania. This mortgage covers and includes the bonds of 1894, retires those due in November, 1877, and takes up the floating debt of the company—say, net, $1,500,000; leaving a balance of $2,000,000 bonds, which, if required to be issued, will be the only addition to the present debt of the corporation, and will provide means to meet any contingency likely to arise before Jan. 1, 1880, even should there be no increase in the current profits, which seems hardly probable."

### A New Steam Canal Boat.

The Buffalo Commercial says that A. C. McGowan, of Frankfort, in this State, has invented and built a new Steam Canal boat, and then adds:

The general design of this boat is on the Baxter plan, but she contains several important improvements suggested by experience. She is 98½ feet long, and has clear lines and is well adapted to cut the water forward and feed the propeller wheel aft. She is stronger than the Baxter boats, having 37 more timbers and bolts with nails in place of the ordinary drift bolt. She has two cylinders, 4½ inches in diameter by 14 inches stroke, equal to about twenty horse power. The boiler is an improved return flue, and is considerably larger than those carried by the Baxter boats. She is propelled by a wheel five feet nine inches in diameter. Her carrying capacity is about 7,500 bushels of corn. She is to be operated with the Charles A. Girvan as a consort. The plan at present is to push the Girvan down and pull her up. The object of this is to secure greater despatch at the locks. With very few exceptions the fall is toward the east. By pushing the barge on the down trip the steamer can assist materially in getting her into the lock, while by towing when westward bound back she can pull her out, which is the most difficult part of the work. The Squires is expected to make, with her consort, both fully loaded, at least three miles an hour. Judging from her appearance she will do this, providing that the coupling will work all right.

### Self-Oiling Car Axle Box.

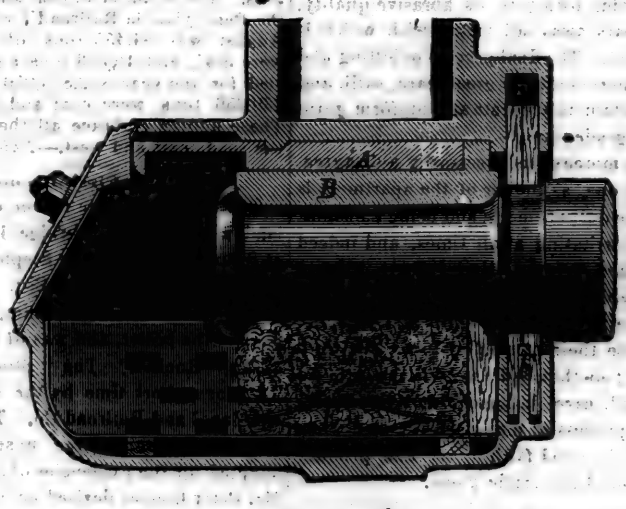
The annexed engravings represent longitudinal and transverse sectional views of what is becoming so favorably known as Tomlinson's Improved Self-Oiling Car Axle Box. This box is exclusively used by the Government on railroads in the East Indies, one of which is the Bombay, Baroda and Central India Railway. The same description of box is in use on the Boston and Albany, the Utah Central, Ohio and Mississippi, and other steam railroads at home and abroad; it is being tried on some city railroads with so far good results. The good features claimed for this box are: that it is not only self-oiling, but that by its peculiar construction it prevents all overflow of oil, excludes all dust and dirt, insures thorough lubrication, and consumes a small amount of lubricant in proportion to the distance run. These advantages are very great ones, and are

appreciated by railroad men. Economy in the consumption of oil, the slight wear of brasses, and the durability of the whole box, are certainly strong recommendations for its general use. We have carefully examined the box, seen authentic certificates from leading railroad officials, and commend it to the attention of railroad companies, as Mr. Tomlinson will furnish a trial box without charge to any railroad company wishing to try it. One of the certificates referred to consists of a letter from Mr. Owen Tomlinson, the patentee in India, in which he states that these boxes have run 82,000 miles without re-oiling on the Bombay, Baroda and Central India Railway; and another from R. C. Hornby, Superintendent of the Locomotive and Carriage Department on the same road certifies that the cost was one cent and five mills per 1000 miles per box. The saving is about one half in brass and in oil, for the brass used with the box is lighter than that generally used, and there is no leakage or overflow of oil.

Reference being made to the engravings the construction of the invention will be clearly understood.

The new features consist, first, in the improved iron keep, A, which is fitted to the axle box so as to secure the brass bearing, B, in its proper place, and at the same time to admit of the easy removal of the latter when desired. It will be observed from Fig. 2 that the brass bearing forms a kind of dovetail joint with the keep. This arrangement is calculated to save much of the superfluous metal now used only for holding the brasses, and which cannot in

Fig. 1.



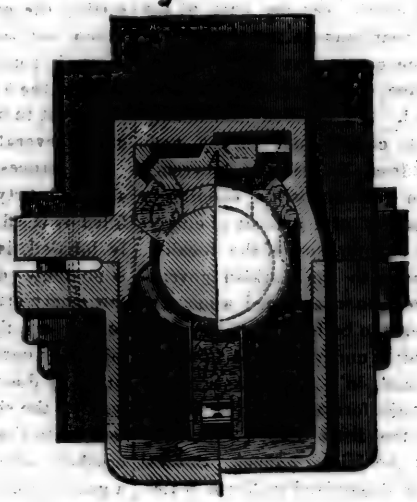


Fig. 2.

TOMLINSON'S IMPROVED SELF-OILING CAR AXLE BOX.

any way be brought into contact as surface bearing.

Another improvement lies in the stuffing boxes. These are found at C, Fig. 2, one on each side of the brass bearing. They are cast in the top part of the axle box. No cushion plate or other appliance is necessary for the purpose of supporting or keeping the pads in position. Each receives a pad of felt extending the whole length of the journal, and which, by capillary action, becomes supplied with oil from the surface of the axle. The lubricating box, D, is situated in the oil reservoir of the axle box, and is partitioned therefrom by plates of metal, in which apertures are made, as shown in Fig. 1. This box is also filled with felt, which is kept pressed against the axle by the spring and plate, E.

In order to prevent overflow, the contrivance of the wooden washer, in connection with a center tongue of iron cast in the groove in which it is fitted, as shown at F, Fig. 1, is used. This center tongue projects higher than the outer flanges, so that it on one hand, prevents rain drift from entering the boxes, and the consequent overflow of oil; and on the other, it prevents escape of oil from within. It also serves to exclude dust and grit. The two parts of the wooden washer are caused to fit closely on the axle by means of a small steel camber spring (not shown), fixed to the outer edge of each half of the washer, which forces the parts together. There is a slight clearance at the lap joint for wear of the washer; as the latter becomes gradually worn by the axle, this clearance is closed up by the springs.

Further information may be had from Mr. J. B. Tomlinson at G. L. Kelty's, 80 and 82 White Street, New York City, or Wm. Knifton, Black Hawk, Gilpin County, Colorado.

**Pittsburg, Wheeling and Kentucky R. R.**

Messrs. Mackin & Co., of Pittsburg, Penn., have been awarded the contract for the construction of the Pittsburg, Wheeling and Kentucky Railroad. The contract price is $35,080. Work was to have been commenced on the 27th ult., to be prosecuted in such a manner that track laying may begin at the junction with the Pittsburg, Cincinnati and St. Louis Railway within 30 days from the date of the contract, and continued at the rate of three miles per week, so that the entire roadbed will be completed within ninety days. Capt. John McClure of Wheeling, President of the Company, says that the road will be completed and the cars running by the 1st of December next. The time between Wheeling and Pittsburg will be two and a half hours, instead of four and a half as it is now over the Cleveland and Pittsburg Railroad.

☞ The branch of the Allegheny Valley Railroad, to be known as the Allegheny, Kennerdell and Clintonville Railroad, has been graded and ballasted between Scrubgrass and Kennerdell, and the wooden truss bridge now being thrown across the Allegheny river at Scrubgrass will be finished in two or three weeks. Although a branch of the Allegheny Valley, the road will be owned by a separate company.

**Ligonier Valley Railroad.**

The Ligonier Valley Railroad, extending from Latrobe, on the Pennsylvania Railroad to Ligonier, a distance of 10¾ miles, has been put in shape for completion. The Pittsburg Chronicle says that a sufficient amount of the stock has been transferred by the officers of the road to Judge Mellon, of that city, to justify him in entering into articles for the completion of the road in six months from September 1. He is to finish the grading, put on the superstructure and rolling stock, and operate it for the stockholders, and also to share in the earnings, as a stockholder, to the extent of four-fifths. The officers of the road are: President, Harvey Baker; Directors, Robert Graham, W. H. Covode, W. A. Bear, A. A. Johnston, W. D. McGowan, Jacob Brennier and N. M. Marker.

☞ Mr. Justice Strong, of the United States Supreme Court, has appointed Col. Calvin H. Allen, recently Manager of the New Orleans, Mobile and Texas railroad, Receiver of the Jacksonville, Pensacola and Mobile railroad. The Receiver is authorized to put the property in good order. This action is intended to secure the lien of the Dutch bondholders, which is based upon terms of eight per cent. bonds of the State, several million of which they hold.

☞ The Southern Pacific Railroad Company have obtained the right of way for the connection of the Santa Monica branch with their main line.

### Turkey Emery.

The use of emery in arts and manufactures has of late years been so extensive that some information respecting it and its application may prove of interest to our readers. And first what is it? It is an amorphous, compact, opaque variety of corundum (which is a hard mineral consisting of crystalline alumina) and is of the same species of which sapphire, and oriental ruby are varieties; it agrees with them very closely in composition, hardness, and specific gravity; but in appearance it is dull and opaque, and though its masses are very compact they are not crystallized. It is something called Ferruginous Corundum, because it contains a certain quantity of iron. The crude emery-stone has never been found in any considerable quantity for consumption, except in the countries bordering on the eastern part of the Mediterranean Sea, near Smyrna, on the Asiatic Continent, and on the contiguous island of Naxos; in the latter place, it is very abundant—at Cape Emery or Emeri. A great deal that is used at present in the arts comes from Turkey, near ancient Smyrna, and from Naxos. Dr. Lawrence Smith, the American geologist while residing in Smyrna, made a discovery of a deposit of emery. In 1847 he made an examination of the locality, reported his discoveries to the Turkish government, and the business soon assumed a mercantile form. There seems to be here the same geological deposit reaching under the sea from the continent to the island, in a similar manner to that seen in the basaltic formation of the Scotch Fingal's Cave, and the Irish Giant's Causeway that stretches under the Irish Channel. Several years ago a mine was discovered in North Wales, and since then another near Chester, Mass.

As regards the quality of emery from this latter place, it is inferior to the Turkey Emery stone, indeed, it has been stated that the commercial Chester emery is very far from being pure emery. The contractors who work the Turkish and Greek mines are obligated to mine at each from two thousand to two thousand five hundred tons per annum. The maximum annual product, and the total consumption of crude emery for all uses, does not exceed five thousand tons. Probably the largest establishment for preparing emery for the market are the Wellington Mills Co., London, who claim to consume one fourth of all that is yearly mined at the mines in the East. The total area of the mills is 38,800 square feet; the building, a handsome one, has a frontage of 155 feet, and runs back for a distance of 340 feet on a straight line. There is a continuous range of workshops 500 feet long by 30 feet wide and three stories in height, in these the various processes of manufacture are carried out. The products from these mills are imported in great quantities, and American manufacturers who have use for emery are familiar with the London ground emery, and emery cloth, which are so conspicuously marked with copyright lables.

The mining of the emery is of the simplest character, the natural decomposition of the rock in which it occurs facilitates its extraction. The rock decomposes into an earth in which the emery is found embedded. Its color varies from red brown to dark brown. The crude stone is shipped in blocks of various sizes, from 150 pounds in weight down to pieces the size of an egg; but large stone is preferred, being more compact and hard.

The large pieces are broken up by the emery manufacturers, by use of steam hammers or hand sledge hammers, to a size convenient for placing in Blake Brothers' American patent crushers, which machines reduce it to the size of a walnut; these are again placed under stampers, rollers, and crushing machines, until the whole is reduced to the required fineness. It is then conveyed to the sifting machines to separate the various grades of grain; the meshes of wire used for obtaining the various grades vary from sixty holes to many thousand holes in the square inch. The manufacture of crushed emery is very destructive to all the machines employed in crushing and assorting the grain, owing to its abrasive quality, which fast wears away all metal with which it comes in contact. The final process of sifting and grading the emery requires great care, skill, and judgment to obtain an accurate and uniform grain of the several grade-sizes.

The process moreover is necessarily a disagreeable and dirty one, as the air of the apartment is filled by the fine dust of emery, and being constantly inhaled, is irritating at all times, and indeed is no doubt often permanently injurious. Hence few emery-crushing proprietors are willing to personally acquire the requisite skill, and will not faithfully devote their own effort to see the work properly done; so that bad emery is the rule for want of the skill, care, judgment and patient attention to the process of manufacture, even when crushers have the good faith to try and produce a good selection of the crude stone.

### Virginia State Debt.

With reference to the debt question in Virginia, as an element entering into the present political campaign, the Richmond Whig, of 21st ult., says:

The Conservatives of Virginia are committed, positively committed, against repudiation; and they are with equal positiveness committed in favor of all fair and honorable means for effecting a readjustment of the State debt. The truth is that, in obedience to the will of the best people of Virginia, expressed in the Conservative Convention a few days ago, the fact is fixed that readjustment will be one of the results of the legislation of next Winter here. If there are gentlemen in the State who mean to persist in paying full interest on the debt when they know that an increase of taxation is indispensable to that end, and when at the same time, too, they know that an increase of taxation is absolutely impossible, such gentlemen had better at once turn their backs to the future and their faces to the past. They have no political vitality left in them. And if there are others who are in favor of a repudiation of the State debt, they had all better club in and buy a second-hand omnibus and start in a trot for Georgia.

☞ Articles of incorporation have been filed with the Secretary of State of California of the Berry Street Railroad Company of San Francisco. Capital, $50,000, in shares of $100 each. Directors—D. A. McKinley, J. McKinley, William E. Miller, William M. Rider and E. M. Herrick.

☞ The Virginia (Nevada) Enterprise says that the question of a new railroad to the Truckee is still being agitated, and it is the belief that the citizens of Reno and Virginia will build the road by private subscription.

### The Coal Trade.

For the week ending the 18th inst., the total tonnage, as reported by the several carrying companies, amounted to 295,125 tons, against 352,809 tons in corresponding week last year, a decrease of 57,684 tons. The total amount of anthracite mined for the coal year is 12,316,511 tons, against 10,154,875 for same period last year, an increase of 2,161,636 tons. The quantity of bituminous coal sent to market for the week amounted to 44,236 tons, against 76,548 tons in corresponding week last year, a decrease of 32,312 tons. The total tonnage of all kinds of coal for the week is 339,361 tons, against 420,448 tons in corresponding week last year, a decrease of 81,082 tons. The total tonnage of all kinds of coal for the coal year is 14,304,493 tons, against 12,387,918 to same date last year, an increase of 1,916,575 tons. The receipts at Perth Amboy for the week ending on the 18th instant were 19,836 tons, the shipments 27,572 tons, leaving a stock on hand of 79,085 tons. The quantity of coal and coke carried over the Pennsylvania Railroad for the second week of August was 84,455 tons of which 67,513 tons were coal, and 16,948 tons coke. The total carried for the year is 2,815,950 tons, of which 2,239,256 tons were coal and 524,719 tons coke. These figures embrace all the coal carried over the road, east and west.—*Phila. Ledger, Aug.* 27.

### The First Locomotive.

The first locomotive run on rails outside of England was the "Stourbridge Lion." It was built at Stourbridge, Eng., by Stephenson & Co., to the order of Horatio Allen, Esq. It was one of two locomotives ordered by him, had two straight flues in the boiler, and was of the form used prior to the "Rocket." The "Stourbridge Lion" was used for a short time by the Delaware and Hudson Canal and Railroad Co. This was in August, 1829. The engine was unsuccessful, and not adapted for the exigencies of American Railroads. Mr. Peter Cooper devised an engine which solved the difficulty. Early in 1830, an engine was built at the West Point Foundry, N. Y., under the direction of Mr. Adam Hall, for the South Carolina Railroad. The "Robert Fulton," the first English passenger-engine ever run in the United States was built by R. Stephenson & Co., for the Mohawk and Hudson Co. The drawings which came with it were dated July 4, 1831. In the winter of 1832-'3, this engine was altered, and re named the "John Bull."

☞ The Ohio Falls Car Co., of Jeffersonville, Ind., shipped on the 24th ult., via the Jeffersonville, Madison and Indianapolis Railroad, thence to Peoria, Burlington and Minneapolis, a train consisting of four first class coaches, and three cabooses, being a part of fifteen cars this company is building for the Minneapolis and St. Louis Railway Co. The cars are beautifully finished and elegantly upholstered, and are provided with the Miller Platforms and the Westinghouse Air-brake. The trucks, which are of the best design, are provided with quadruple springs from the celebrated spring factory of French & Co. The cabooses are of a new design, and provided with all modern improvements.

☞ The Lebanon Springs Railroad, (from Bennington to Chatham Four Corners,) which has been operated by the Central Vermont Railroad for several years, but abandoned by them on the 20th ult., was re-opened for travel and freight on the 24th by the first mortgage bondholders. F. C. White of Bennington, Vt., has been appointed Superintendent.

# American Railroad Journal.

**Saturday, September 1, 1877.**

### Financial and Commercial Affairs.

Money has been ruling stronger in price, under a more active and urgent inquiry for accommodation from speculative and mercantile borrowers, and, toward the close, of the London advices of an advance in the discount rate at the Bank of England to 3 per cent; the latter considered as designed chiefly to check the outflow of specie to America, of which shipments to the extent of nearly $3,000,000 have been already reported. At the higher figures of the week responsible borrowers have been enabled to provide for their wants without much difficulty. Notwithstanding the reports of two or three failures of some moment in mercantile circles, lenders have been, as a whole, prompt in responding to the applications of their customers. Call loans have been quoted here at the close at 2@5, with most of the important negotiations reported on the basis of 3@4 per cent; and very choice to prime mercantile credits are rated at 5@7, mainly 5@6 per cent per annum for the best names. The crop movement has made further inroads on the currency reserves of the banks. The City banks, last week, reported an increase in their specie reserve and in their average of loans and discounts, with a falling off in circulation, as also in their legal tender board, and in the average of the deposits. The loan and discount average was augmented $1,008,800, and the item of circulation contracted $30,800. The average of deposits was diminished $388,800. The legal tender reserve was reduced $1,907,000; and the specie average enlarged $809,800.

The City banks reported their average of gold last week at $14,259,000, as against $20,946,500 same date last year; and their greenback average at $50,789,000, as against $56,939,000 on Aug. 26, 1876. Their deposits stood at $213,026,800, against $226,542,900 same time in 1876. The loan item was $244,899,600 against $254,448,400 a year ago.

The City bank net reserve of specie and legal tender notes now shows an excess over the legal requirement of reserve to liabilities of $11,791,425, as against $12,792,050 the preceding week, $9,039,775 the week ending 14th April (the lowest footing of this item thus far in the current year,) and $24,781,800 on January 27 (which latter was the highest aggregate reached this year.) The City bank exchanges in currency reached $420,915,000, or a daily average of $70,152,500.

The U. S. Sub-Treasury in this city closed the week ending on Wednesday with a currency balance of $49,194,443, against $50,414,889 the preceding Wednesday; and a coin hoard of $83,250,859, against $83,654,575 on the return of a week earlier. The Customs revenue of the port during the past week was $2,146,406.

A fair demand has been reported for Government securities which have been fluctuating in price, in sympathy with the changes in Gold, leaving off more firmly. At the close on Wednesday the current quotations were as follows:

United States currency sixes, 128½@124; do. 6s, 1881, registered, 110½@110¾; do. coupon 111½@111¾; do. 1865, new, registered, 106¼@106½; do. coupon, 106¼@106½; do. 1867, registered, 108¼@108½; do. coupon, 108⅜@108½; do. 1868, registered, 111@111½; do. coupon, 111@111½; do. ten-forties registered, 108¾@109; do. coupon, 112⅛@112⅜; do. five per cents 1881, registered, 108⅛@109⅛; do. coupon, 108⅞@109⅛; do. 4½ per cents, 1891, registered, 106¾@107; do. coupon, 108@108⅛; do. 4 per cents, 1907, reg., 104⅛@104¼.

The amount of U. S. bonds held by the Treasurer of the United States, as security for the National Bank circulation, is $337,485,750, and $18,656,000 as security for public deposits.

An unusually active investment inquiry has been noted for State and Railway bonds which have been found, in the instance of the more substantial loans, in quite moderate supply, leading, on the free purchases, to a marked improvement in prices. And in the line of Railway and Miscellaneous share property the business of the week has been on an extensive scale, nearly the whole list participating in the unusual activity, which has also been accompanied by remarkable buoyancy in values, the rise, in most instances, having been quite important, under the influence immediately of the speculative manipulations, which, as conducted in the interest of wealthy and prominent operators, have given occasion to much comment in the daily newspaper press. The transactions on Monday and Tuesday, especially on Tuesday of this week were indicative of a reaction from the highest figures, but this was deemed of a temporary nature, and likely to be followed by a further advance, in favor of which have been urged the bountiful harvest, which must lead to a more liberal and lucrative volume of traffic for the railway carrying interest, and serve to strengthen public confidence in the future course of financial values. On Wednesday, the earlier dealings in the Stock line were at a material reduction of values, due to the uneasiness occasioned by the reported troubles among the savings banks at Chicago, but later in the day a rally occurred, which was fairly maintained to the close.

On Wednesday of this week the cash balances of the Treasury Department at Washington were: of Currency, $11,995,383; special deposit of legal tenders for the redemption of certificates of deposit, $57,520,000; Coin, $102,089,766, including of Coin certificates, $88,426,500.

The Secretary of the Treasury has instructed the U. S. Assistant Treasurer at this port to sell at noon on Saturday, Sept. 1, $1,000,000 in gold to provide for the redemption of United States notes to be retired as an offset to the increased issue of national bank notes.

Gold has been fairly active but again lower in price, influenced by the reports of specie shipments from Europe for this country. The customs call has been moderate. The export drain unimportant. The extremes of the price during the week have been 103⅞@104⅝, (the very low quotation of 103⅞ having been made on Saturday, Aug. 25) closing at 104⅛, as against 104⅛ on Wednesday of the preceding week. The lowest point previously touched by gold was 101¼, on Friday, March 2d. The specie outflow last week was only $94,060, making the total exports of specie hence since January 1, $28,738,191, against $38,975,728 the same time in the preceding year. The imports of specie at this port since January 1st have been $8,099,252, as against $3,120,001 same time last year. The Customs demand for gold last week averaged $357,734 per day. Foreign Exchange opened heavily and irregularly, but, under the advices from London, chiefly of the advance of the discount rate by the Bank of England, ruled stronger toward the close, though not remarkably active.

Bankers' sixty day bills on London closed on Wednesday at $4 81⅛@$4 82⅛; sight bills on London at $4 84½@$4 85⅛ to the £ sterling. The week's imports of Dry Goods and general merchandise were to the specie value of $5,552,058 as against $4,724,681 the corresponding week of 1876. The week's import entries of Foreign Merchandise at New York included $2,126,058 of Dry Goods, and $3,426,000 of General Merchandise. The week's export of Domestic Produce and Miscellaneous Goods from this port were $4,867,276, against $5,540,505 same week in 1876.

The aggregate of the outstanding U. S. currency of all denominations, August 1st, was $379,384,725. The outstanding amount of legal tender notes is $359,094,220. The National bank circulation is now $315,038,171 of currency notes and $1,425,770 of national gold bank notes.

National Bank notes received at the Treasury Department in July for redemption were to the amount of $3,917,000.

The income of the Government from internal revenues last week was about 2¼ millions, and during the fiscal year ending June 30, 1877, $118,488,279, against $116,700,732 in the preceding fiscal year; and from Customs last week about 2⅞ millions, and in the last fiscal year $130,439,419, against $148,071,985 in the preceding fiscal year.

Business in the leading kinds of domestic produce has been fairly active especially in Breadstuffs which have been quite freely purchased for home use and shipment, leaving off, however, less buoyantly as to values. Provisions and Cotton have been in fair request but generally weak as to price. Petroleum has been more freely dealt in, closing higher. Foreign merchandise has been in fair demand in most instances, though at irregular prices.

Hardware, Boots and Shoes and Dry Goods, have been in better request and prices of seasonable classes of stock have been generally quoted firm.

Metals have been in moderate demand with prices quoted weak. Eglinton Pig Iron quoted at $24@$24 50; Glengarnock $25 50 @$25; Coltness $26@$27; No. 1 American Pig at $18@$18 50; No. 2 do. at $17@$17 50; (with sales of 2,300 tons at $17 25.) Forge $16@$17; American Rails at works $32@$36; Old Rails $18@$19. Wrought Scrap $22@$25. Steel Rails, on the basis of $45@$47 50 at the mills. Ingot Copper less active on the basis of 18@18¼ for early delivery.

In the line of Ocean freights an active business has been reported especially in the Grain interest, and rates have been quoted stronger, though the market closed tamely. Liverpool steamer rates at the close for Grain, quoted at 10d.@11d, Provisions, 50s.@70s.; Tallow, 40s.; Leather, 60s. Measurement Goods at 20s.@25s. per ton; Cotton, ½d. per lb., Tobacco 35s.@40s. Liverpool, by sail, Cotton, 7-32; Grain, 9½d.@10d. Oil Cake and Slate, 20s.; Measurement Goods 17s. 6d.@2Cs.; Tobacco 30s.@35s.; Grain rates on charter hence for Cork and orders left off at 7s.@7s. 3d.; for the Continent at 7s.@7s. 6d., do. for Italy at 6s. 9d.@7s., and from Baltimore for Cork and orders, 6s. 9d.@7s. 3d. and from Philadelphia at 7s. @7s. 3d. per quarter. Refined Petroleum hence for Cork and orders, 4s. 9d.@5s. 6d., for the Continent, 4s. 6d.@5s. per bbl.

☞ Interest due September 1, on $477,000 Chicago and Michigan Lake Shore Railroad 8s of 1889, will be paid at No. 26 Sears Building, Boston. These bonds are a first mortgage on the first part of the road from New Buffalo to St. Joseph. All other bonds of this road are in default.

☞ Baring Bros. & Co. announce in London that on and after September 1st they will pay the interest on the sterling loan of the Eastern Railroad of Massachusetts.

NOTICE TO THE HOLDERS OF

**Alabama & Chattanooga Railroad**

**FIRST MORTGAGE BONDS.**

The circular of Messrs. EMILE ERLANGER & CO., of London, containing their proposal to the bondholders, can be obtained, together with forms for subscriptions, by applying to the undersigned.

Bondholders' subscriptions will be received until the 10th of September next at the office of

PLOCK & CO., No. 51 William St.

New-York, 16th August, 1877.

**FISK & HATCH,**

**Bankers,**

No. 5 Nassau St., New York.

U. S. Government Bonds bought and sold in amounts to suit investors: also, Gold, Silver and foreign coins: Deposits received in Currency or Gold, and interest allowed on Balances: Special attention paid to Investment Orders for Miscellaneous Stocks and Bonds.

Illinois Central Railroad Company,
New York, July 18, 1877.

A DIVIDEND OF TWO (2) PER CENT HAS been declared by this company, payable on the 1st day of September next, to the holders of the capital stock of this company as registered at the close of the 14th day of August next, after which, and until the 5th day of September, the transfer-books will be closed.

L. V. F. RANDOLPH, Treasurer.

☞ One of the attractions at the Louisville Exposition will be a mammoth locomotive built by the Louisville, Nashville and Great Southern Railroad Company. It is of the consolidated pattern, with four driving wheels on each side and single truck in front. The boiler is made entirely of steel; and the machinery, when put together, will weigh 94,000 pounds. It is intended for the freight service, and will pull a train of thirty-five loaded cars.

☞ The Union Pacific Railroad Company will redeem on the first of September, at the Union Trust Co., New York, $142,000 of the Sinking Fund 8s, recently called by lot, being one per cent of the outstanding bonds—leaving $14,046,000 to be called.

☞ A combined turnout, switch and turntable has just been completed by the New York Elevated Railroad, at Fifty-ninth street. This will permit the engineers to bring their engines to the front of the trains, and do away with the dangerous system of backing down.

☞ J. S. Morgan & Co. announce in the London Times that the coupons due 1st of September of the United New Jersey Railroad and Canal Company loans of 1869, 1871, 1873 and 1875 will be paid on and after that date.

☞ Drexel, Morgan & Co., of New York, announce that they will pay off the Delaware and Hudson Canal bonds due in 1877, in cash, or will exchange for them bonds of the company issued under the same mortgage, due in 1891.

☞ Colonel Samuel A. Black has been appointed General Superintendent and Land Commissioner of the Pacific Division, Northern Pacific Railroad, with office at Kalama, Washington Territory, in place of J. W. Sprague, resigned.

### Queries and Replies.

Enquiries to be answered must be appropriate to the columns of the JOURNAL.

T. H. B.—Please inform me the strength of iron and steel rails? Ans. Ordinary rails, supported on bearings 5 feet apart, bear from 36,000 lbs. to 50,000 lbs., applied at the center; steel rails not less than 56,000 lbs.; the tensile strength of steel rails, 94,000 lbs. per square inch; iron rails, 55,000 lbs. per square inch. Much of course depends on the cross section area of the rail and quality of metal; rails with 5 inches area, weighing 50 lbs. to the yard, will for one mile weigh 78 tons (2,240 lbs. to the ton), 11 cwt. 48 lbs.

LOCOMOTIVE ENGINEER.—In calculating the heating surface of locomotive boiler tubes, must the outer or inner circumference be taken? Ans. The outer circumference, for although the fire is only in contact with their inner circumferences, the whole thickness of the tube becomes heated, so that the outer circumference has the same temperature to heat the water as the inner circumference receives from the fire.

T RAIL.—What are the different railroad gauges now used for steam and horse railroads? Ans. They are various. The original width of the coal tram-roads in the North of England virtually determined the British gauge, 4 feet 8½ inches, which was the gauge of wheels of the common vehicles of the country. This is now the standard railroad gauge, although there are broader and narrower gauges varying from 6 feet to 3 feet and perhaps less. The horse railroads throughout the country are generally 4 feet 8½ inches.

T. H.—Is boiler iron weakened when subjected to high temperature? Ans. By Mr. William Fairbairn's experiments, and those by the Franklin Institute in Philadelphia, it was ascertained that up to a certain point strength was increased. Mr. Fairbairn, as far back as 1857, found that the strength of ordinary Staffordshire plates, either with or across the grain, remained unaffected at all temperatures from 0° to 400° Fah. At higher temperature the strength declined. The more recent experiments by the Franklin Institute are published in their Journal, and the results are accepted as being accurate.

MACHINIST.—Does iron expand at boiling point, 212° Fah.? Ans. Yes. By increasing the temperature of iron from 32° to 212° Fah., the expansion in length is 1 in 847 and in bulk 1 in 282.

B.—Why is a space left between the ends of rails on a railroad track? Ans. Iron rail tracks are laid with reference to the law that the extent of the expansion and contraction of the same metal varies with variations of temperature. The spaces are left to prevent the track from "lifting."

W. O.—A journal of a propeller shaft in my steam yacht is continually heating, what is the best remedy? Ans. Wash the journal and brasses well out if possible with water from a hose; remove the oil cup, and in its place put a tin or copper tunnel such as is used in filling bottles. Put in this a mixture of soft soap and water of such a consistency that it will drop constantly like oil through the oil hole in the cap on the journal which may be first well lubricated with the mixture. The water cools and the soap lubricates. We have found this expedient succeed when sulphur, black lead and other ingredients failed.

W. T. H.—How can I distinguish wrought and cast iron from steel? Ans. Produce a bright surface by polishing or filing, then apply a drop of nitric acid; after allowing it to remain there for two minutes, wash off with water. The spot will then look a pale ashy gray on wrought iron, a brownish black on steel, or deep black on cast iron.

VENTILATOR.—What is the relative weight of air and water? Ans. At 60° Fahr., and with the barometer at 30 inches, 100 cubic inches of air weigh 30.935 grains; and water (the standard of specific gravity for fluids) weighs just 816 times as much as air.

W. H.—What is the difference between a "Tramroad" and a Railway? Ans. The wooden tracks, adopted more than two centuries ago in the coal mines of England, were before long covered with thin plates of iron to increase their durability and to lessen their friction, and subsequently replaced by tracks of iron. While a flange on their sides was used to keep carriages upon them, they were "tramways," but when the flange was transferred from the road to the wheel, the trackway became a railway.

### Liability of the Government for Suspending Work Contracted for.

The following decision has been rendered in the Supreme Court of the United States:

No. 798.—The United States, appellants, vs. Joseph Smith.—Appeal from the Court of Claims.—The only questions presented in this case relate to the liability of the United States for damages growing out of the suspension of the work under the contract sued upon. In effect the contract bound Smith to furnish the materials and erect the buildings, the labor being performed by the soldiers at the fort, except to the extent that skilled workmen were necessary. There was no time specified within which the work must be done. Neither was there any power reserved by the United States to direct its suspension. Under such circumstances the law implies that the work should be done within a reasonable time, and that the United States would not unnecessarily interfere to prevent this. In Clark's case (6 Wall., 546) it was decided that the United States were liable for damages resulting from an improper interference with the work of a contractor, and in Smoot's case, (15 Wall., 47,) that the principles which govern inquiries as to the conduct of individuals inrespect to their contracts, are equally applicable where the United States are a party. The same rules were applied in the case of the Amoskeag Company. (17 Wall., 592.) Here the work was stopped by order of the United States. Smith asked to be released from his contract unless he could go on. This was refused until the expiration of 60 days, when he was allowed to resume. As between individuals, certainly this would be considered an improper interference, and damages would be awarded to the extent of the loss which was the necessary consequence of the suspension. The United States must answer according to the same rule. In this respect we cannot consider this case different in principle from that of Clark, (6 Wall., 546.)

The Court of Claims has found the amount of damages to have been $5,000; that is to say, that sum, in its opinion, from the evidence before it, was necessary to place Smith in the same condition he would have been if he had been allowed to proceed without interference, and not allowing for loss or injury to his materials, which he might have prevented by the exercise of reasonable care and prudence. This rule of damages, as an abstract proposition, is clearly right. Unless, therefore, there appears in the record some error growing out of the estimation of the amount, the judgment below should be affirmed.

By our rules in reference to appeals from the Court of Claims (Rule 1, Sec. 2) that court sends here its finding of facts as "established by the evidence, in the nature of a special verdict." The evidence is not sent up. This finding is conclusive unless impeached for some error in law appearing on the record. Here, in effect, the error complained of is that the court refused to state the items of its account of damages. This we have not required, and while under the practice we have established liberal provision should be made for review of questions of law, it seems to us that in this case the claim of the United States goes beyond anything we ought to grant. The court might with propriety have been asked to state in a finding whether any particular item of claim or damage was included in its estimate, and if so, what amount. To such a finding exception might in proper form be taken, and then we could be called upon to decide whether such an item was legally the subject of compensation in an action for damages.

The United States can be required to make compensation to a contractor for damages which he has actually sustained by their default in the performance of their undertakings to him, but this is the extent of their liability in the Court of Claims. More than compensation for damages actually sustained can never be awarded against the United States. In this case the United States asked the court to find, first, the amount of damage done to the building on account of exposure to the Winter storms in its unfinished condition; second, the amount resulting from the retention of the skilled labor, &c., and, third, the deterioration in the value of materials. All these were legitimate subjects of inquiry by the court in making up its final estimate, but we know of no rule of law or practice which requires a court or jury to itemize the elements of the calculation by which it arrives at its final result. In this case the court was not asked to say whether it included this or that supposed element of compensation in its judgment, but the only report seems to have been to ascertain the items of calculation so as to determine whether the proof supported them. The whole contest evidently was as to the sufficiency of the evidence, not as to the liability of the United States if the facts as claimed were established by proof.

In the estimation of damages the Court of Claims occupies the position of a jury under like circumstances. Damages must be proved. The court is not permitted to guess any more than a jury, but like a jury it must make its estimates from the proofs submitted. The result of the best judgment of the triers is all that the parties have any right to expect. As the record presents the case, we see no error in the court below. The judgment is, therefore affirmed.

The Chief Justice delivered the opinion.

### Elevated Railroad Cabs.

For the purpose of accommodating passengers arriving and departing by the various railroads terminating at the Grand Central Depot, the managers of the New York City Elevated Railroad Company have established a line of cabs to run between their Station at Forty-second St., and the Depot. The cabs will connect with each train that arrives at the Depot, and with each train on the Elevated Railroad. The time between the Station and the Depot will be eight minutes. The time from South ferry to the Depot will be thirty-five minutes, from Liberty street thirty minutes, from Warren street twenty-eight minutes, from Canal street twenty-four minutes and from West Eleventh street eighteen minutes; these several points representing the stations on the Elevated Railroad nearest the different ferries. Each cab will carry four persons, and the fare, which includes also the fare upon the Railroad, will be twenty cents.

## BOOKS AND MAGAZINES.

A Treatise on the use of Belting for the Transmission of Power. By John H. Cooper, mechanical engineer. Fully Illustrated. Philadelphia: Claxton, Remsen & Haffelfinger, 1877.

This work, exhaustive in character, is creditable to both author and publishers. The former has evidently given much attention to the collection of facts, figures, notes, and the results of experiments and long practical experience, and the latter have presented them in an attractive and highly useful book. For the manufacturer, engineer and machinest, it will prove a valuable aid as the greater part of the rules and calculations are given in simple formula. The materials have been selected from the best available sources, foreign and American. The first five chapters which make up the greater part of this treatise, fitly represent the practice of the workshop and factory. Diagrams and good wood cuts are given as illustrations of the varieties of belting, the manner of putting on belting, the rules for belting, rope transmission, frictional gearing, &c. The book should be in every mill-owner's, manufacturer's and master mechanic's library.

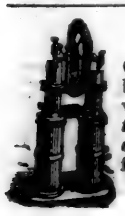
The Pistol as a Weapon of Defence in the House and on the Road. How to choose it and how to use it. New York: The Industrial Publication Company, 176 Broadway.

This little book is from the pen of an expert, or one who knows a great deal about the subject of fire arms. We suspect the author of "Shooting on the Wing" is the author of this book, as it is written in a vivacious, interesting and practical manner. It is full of instruction and does not omit to give good reasons for the instructions—the why and the wherefore, what to do and how to do it. Its contents are: the Pistol as a weapon of defence; The carrying of Fire-Arms; How to select a pistol; different kinds in market; ammunition, different kinds; How to choose powder; the best form of bullet for the pistol; How to load; regulating the charge; proper charge to use; Care of the pistol; how to clean it; How to handle and carry it; How to learn to shoot; Practical use of the pistol; where to strike your antagonist; how to protect yourself.

☞ The earnings of the Philadelphia and Erie Railroad for the month of July, 1877, were $163,501 48, the expenses $156,547 69, and the net earnings $6,953 79.

SELF-OILING

**CAR AXLE BOX.**



No Waste of Oil. No hot journals. 82,000 miles run without re-oiling. Also

**SHAFTING BOXES.**

Call and examine boxes and certificates, or send for descriptive circular. J. B. TOMLINSON, 80 & 82 White St., New York.

Or, MARSHAL B. STAFFORD, JAMES H. COVEL, 93 Liberty Street, New York.

☞ Trial Box furnished free on application.

**Rider Compression Pumps,**

For supplying R. R. tanks with water. Can be run by any ignorant trackman or baggage master. Uses no steam, has no valves to get out of repair. *We guarantee our 10 inch engine to pump water for one half cent per 1000 gallons.* Write for circulars and information.

CAMMEYER & SAYER, 93 Liberty St., N. Y.

**INCOMBUSTIBLE MINERAL WOOL.**

THE BEST AND CHEAPEST

**Insulator of Heat or Cold.**

SEND FOR CIRCULAR.

**Alexander D. Elbers,**

26½ Broadway, New York.

P. O. Box, 4461. Agent for the Patentee.

**John Hartrick & Co.,**

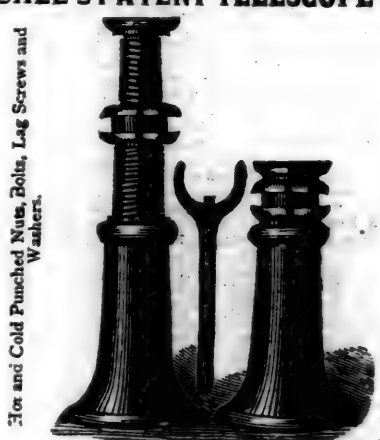
**ENGINEERS AND MACHINISTS,**

MANUFACTURERS OF

ENGINES, SHAFTING, PULLEYS, HANGERS, ETC.,

**47 Gold Street, New York.**

☞ Jobbing promptly attended to.



**Stewart's Sewer Gas Trap.**

THE PATENT SEWER GAS TRAP, PATENTED and constructed by Stewart & Co., at the Manhattan Pottery,

**DRAIN PIPE and TERRA COTTA**

Works, foot of W. 18th and 19th Sts, and Warerooms at 269 Pearl St., near Fulton St., New York, is warranted to be an effectual barrier to the admission of poisonous gas. Send for illustrated circular and price list.

**BALL'S PATENT TELESCOPE JACK.**

ALBERT BRIDGES,

MANUFACTURER AND DEALER IN

Railway and Mining Supplies and Machinery

No. 46 CORTLANDT STREET,

P. O. Box, 2843. New York.

**Forster, Ludlow & Co.,**

### Government Protection of Railroads.

The last number of the North American Review contains an article from the pen of Col. Thomas A. Scott, in which, after giving a history of the recent railroad riots, he asserts that the difficulties which compelled the reduction of the wages of employes had their origin in the panic of 1873, which was in turn the result of the creation of great debts by States, cities and corporations, which were not felt for a long time but suddenly became onerous and almost intolerable. Since that period the country has been obliged to meet its debts by actual payments from its resources and not by renewals. To do this every important industry has been compelled to practice the most rigid economies to escape loss. The experience of cotton, woolen, iron and other industries has been the same. Capital has yielded so scant returns that the men who pretend to dictate the scale of adequate wages would regard them with disdain. Thousands of establishments have been run simply to afford labor to employes and without an iota of profit to the owners. He asserts that the rolling mills of Pennsylvania would have been closed at the beginning of last winter had not the railroads anticipated their own wants by giving orders for rails months in advance of their actual requirement. In addition to this, railroad companies have favored industries along their lines by reducing the charges on local freights to the lowest figure ever known, and have moved the heavy articles used by manufacturers at prices scarcely above the actual cost, so that employment might be continued to laboring men. He complains that these efforts of railroad corporations in behalf of laboring men have been so perverted and misconstrued as to be made to appear to have been done to the disadvantage of the classes which are alone profited thereby. In speaking of the recent outrages, he declares that not over ten per cent of the employes of railroads had anything to do with them.

But the most important topic considered by him is that relating to the protection of railroads. Every other interest in the country depends upon the protection of the railroad lines; consequently their successful management requires absolute and uninterrupted freedom of movement, and to this end local, State and Federal authority should unite to secure instant and effective protection against violent interruption.

He points out the delay and danger attending the present system of quelling disturbances, as shown in the recent troubles, and significantly remarks that the only roads which could secure prompt protection "were those whose misfortunes had made them bankrupt and placed them in the direct custody of the officers of the United States Courts," who could call directly to their aid United States troops with whom no rioter dared interfere. He adds that it will hardly be contended that railroad companies should become bankrupt in order to entitle them to the protection of the United States Government.

He believes, as the above sentiment suggests, that the Federal Government should extend its protection to all highways carrying on inter-State commerce, by land or water, in which the citizens of different States are interested; and to that end he calls upon the earnest, unprejudiced and patriotic men of both Houses of Congress to discuss this grave subject independently of party lines and to enact a law which will confer upon corporations engaged in running inter-State lines of railroads carrying United States mails, the right to appear before the tribunals of the United States and petition for a process by which rioters or others interfering with the movement of such traffic, may be suppressed.

The greater portion of the article, of which the above is a brief abstract, will be found on another page of this week's issue.

### Practical Talks on Mechanical Reform.

And while we write accounts come to us of several serious accidents on railroads, attended with loss of life and limb, destruction of property, and all those sequences which follow in the train of disasters. Now the answer to an inquiry as to the cause of this or that accident is found to be in nearly every case want of watchfulness, carelessness, and common sense. A conductor backs his train on to a crowded wharf without a light, a switch is misplaced, irregularity or a late train causes a collision—this and much more the public know already. A description of such casualties in these columns would be to give a mere repetition of what has been published; but the facts that are developed by investigation only corroborate what has already been said on this subject, and make the need of rules, regulations, supervision and discipline more and more apparent. We have digressed slightly to refer to the increased number of accidents that have recently taken place; we now return to the subject of inspection.

Why, says one, we have inspectors and examining engineers already, competent men at a good salary who do their duty; only look at the certificates framed and suspended in the cabins of ferry boats, steamtugs, river and ocean steamers; does this look like carelessness, or indifference to public safety? We grant the exhibition of certificates as a reality that cannot be denied; and when the public

read them the feeling of safety may or may not be somewhat engendered, by learning that the engine and boiler have been duly inspected, that the cylinder is of a certain diameter and the stroke so many feet, that the boiler plates are of a certain thickness, that the safety valve is weighted for so many pounds pressure, that there are so many pumps, that the engineers are licensed, etc. This is all well enough as far as it goes. It gives a certain amount of information, comprehended only by engineers and captains and those familiar with steam and the steam engine. They are evidences that the inspector does something for his salary, that there is a certain amount of supervision done—it may be nominal and superficial, or strict and efficient; but the certificate is the Inspector's Certificate for the traveling public, by that and that alone they must form their own opinions. This steamboat inspection when thoroughly done and attended to is an excellent regulation; it has had and always will have its beneficial effects and advantages; we are far from decrying it; we commend it as an arrangement which should be greatly extended, encouraged and enforced as much as possible; the laws that exist relative to it should be familiar not only to captains and engineers, but to the public. We would have these also framed and suspended in conspicuous places on every steamboat, and like the rules to be seen in some English cabs placed so that that they can be read by every passenger, one of which is, that if the driver makes an overcharge he is deprived of his license. In a similar manner, if the traveler detects a lying certificate, or discovers that he has paid his fare to travel in a boat having an incompetent engineer, a thin boiler with over pressure—in short, if the traveler finds that the rules are not strictly adhered to, let it be reported to officials who can first of all deprive the captain of his position for breaking the laws, and secondly prevent the boat from sailing again until the requirements of the law are complied with. This may be considered impracticable, and one hundred difficulties and *serious objections* can be raised in the face of such laws because they seem to conflict with personal interests, incomes and profits—but they really do not. To what is the grand success of the Cunard Line of ocean steamers attributed, for the company have never lost a mail or a passenger by any conduct of their own since the line was organized? Is it not by the maintenance of strong ships, the employment of competent officers, the enforcement of rules and regulations, a rigid undeviating, uncompromising discipline, that tolerates no excuse for insobriety, accepts of no apology for neglect of watchfulness and duty, and demands that at the end of each voyage a thorough overhauling and minute examination of every part of the ship, boilers and engines shall be made by the resident inspecting engineer, a gentleman who has had long practical experience as a workman, as a designer and draftsman, as a student of naval architecture and marine engineering, as chief engineer of the line. With overalls on he creeps into boilers, furnaces, ash pits and cylinders, from stem to stern his eye is ready to detect a loose rivet or a leaking tube or an incorrect gauge. This is inspection. Strong ships, competent officials, strict discipline, the best food and an abundance of it, prompt payment of salaries and wages—this is management that has succeeded and will always succeed—wherever and whenever it is instituted.

### Atlanta and West Point Railroad.

The earnings of this road for the years ending June 30, 1876 and 1877, were:

| | 1876. | 1877. |
|---|---|---|
| From passengers | $99,211 50 | $88,101 13 |
| " freight | 160,044 20 | 190,491 71 |
| " mail | 12,151 68 | 13,522 98 |
| " express | 4,525 56 | 5,351 48 |
| " Government, etc. | 7,265 25 | 10,692 42 |
| | $283,198 98 | $317,158 82 |
| Expenses, viz: | | |
| Conducting transp | $45,544 06 | |
| Motive power | 62,604 34 | |
| Maintenance of way | 50,825 06 | |
| Maintenance and rent of cars | 12,837 24 | |
| Rent of Central and Georgia Railroad tracks | 6,000 00 | |
| Taxes | 3,756 00 | |
| Litigation claims and fees | 1,142 28 | |
| | 182,208 98 | |
| Net over ordinary expenses | $128,949 84 | |
| Steel and iron rails over estimated annual wear | 22,000 00 | |
| Net over all expenses | $106,949 84 | |

For the year ending June 30, 1876, the earnings were $283,498 58, the expenses $183,905 42, and the net earnings $99,593 56—showing an increase in earnings of $27,659 84, an increase in expenses of $20,303 56, and an increase in net earnings of $7,856 28. The ratio of current ordinary expenses to receipts in 1877 was 58.5 per cent, a reduction of 3 per cent as compared with the previous year. The Superintendent in his report says:

Our wants for the present fiscal year, beyond the current expenses, consist of a new freight depot at Atlanta, two new passenger cars, and 200 tons of steel rails. With reductions in some items of the current expenses, which I am able now to foresee, I am inclined to the opinion that the cost of these betterments—say about $28,000—will not interfere with the regular 4 per cent semi-annual dividends. There can be no doubt that the true interests of the company would be promoted by smaller dividends and larger expenditures for steel rails. Increased speed of trains, called for by active competition, and economy in maintaining a safe track, render the renewal of the old rails a matter of pecuniary saving. We have, however, reduced the original light rails to so short a space that we hold it well in hand, and can doubtless get along safely and comfortably during the present year on the forgoing estimate of renewals. The track and roadway are generally in good condition, and I think we will be enabled to reduce some of the items of expenses in the maintenance of way department, sufficient, probably, to balance the cost of barbed wire fencing, which is now being put up to exclude stock from the track. The risk, cost and annoyance of killing stock, justifies a much larger expenditure than this preventive calls for. I am entirely satisfied with the results thus far, and believe that the saving in cost of stock alone, will, in two years, repay the full cost of fencing.

The motive power expenses have been about $7,000 more than for the previous year. An increase was predicted in my former report. A part of this is due to increased mileage, but the greater portion was in changing fourteen of our locomotives to coal burners. Our experiment in burning coal with "Rushton's Improved Stack and Spark Ejector" is a success. The Spark Ejector, invented by our Master Machinist, Wm. Rushton, Esq., acts incidentally as a boiler cleaner. Its combined merits render it one of the most valuable improvements that has of late years been effected in the locomotive engine. The motive power is in good condition, and, I think, fully equal to the wants of the present year.

The company have 21 locomotives, 5 passenger, 4 baggage, 1 express, 118 box, 18 stock, 23 platform, 3 coal, 5 cab and 2 shanty cars. Number of passengers carried 36,293, against 46,180 in 1876—a decrease of 9,887. Tons of freight transported, 75,684; do. in previous year, 55,860—increase, 19,824. Bales of cotton transported, 99,097, against 61,412 in 1876—increase, 37,685.

Balance Sheet, July 1, 1877.

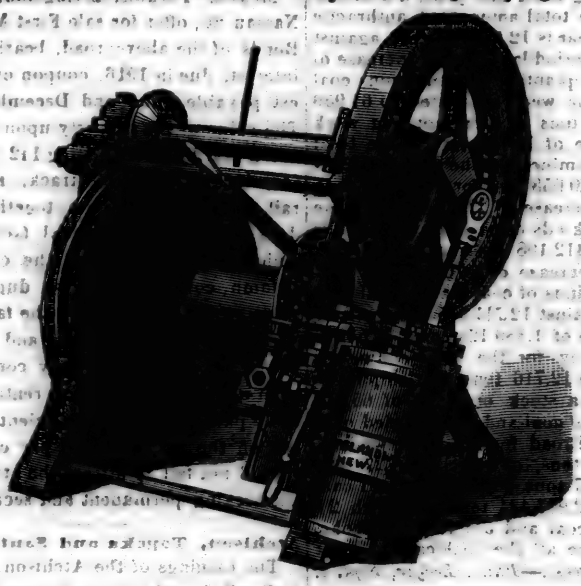
President.—Hon. John P. King.

Directors.—B. C. Yancey, John S. Bigby, F. Phinizy, W. B. Berry, John F. Moreland, L. M. Hill.

General Superintendent.—L. P. Grant.

Secretary and Treasurer.—W. P. Orme.

### Railroad Car for Nitro-Glycerine.



The Springfield, Mass., Courier of 24th ult., notices the arrival at Moorehead, on the Northern Pacific Railroad, of the car constructed by Prof. Geo. M. Mowbray, of North Adams, for the transportation of nitro glycerine and other explosives, and then adds:

The car is named after the professor, resembles externally a passenger coach without windows, and has platforms, brakes and trucks of the most approved style. Internally there is a car within the car, so arranged that the inner car will carry about ten tons of the explosive compound, while the outer one surrounds it with two or three tons of ice. The thickest kind of felt is used to surround the combustible article, and each package is separated from the other by the same non inflammable material. Outside gauges show how rapidly the ice is melting, and there are also thermometers which indicate the inside temperature. At one end of the car is a room for the messenger, who is constantly with the car, and who has as neat and comfortable quarters as though he were in an office or a sitting room. As is well known, the railroads refuse to transport explosives under ordinary circumstances, and a law of this State makes it an offence to ship them through under any disguise; but it is a demonstrated fact that

nitro-glycerine cannot explode at a low temperature, and by constructing cars so as to keep it so, Professor Mowbray hopes to be able to ship it anywhere without liability to accident. The cost of his first experimental car was about $4,000, and its contents were destined for Manitoba.

### Bacon's "Special" Hoisting Engine.

The construction of that class of machinery known as hoisting engines has of late years become a specialty with some constructing engineers and machinists who have studied the requirements of trade and commerce and from time to time have introduced improvements that are apparent not only in general design, but in disposition of parts, compactness, strength and efficiency. The advantages presented to ship owners, railroad companies, merchants and tradesmen as well as to those engaged in mechanical and industrial enterprises in having machinery for the rapid removal and transportation of goods, materials and merchandise to and from the holds of ships and canal boats, for lifting wares from basement to attic of lofty buildings, for pile driving and the removal of stones from quarries and excavations, for raising coal from wharf to depot and from depot to locomotive tenders, freight cars and wagons, have been marked and appreciated for dispensing with an incalculable amount of manual labor, the economy effected and the facilities of quick and positive operation. The hoisting engine represented here has been designed by Earle C. Bacon of the firm of Copeland & Bacon, in this city, as one especially adapted to lift quickly light weights and to occupy little space. It is new in name and form, compact and strong and may be considered a portable machine, as it can be moved by the united strength of two or three men. Some new features have been introduced which render it simple and easy to operate. The mechanism consists principally of two strong cast iron frames or sides on which are the bearings for the shafts; a steam cylinder 5½ inches in diameter, stroke 5 inches; steam slide valve, eccentric, a drum for wire or hemp rope, a driving shaft, two friction gears, operating hand lever, etc. The engine cylinder has a hollow casing fastened to the upper face of the piston, this casing being made to slide steam-tight through the cylinder cover, in the same manner as the piston rod of an ordinary engine. The lower end of the connecting rod descends through the hollow casing to the upper side of the piston, to which it is jointed, the top of the connecting rod being connected as usual with the crank pin. Thus neither piston rod nor parallel motion, nor guides are required since the connecting rod has space to vibrate within the hollow casing. The hollow casing, it will be seen, is oblong and not cylindrical in its transverse section, and by this means, a smaller cylinder can be used and a greater area of piston obtained. The flat connecting rod is of wrought iron and bored out like a gun barrel in the center; in this cavity a screw rod is inserted which can be turned from the recess in the top to tighten up the lower brass boxes of the connecting rod, an ingenious device, as it renders the removal of the cylinder cover unnecessary when the lower boxes require adjusting. The drum is loose upon the shaft; the drum shaft is slightly eccentric, and the operating lever is keyed to the shaft. The frictional V gears are male and female, and are thrown in and out of gear by a slight movement of the operating hand lever. At the back of the larger friction gear is a shoe brake.

BACON'S "SPECIAL" HOISTING ENGINE. THREE HORSE POWER.

The operation of this little compact hoisting engine is of the simplest description. When the friction pinion and wheel are thrown into gear the drum will revolve and wind up the rope, and of course is then in hoisting position; when the friction wheels are out of gear the drum being loose on the shaft the weight will uncoil the rope and be lowered; a check or stoppage on lowering is effected by a slight movement of the single operating hand lever by means of which the friction wheels are thrown in or out of gear, or the larger friction wheel is moved against the shoe brake as desired. On reference to the engraving the general arrangement of parts will be understood. The crank pin, valve rod, joint pins, etc., are made of steel and the workmanship is of an excellent character. The slow and tedious way of hoisting coal into locomotive tenders by small cranes can now be dispensed with. The New York Elevated Railroad Co., have procured one of these engines and we have no doubt they will prove highly useful for many purposes. This engine with many other hoisting engines of various sizes can be seen at the company's warerooms, 85 Liberty Street, New York.

### Railroad and Manufacturing Notes.

The Brooks Locomotive Works, Dunkirk, N. Y., have a contract with the Covington, Columbus and Black Hills Railroad Co. for one 42-inch gauge passenger engine, and a contract with the Erie Railway Co. for five consolidation engines.

Riehle' Bros', Scale Works, Philadelphia, continue busy. They have just shipped an 80,000 lbs. railroad track scale to the Lehigh Valley R. R. Co. for erection on the line of the New York Coal and Railroad Co., also one of the same capacity to E. & G. Brooke, Birdsboro, Pa. Several platform scales and trucks to the Philadelphia and Atlantic City Narrow Gauge Railroad and one of their new wire testing machines to Hallidie's Wire Works, San Francisco.

J. M. Jones & Co., Troy, N. Y., are building ten cars for Bombay Street Railway Co.

The Schenectady Locomotive Works are building five locomotives for the Chicago, Milwaukee and St. Paul Railway Co.

The United States Rolling Stock Company has furnished the Scioto Valley Railroad Co. another engine. The engines owned by the company were unable to do all the work.

Four passenger coaches have just been completed at the New York and New England Railroad car shops in Norwood. They are to be used on the new Rhode Island and Massachusetts Railroad which soon goes into operation.

The Western Railroad Companies anticipate so large a movement of produce to the seaboard that they have determined to increase the amount of a car load to 25,000 pounds.

The contract for building Dam No. 2 on the Sudbury river has been awarded to Trull, Wood & Murray of Cohoes, N. Y., for $64,850.

Work on the Tuscarawas Valley Railroad is being pushed rapidly forward. Very much of the light grading will be completed this fall, leaving the cuts and tunnels for work during the winter.

Washington specials say the Secretary of War expresses the opinion that railroads are entitled to compensation for the transportation of troops even if used to protect their own property.

Trade is reported as steadily improving in the Philadelphia markets, especially as regards manufactured goods.

In Baltimore trade generally is more active, and the opening of the Fall season will, it is expected, be attended with a decided improvement in all branches of commerce.

### Queries and Replies.

Inquiries to be answered must be appropriate to the columns of the JOURNAL.

F. H. Your answer about the strength of boiler iron when subjected to a high temperature did not give the results of the Franklin Institute Experiments. Ans. Experiments by a committee of the Franklin Institute gave the following results. At a temperature of 32°, the freezing point, the cohesive strength of boiler iron was 1-7 below its maximum, and its strength increased as an additional temperature was applied, until it had reached 570 degrees Fah., when the iron was found to have attained its maximum strength. The difference between Mr. William Fairbairns' and the Institute experiments was therefore 170°, but the former used Haffordshire iron.

BOILER MAKER.—Are iron or brass tubes the best for locomotives? Ans. Brass, copper and iron tubes have been used as boiler tubes; brass is giving way to iron and iron to steel. Cold drawn steel tubes are now made and we consider them the best in strength and durability.

M. BRODIE.—What space does one ton of anthracite coal occupy. Ans. About 40 cublic feet.

MACHINIST.—Please inform me how much a cubic inch of cast iron weighs? how many cubic inches are there in one pound of cast iron? and what does a cubic foot of cast iron weigh? Ans. first, .263 of a pound; second, 3.8 lbs.; third, 454 lbs.

ATLANTIC IRON WORKS.—Can you tell us what castings were worth during the war? Ans. At Pittsburgh, iron castings sold at 2 cents per pound, two dollars per 100 pounds; brass castings at 20 cents per pound. We do not know what New England prices were.

DRAUGHTSMAN.—I want a good varnish for drawings, please give me a recipe that you know to be good. Ans. 1 gallon of alcohol, 1 lb. of white shellac, ¼ lb. camphor, 2 oz. of balsam (fir). Dissolve as above; have your drawings mounted, and apply with a soft flat brush. The drawing should be sized with isinglass size, previous to applying the varnish. Let one coat dry before giving another.

A CARPENTER.—The rails that were once used and called "fishbellied" were of a good shape to prevent deflection being deepest in the middle, why were they abandoned? Ans. A "fishbellied" rail has more power to resist deflection than a straight one of the same weight, in the proportion of 11 to 9 according to Lecount, but it is inconvenient in practice, owing to its requiring a higher support, which is therefore less steady, and for this reason has been discarded.

J. R.—How can I tell when cast iron breaks if the metal is of good quality? Ans. There are many varieties of cast iron, as charcoal cold blast, charcoal hot blast, anthracite cold blast, and anthracite hot blast. The former is much the superior, and the latter the inferior varieties. When a piece of iron is broken, and the fracture presents grains very large, or very small, and a dull earthy aspect, loose texture, dissimilar crystals mixed together, it indicates an inferior quality.

MASTER MECHANIC.—What is the best non-conductor for covering steam pipes, the engine running our repair shop is fifty feet from the boiler and has a long 3 inch steam pipe? Ans. There are several substances now in use for the purpose of preventing radiation of heat; the question is often put to us. We refer you to our advertising columns.

TURNER.—How much will a leather belt 1 inch wide lift? Ans. Of the ordinary thickness about 1000 lbs.

PEEKSKILL.—I have a large iron tank, oblong in shape, which is constantly full of water; how can I tell the pressure upon the bottom? Ans. Multiply the area of the base by the perpendicular depth of the water, and this product by the weight of a cubic foot of water, which may be taken at 1,000 ounces avoirdupois, or 62½ pounds.

### The Coal Trade.

For the week ending the 25th ultimo, the total tonnage, as reported by the several carrying companies, amounted to 281,064 tons, against 336,645 tons in corresponding week last year, a decrease of 55,581 tons. The total amount of anthracite mined for the coal year is 12,597,565 tons, against 10,491,517 for same period last year, an increase of 2,106,048 tons. The quantity of bituminous coal sent to market for the week amounted to 64,959 tons, against 75,463 tons in corresponding week last year, a decrease of 10 504 tons. The total amount of anthracite mined for the year is 1,994,183 tons, against 2,220,058 tons for corresponding period last year, a decrease of 225,925 tons. The total tonnage of all kinds of coal for the week is 346,023 tons, against 412,108 tons in corresponding week last year, a decrease of 66,085 tons. The total tonnage of all kinds of coal for the coal year is 14,591,698 tons, against 12,711,575 to same date last year, an increase of 1,880,123 tons. The receipts at Perth Amboy for the week ending on the 25th ultimo were 12,716 tons, the shipments 27,284 tons, leaving a stock on hand of 65,133 tons. The quantity of coal and coke carried over the Pennsylvania Railroad for the third week of August was 91,484 tons, of which 74,727 tons were coal, and 16,757 tons coke. The total carried for the year is 2,907,434 tons, of which 2,314,083 tons were coal and 541,476 tons coke. These figures embrace all the coal carried over the road, east and west.—*Phila. Ledger, Sept. 3.*

### Baltimore and Delta Railroad.

The directors of the Baltimore and Delta Narrow Gauge Railroad, recently elected, are: Hon. Stevenson Archer, Wm. H. Waters, Phillip T. George, E. Stanley Rogers, James L. Sutton, Foulk Jones and ex-Gov. A. W. Bradford. The officers are: William H. Waters, of Harford county, president; Phillip T. George, of Baltimore county, vice president, and Stevenson Archer, of John, secretary. The termini of this proposed road are Baltimore, Md., and Delta, York Co., Penn. The latter is thirty-seven miles from York, four miles from the Susquehanna river and forty miles from Baltimore. It is the present terminus of the York and Peach Bottom narrow gauge railroad. The new road will pass through one of the most fertile and picturesque regions in the State, and through a portion of country abounding in lime, iron ore, chrome, asbestos, feld spar, slate, etc. The country is also watered by numerous streams furnishing power for factories of any kind. The route has not yet been located definitely, but it will touch Towsontown and Belair, the county seats of Baltimore and Harford. Upwards of $100 000 have been subscribed for the road. The estimated cost being $490,000.

It can be graded for $4,000 per mile, after which it is believed there will be no difficulty in disposing of its bonds to complete and stock the road. Its advantages to Baltimore will be great. It will pour into the city the entire produce of the country along its line, to within a short distance of York, Pa., farmers of the vicinity preferring to ship direct by the new road to hauling to York, and shipping by a route nearly as long.

Delta, the terminus and connecting point of the two railroads, is in the centre of the slate region, and thousands of tons of this material would find its way over the new road to Baltimore. At present slate is hauled from four to six miles at a heavy cost and shipped by the Tidewater canal. In winter, of course, shipments cease.

The friends of the road are confident that it will pay from the first. Their expectations are based upon the fact that the Peach Bottom road spoken of, which passes through a section not nearly so productive or so rich in valuable minerals as Baltimore and Harford counties, and which has no direct communication with any of the large cities, has been a success, notwithstanding it was finished during the period of financial depression.

### Buffalo, New York and Erie Railroad Bonds.

Messrs. Perkins, Livingston, Post & Co., 32 Nassau St., offer for sale First Mortgage Renewal Bonds of the above road, bearing seven per cent interest, due in 1916, coupon or registered, interest payable June and December in New York. The value of the property upon which these bonds are a first lien, comprising 142 miles of main line (or, including double track, sidings and third rail, a total of 260 miles) together with extensive docks, lands and terminal facilities at Buffalo, which, as represented in the circular in another column, could not now be duplicated for a very large sum, together with the fact that the bonds have a long time to run, and that the road is leased to the Erie Railway company for a long term of years at an annual rental, which is punctually paid, more than sufficient to pay the interest on the bonds and 7 per cent on the stock, should not fail to attract the attention of capitalists seeking permanent and secure investments.

### Atchison, Topeka and Santa Fe Railroad.

The earnings of the Atchison, Topeka and Santa Fe Railroad Company for the month of July, 1877, were $187.142 21, the operating expenses $111,036 70, and the net earnings $76,055 51. For the month of July, 1876, the earnings were $196,851 35, the expenses $118,912 16, and the net earnings $87,938 19—showing a decrease in earnings of $11,709 14, an increase in expenses of $123 54, and a decrease in net earnings of $11,892 68. Per cent of expenses to earnings in July, 1877, 59.36; in July, 1876, 57.77. Number of miles operated in both years, 711. The following is a comparative statement of the earnings, expenses, etc., for the seven months ending July 31, 1876 and 1877:

| | 1876. | 1877. |
|---|---|---|
| From freight | $809,317 00 | $783,680 00 |
| " passengers | 388,763 00 | 389,605 00 |
| " mail | 22,160 00 | 22,160 00 |
| " express | 19,241 00 | 22,850 00 |
| " miscellaneous | 5,171 00 | 6,819 00 |
| Total | $1,244,653 58 | $1,223,813 26 |
| Operating expenses | 540,287 86 | 704,549 60 |
| Net earnings | $604,415 72 | $519,263 66 |
| Per cent operating expenses to earnings | 51.44 | 57.57 |
| No. miles operated | Av. 687 | 711 |

☞ The telegraph reports the earnings of the Atchison, Topeka and Santa Fe Railroad for August, 1877, to be $255,100, against $248,138 (official) same month last year.

## Recording and Alarm Gauge.

### A PERPETUAL WATCHMAN.

It is a remarkable fact that notwithstanding the thousands of boiler explosions and disasters which have occurred there are comparatively few owners of steam machinery who seem to feel the importance of using safeguards and appliances for detecting over pressure of steam or irregularity in attention to steam boilers and generators. The damper, gauge cocks, glass water gauge, the steam gauge, and safety valve, are the principal fittings of every steam boiler. Their form and use are familiar to all and need no description here. But we refer to them only to remind the reader that unless they are kept in the best working condition, they are no safeguards at all. Safety valves may stick and be over weighted, gauge cocks may get choked, steam gauges may indicate incorrectly, and any disarrangement may not be readily detected by the attendant. We say these things *may* happen to any steam boiler, the public know that they *do* occur, for scarcely a week passes but we read of some disaster from explosion. The carelessness and apathy exhibited by many manufacturers in regard to the safety of their employees, and by steamship companies in regard to the safety of their crews and passengers, their aversion to avail themselves of any well tried and reliable devices for securing greater safety, their readiness to plead excuses for not adopting safe guards, are astonishing, when the need of them is made daily so apparent. It is generally assumed that the best safety appliance is an intelligent watchful engineer, one who can be depended upon fully and who "understands his business," but the public know that besides much machinery being kept in a very bad state, there are thousands of men who are unfit to take charge of it, and these men require watching as much as the machinery. A passenger on an excursion or ferry steamboat supposes his personal safety is considered, and of course it is, but he cannot tell at what moment safety may be endangered through want of watchfulness on the part of those in charge, and this applies in all cases where steam is used. These remarks have been made as pertinent to the subject of recording gauges, a subject which deserves careful and thoughtful attention. Without any "axe to grind" in the matter, with a desire to avoid all "puffing," we present the Edson Recording Steam Gauge as an ingenious device that is becoming more and more favorably known and as an invention of great merit and usefulness. It is an automatic indicating, recording and alarm gauge, designed to be placed in captains' and pilots' houses, in counting rooms and offices, in engine and boiler rooms. It has been endorsed by the highest scientific associations and is in use at many prominent manufactories and institutions in this country, as well as in the American, Austrian and British Navies, on ocean steamers and in hotels. Its special use is to afford constant, reliable and tangible data for

Fig. 1.

engineers, manufacturers, indeed for all those using steam boilers. The appearance of the instrument is represented by Fig. 1, where it is shown as under a glass cover. What it does is shown by Fig. 2, which is a fac-simile of a chart taken from one of a number in use by the well known Merrimack Manufacturing Company at their famous mills in Lowell, Mass., Jan. 27th, 1876. To express in the simplest manner what this instrument does, we may say, that on a paper placed vertically, and slowly revolving towards the right hand a pencil moving up and down according to the pressure of steam, indicates its movement by describing a diagram on the paper and shows the varying pressure in the boiler; the upper scale on this paper, 12, 1, 2, 3, etc., are hour numbers and thus any person can on looking

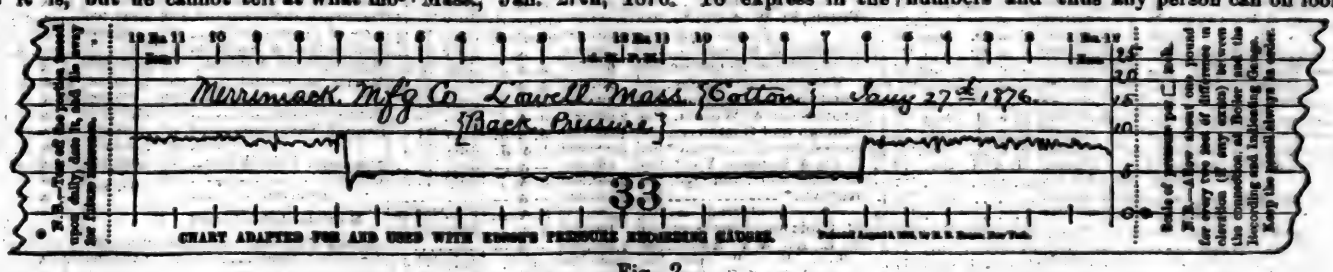


Fig. 2.

at the instrument tell what the pressure is at the time of his examination and what it has been at previous hours. The curved dial plate and indicating pointer above the chart tells the pressure of steam, and the gong behind the curved dial plate will sound when the pressure exceeds that to which the instrument has been set. In short, the instrument placed in a counting room, a president's or a superintendent's private office which may or not be at a distance from the boiler room, records the pressure at every hour, whether there have been any variations, how much, how many and the time they occurred. Our space will not allow us to descant further on the great usefulness of this recording gauge, but we refer those interested about it or the subject connected with it viz., safety, to examine for themselves or obtain illustrated and descriptive circulars from the Edson Recording Gauge Manufacturing Co., 91 Liberty St., N. Y.

These "Time and Pressure Recording" and "Alarm Gauges" were patented February 29th, 1876, and the "Charts" were also patented August 3d, 1875, and as each instrument has its own peculiar scale of pressure, and its own peculiar "Chart," the public, whose lives and property are inevitably so greatly affected by the use, or the abuse, of steam, on land or at sea, can rely upon these automatic means for safety; and Legislators should at once recognize the inestimable value of a record of steam pressure carried in every boiler and of the timely "alarm" when limited pressure is exceeded, as a precautionary measure, and promptly secure these benefits to the public.

**Saturday, September 8, 1877.**

### Financial and Commercial Affairs.

Under a more active demand from speculative and mercantile sources, quickened by the increasing volume of transactions in the financial and commercial lines, and the consequent more urgent requirements of borrowers, Money has shown more firmness in nearly all the prominent markets, though at the current quotations the offerings of accommodation have been generally on a liberal scale, largely on account of private lenders. Call loans have been quoted here at the close at 8@7, with most of the important negotiations reported on the basis of 8@5 per cent; and very choice to prime mercantile credits are rated at 5½@7 per cent per annum for the best names. Through the enlarged volume of the crop movement the currency reserves of the banks have been further diminished. The City banks, last week, reported an increase in their specie reserve with a falling off in their average of loans and discounts, and a decrease in circulation, and in their legal tender board, as also in the average of the deposits. The loan and discount average was contracted $1,120,900, and the item of circulation $131,800. The average of deposits was diminished $3,575,600. The legal tender reserve was reduced $2 658,400; and the specie average enlarged $1,771,100.

The City banks reported their average of gold last week at $16,080,100, as against $22,142,200 same date last year; and their greenback average at $48,180,600, as against $57,780,600 on Sept. 2, 1876. Their deposits stood at $209,450,700, against $228,598,900 same time in 1876. The

loan item was $243,778,700 against $255,823,500 a year ago.

The City bank net reserve of specie and legal tender notes now shows an excess over the legal requirement of reserve to liabilities of $11,798,025, as against $11,791,425 the preceding week, $9,089,775 the week ending 14th April (the lowest footing of this item thus far in the current year,) and $24,781,800 on January 27 (which latter was the highest aggregate reached this year.) The City bank exchanges in currency reached $400,798,928, or a daily average of $66,798,988.

The U. S. Sub-Treasury in this city closed the week ending on Wednesday with a currency balance of $47,422,467, against $49,194,443 the preceding Wednesday; and a coin board of $87,710,051, against $83,250,859 on the return of a week earlier. The Customs revenue of the port during the past week was $2,402,000.

The U. S. Sub-Treasury receipts in August were $74,865,892 (of which $10,307,297 from customs); payments, $69,929,269, (of which $3,776,255 of coin interest.)

Government securities have been less active at generally easier rates, fluctuating in price, mainly in sympathy with the changes in Gold. At the close on Wednesday the current quotations were as follows:

United States currency sixes, 122¾@123¼; do. 6s, 1881, registered, 109⅜@109½; do. coupon 110⅜@110¾; do. 1865, new, registered, 105½@106⅝; do. coupon, 105½@105⅝; do. 1867, registered, 107⅛@107⅜; do. coupon, 107⅛@107⅜; do. 1868, registered, 109⅜@109⅝; do. coupon, 109½@109⅝; do. ten-forties registered, 107¾@108; do. coupon, 108⅞@109¼; do. five per cents 1881, registered, 107⅜@107⅞; do. coupon, 107¾@108; do. 4½ per cents, 1891, registered, 105⅞@106; do. coupon, 105⅞@106; do. 4 per cents, 1907, reg., 102¼@102½; Central Pacific Gold Bonds, 106½@106¾.

The amount of U. S. bonds held by the Treasurer of the United States, as security for the National Bank circulation, is $337,634,650, and $18,175,000 as security for public deposits.

The liquidation of the national indebtedness in August was $3,869,539.

The disbursements of the National Treasury in August (exclusive of interest or principal of public debt) were $11,268,446.

A fair investment demand has been noted for State bonds, and a brisk inquiry for Railway Mortgages, the latter at much stronger prices in the instance of the more substantial loans, the available supply of which has been comparatively moderate. And in the line of Railway and Miscellaneous share property the dealings have been again quite extensive nearly all through the general list; and, despite the hardening tendency of Money, values have been further advanced materially, closing, as a rule, buoyantly, favored by the more encouraging outlook for the great carrying interests.

On Tuesday of this week the cash balances of the Treasury Department at Washington were: of Currency, $11,828,538; special deposit of legal tenders for the redemption of certificates of deposit, $57,430,000; Coin, $106,904,986, including of Coin certificates, $38,525,400.

Gold has further receded, under more liberal offerings, and a comparatively tame movement in the local market. The customs call has been fair for the season, but the export drain has been very light, much under the imports. The decline in Gold has seriously impeded the refunding operations of the national government, by depressing the price of the new four per cent funding loan under par. The extremes of the price during the week have been 103⅜@104¼, (the very low quotation of 103⅜ having been made on Tuesday, Sept. 4) closing at 103¼, as against 104⅛ on Wednesday of the preceding week. The lowest point touched by gold previous to the decline within the past few weeks, was 104¼, on Friday, March 2d. The specie outflow last week was only $70,606, making the total exports of specie hence since January 1, $22,018,127, against $39,677,722 the same time in the preceding year. The imports of specie at this port last week were $282,889, and since January 1st have been $8,668,421, as against $3,417,767 same time last year. The Customs demand for gold last week averaged $400,334 per day. Foreign Exchange has been quoted weak, and in generally slack demand. Bankers' sixty day bills on London closed on Wednesday at $4 81⅛@$4 82⅛; sight bill on London at $4 84⅛@$4 85⅛ to the £ sterling. The week's imports of Dry Goods and general merchandise were to the specie value of $6,046,094 as against $4,467,011 the corresponding week of 1876. The week's import entries of Foreign Merchandise at New York included $2,493,106 of Dry Goods, and $3,552,978 of General Merchandise. The week's export of Domestic Produce and Miscellaneous Goods from this port were to the liberal aggregate of $7,261,045, against $6,417,217 same week in 1876.

The aggregate of the outstanding U. S. currency of all denominations, September 1st, was $377,212,210. The outstanding amount of legal tender notes is $357,956,164. The National bank circulation is now $315,066,928 of currency notes and $1,425,770 of national gold bank notes.

National Bank notes received at the Treasury Department last week for redemption were to the amount of $3,912,000.

The following is an official statement of the national bank balances in the United States Treasury up to date; Banks reducing circulation, $8,921,984; banks in liquidation, $3,968,487 80; failed banks, $8,[illegible]0,908 20; total, $18,861,825.

The income of the Government from internal revenues last week was about 2⅞ millions, and during the fiscal year ending June 30, 1877, $118,680,408, against $116,700,782 in the preceding fiscal year; and from Customs last week about three millions, and in the last fiscal year $130,956,493, against $148,071,985 in the preceding fiscal year.

Business in the leading kinds of domestic produce has been fairly active especially in Breadstuffs which have been quite freely purchased for home use and shipment, leaving off, however, less buoyantly as to values. Provisions and Cotton have been in fair request but generally weak as to price. Petroleum has been more freely dealt in, closing higher. Foreign merchandise has been in fair demand in most instances, though at irregular prices.

Metals have been comparatively dull, though prices have favored buyers. Eglinton Pig Iron quoted at $24@$24 50; Glengarnock $25 50 @$26; Coltness $26@$27; No. 1 American Pig at $18@$18 50; No. 2 do. at $17@$17 50; (with sales of 2,300 tons at $17 25.) Forge $16@$17; American Rails at works $34@$37 50; Old Rails $18@$19, Wrought Scrap $22@$24. Steel Rails, on the basis of $47@$49 at the mills. Ingot Copper less active on the basis of 17¾@18 for early delivery.

Hardware, Boots and Shoes and Dry Goods, have been quite active, as a rule, with prices of seasonable classes of stock fairly supported.

An active business has been reported in the line of Ocean freights chiefly in the Grain and Petroleum interest, with rates quoted generally very firm, though the market closed rather dull. Liverpool steamer rates at the close for Grain, quoted at 11d.@11¼d, Provisions, 40s.@60s.; Tallow, 40s.; Leather, 55s. Measurement Goods at 20s.@25s. per ton; Cotton, ½d. per lb., Tobacco 40s. Liverpool, by sail, Cotton, 7-32; Grain, 9d.@9½d. Oil Cake and Slate, 20s.; Measurement Goods 20s.; Tobacco 35s.; Grain rates on charter hence for Cork and orders left off at 7s. 6d.; for the Continent at 7s.@7s. 6d., and from Baltimore for Cork and orders, 6s. 9d.@7s. 3d. and from Philadelphia at 6s. 9d. per quarter. Refined Petroleum hence for Cork and orders, 5s.@5s. 6d., for the Continent, 4s. 6d.@5s. per bbl.

The following quotations of sales of Railway and other securities are in addition to those given elsewhere in our columns:—

### Houston and Texas Central Railway.

The earnings of the Houston and Texas Central Railway for the month of July, 1877, were $161,577 66, the expenses (including taxes) $128,732 60, and the net earnings $87,845 06; for the month of July, 1876, the earnings were $148,375 21, the expenses (including taxes) $147,880 60, and the net earnings $494 61—showing an increase in earnings of $13,202 45, with a decrease in expenses of $24,148, making the increase in net earnings $37,350 45.

### Cincinnati, Hamilton and Dayton Railroad.

The earnings of the Cincinnati, Hamilton and Dayton Railroad and its leased lines for the quarter ending June 30, 1877, were $539,634, the expenses $368,589, and the net earnings $171,045; for the quarter ending June 30, 1876, the earnings were $611,078, the expenses $459,793, and the net earnings $151,285—showing a decrease in gross earnings of $71,444, with a decrease in expenses of $91,203—making an increase in the net earnings of $19,759.

# FISK & HATCH,

**Bankers,**

No. 5 Nassau St., New York.

U. S. Government Bonds bought and sold in amounts to suit investors: also, Gold, Silver and foreign coins: Deposits received in Currency or Gold, and interest allowed on Balances: Special attention paid to Investment Orders for Miscellaneous Stocks and Bonds.

# BUFFALO, NEW YORK & ERIE R. R.

**FIRST MORTGAGE RENEWAL**

# 7 per ct. Bonds, due 1916.

Interest payable June and December, in New York.

**(COUPON OR REGISTERED.)**

FOR SALE BY

**Perkins, Livingston, Post & Co.,**

No. 23 Nassau St., New York.

| | Miles. |
|---|---|
| Length of road from Buffalo to Corning | 142 |
| Double track | 31 |
| Sidings | 47 |
| Third rail laid on 80 miles | 40 |
| Total | 260 |

(Of which 57 miles are laid with steel rails.)

The renewal first mortgage is ..... $2,380,000
(Being less than $17,000 per mile on 142 miles, or about $9,000 per mile, counting double track, sidings and third rail.)
Of these bonds there have been issued to retire old bonds ..... 458,000
The balance ..... $1,922,000

Have been sold by the company at a price more than sufficient to pay off all the old bonds of the company, all of which mature 1st December, 1877.

The proceeds of the renewal bonds are paid into the Union Trust Company to retire old bonds, and the Union Trust Company have executed an agreement to pay the money out only as the old bonds are presented to them for redemption and cancellation.

This issue of bonds does not increase the mortgage debt of the company, but simply renews the old loan for 40 years.

This company has extensive docks, lands and terminal facilities at Buffalo.

The road and property of this company was leased to the Erie Railway Company in 1863 for the term of 490 years. The yearly rental is $232,100. The rent is payable semi-annually, being more than sufficient to pay 7 per cent. interest on the bonds and 7 per cent. dividend on the stock.

The road is of vital importance to the Erie Railway. All their Buffalo, Niagara and Suspension Bridge business has to go over it, and it is also their only outlet for their Rochester business. The extensive coal business of the Lehigh Valley Company is tributary to this line; and as the property could not be duplicated to-day for less than $7,000,000, the punctual payment of the rental is assured for the future, as it has been for the past 14 years.

### The Recent Strikes.

An article in the North American Review, just issued, written by Col. Thomas A. Scott, President of the Pennsylvania Railroad Co., after reciting the facts of the recent history regarding the strikes of railroad employes, and stating the necessities of the railroad companies in view of the public demands upon them, makes the following deductions:

This insurrection, which extended through fourteen States, and in many cases successfully defied the local authorities, presents a state of facts almost as serious as that which prevailed at the outbreak of the civil war. Unless our own experience is to differ entirely from other countries—and it is not easy to see why it should, with the increasing population of our large cities and business centres, and the inevitable assemblage at such points of the vicious and evil disposed—the late troubles may be but the prelude to other manifestations of mob violence, with this added peril that now, for the first time in American history, has an organized mob learned its power to terrorize the law-abiding citizens of great communities.

With our recent experience before us, it is believed that no thoughtful man can argue in favor of delay by the proper authorities in dealing with lawless and riotous assemblages. Delay simply leads to destruction of property, and may lead in the end to the destruction of life. The force used to repress such assemblages should be as prompt in its manifestation as the evil with which it deals. The interests concerned are too grave to admit of delay. The raising of the black flag and the stoppage of all vessels on the great lakes and on the Mississippi and Ohio rivers would not produce one tithe of the damage to the whole country that has resulted from the recent stoppage of the great trunk lines. The burning of the vessels and their cargoes on these waters would raise a storm of wrath which no mob would dare to face, and would be visited by the United States Government, under existing laws, with most exemplary punishment. But what distinction can be established between such a crime and the heinous destruction at Pittsburgh of over 1,800 cars laden with the products of the various States, together with the engines ready to move them to their destination, and the station buildings and machine shops that were absolutely essential to their proper care and movement, and which with other like doings resulted in the stoppage of all commerce and business relations between the States not only on one highway, but on many important lines, through the concerted action of the mob and its leaders? In the city of Pittsburgh, much human life, and many private dwellings and other property were sacrificed as the result of mob violence; indeed, it is almost a marvel that a large portion of that city was not destroyed by fire. Only the prevailing direction of the wind averted greater and more general disaster.

The authority of the United States, now potent to protect commerce moving upon the waters, should be equally potent when the same commerce is exposed to greater peril upon land. This brings us, then, to the practical question: In what shape can this protection be put so as to be extended most efficiently and with the least delay? The present regulations all favor, unintentionally, the rioters and the mob. In the first place, the Mayor of a city must exhaust his power, the Sheriff of the county must essay his strength; then, while precious time is expending—for a mob constantly attracts dangerous elements and grows with impunity and success—the Governor of the State must be called upon by the Sheriff of a county. If the State happens to have an effective military organization, which at the present time is the case in perhaps not more than five out of the 37 States of the Union, the Governor can call out the military forces and suppress the riot. If the State has no such organization, or if the military forces of the State prove inadequate to the emergency, the Governor is paralyzed, and must call upon the United States for assistance. If the authorities of any State should, for any cause, fail or refuse to call upon the United States Government, what possible remedy or protection is left to life and property within the limits of that Commonwealth? It can readily be seen what frightful possibilities of mischief are afforded by the necessarily long interval which must elapse in the present state of our laws before the Federal authority can intervene in cases where its intervention is most imperative.

In fact, as our recent experience has shown, the only roads which could procure prompt protection and immunity from interference were those whose misfortunes had made them bankrupt and placed them in the direct custody of Receivers appointed by the United States courts. To the aid of these roads the United States Marshall could call United States troops, and no rioter dared to resist the power represented by the small but admirably disciplined detachments quartered near the scenes of the recent troubles.

It will hardly be contended that the railway companies must become bankrupt in order to secure the uninterrupted movement of traffic over their lines, or to entitle them to the efficient protection of the United States Government.

If a bondholder or other creditor is entitled to the protection of the Federal courts to prevent the threatened impairment of the value of a property through legal proceedings, he certainly should not be left without remedy against lawless violence which has actually destroyed the security for his investment, and has, as at Pittsburgh, converted millions of dollars into scrap-iron and ashes.

The laws which give the Federal courts the summary process of injunction to restrain so comparatively trifling a wrong as an infringement of a patent-right certainly must have been intended or ought to give the United States authority to prevent a wrong doing which not only destroys a particular road, but also paralyzes the entire commerce of the country and wastes the national wealth.

It is demonstrable that during the recent disturbances the Government of the United States was itself a direct loser, and through the Government, the taxpayers of the whole country, to a very large amount, by the diminution of the national revenues arising from the interruption of business and the interference with many of the operations on which the internal taxes of the country are levied, as well as by the diminution of the Customs revenues, as all the imports during this period, instead of being forwarded to their destinations, were necessarily placed in store, of course, without payment of any duty to the Government for the time being. Suppose that this state of things had continued for 60 days, would not the United States Government have been deprived of nearly all the revenues on which it relies to meet its current obligations?

Certainly it could not have been contemplated, in the formation of our Government, that the United States authorities should submit to see the transportation of the mails covering the enormous financial and business transactions of the whole country, and the movement of supplies required for its own various departments, made dependent upon the grace and favor of rioters whose misconduct in almost any other form would have secured their immediate arrest and condign punishment.

During the recent riots the movement of United States troops was impeded at several points, and large quantities of ammunition and other Federal stores on their way to the Pacific coast were forcibly detained for days. The operations of the National Government in some parts of the country were as completely blocked as in the early days of the civil war. There certainly should be a protection against such dangers and a remedy for such wrongs.

If the Government of the United States is to exercise its power of protection or of remedy, it, perhaps, can do so only through an adequate exhibition of the military force that may be given it for such purposes by Congress. The important question is to ascertain in what way the Government can so exhibit its military force as to secure the utmost possible efficiency in the enforcement of law and order without jarring or disturbing the general framework of our institutions and our laws.

It seems to be indispensable, in the light of recent events, that whatever force is to be used by the Government in such emergencies should be so distributed and controlled that it may be concentrated upon any point or points that may be threatened within a few hours of any outbreak. Several companies of regular troops that were quartered at Baltimore, Philadelphia, Pittsburgh, Reading, Scranton, Louisville, Chicago, and other places, during the recent riots, had to be transported for such distances that, if they had been compelled to march instead of moving by rail, they would have been powerless to avert mischief. It was only by the fear or favor of the rioters that the United States were able to concentrate their forces where they did. In some cases formal resolutions were passed by the strikers that no troops should be allowed to pass over the lines. In Jersey City a mob endeavored to prevent the departure of a United States battery and the troops connected therewith. On the Erie Railway, between Cornell and Hornellsville, a few lawless men, by tearing up tracks, destroying bridges, and tampering with switches, were able seriously to retard the military forces of the State, which were there under the orders of the Governor to re-establish law and order.

What is needed, therefore, would clearly seem to be that proper forces should be so disposed at prominent points—large cities and other great business centers, in many of which the Government has arsenals, custom houses, mints, navy-yards, and other property of its own to protect—that their movements can be combined rapidly, and they be directed against points of danger, so as to be able to act effectively and with decision before violence can become triumphant.

With the experience of other countries to warn and guide us, and especially with the experience of England, where the rights of the people have for ages been guarded and asserted as jealously as they always have been and should be among ourselves, we shall have only ourselves to blame if, through apathy, demagogism, or weakness, we leave ourselves unprepared to meet an issue, which, from all the evidences of the times, is only too likely again to be forced upon us.

With the approach of winter, and the loss of outdoor employment which severe weather, even in the most prosperous times, entails, the country will have to deal not only with the deserving among the unemployed, who can be reached and helped through local organizations, but with vast numbers of idle, dangerous, and in many cases desperate men, who have been allowed, unfortunately, to catch a glimpse of their possible power for mischief. Such men, unless confronted by a thorough organization in the cities, States, and other communities, backed by the power of the Federal Government and an unmistakable public opinion, will need but little urging to renew the scenes which have already brought such disgrace upon the American name.

It surely may be hoped that at the approaching session of Congress the earnest, unprejudiced, and patriotic men of both houses will discuss this grave subject independently of party lines, and with the united resolve to secure equity to all interests and to take all necessary measures to secure protection to life and property and the impartial enforcement of the laws, including the guarantee to every man of the right to work for such compensation as he may agree upon with other men, free from interference or intimidation.

The able lawyers of the Senate and House will perhaps frame a law which will give to the owners of every highway carrying inter-State commerce, whether by land or water, in which citizens of different States are interested, or carrying the United States mails or other Government property, the right to appear by petition properly verified before the tribunals of the United States, in

order to show that the movement of such traffic has been interfered with by unlawful combinations, by threats or by violence, and which upon such showing will give these tribunals the right, when necessary, to call upon the United States, in the form now authorized by law, to enforce their process by arresting the rioters and the suppression of all such unlawful combinations. The magnitude of the evil to be met and dealt with can hardly be overstated. The remedy to be provided should be equally prompt and effective. It must be discussed and adopted in the interest of the whole country, and not of any particular class; for the interests of all classes of our citizens are the same in the maintenance of domestic peace and civil order.

But to no one class in the community is an absolute assurance of peace so important as to the men who have no capital but their labor. When the accumulations of labor are put in peril by lawlessness, capital may always protect itself by suspending the enterprises which give labor its value, and insure it its reward. Anarchy not only deprives the laboring man of his present subsistence, but puts in jeopardy all his hopes of improvement for his own future, and the future of his family.

My own railway experience, extending over a period of 30 years, leads me to believe that the managers of American railways in general may fearlessly appeal to their past relations with the faithful among their employes to prove that they, at least, have always endeavored to treat the interests of employers and employed as identical, and have never failed to take into prompt and respectful consideration every grievance which has been fairly and properly presented to them. I am sure that it has been the purpose of the company with which I am connected, to at all times pay its employes the best compensation that the business of the country would warrant; and I have no doubt that this will be the policy of the company for all future time, as it is founded on sound business principles no less than upon the instincts of humanity.

### Minnesota Railroad Projects.

The St. Paul Pioneer Press gives the following list of roads upon which work is now going on, and likely to be completed within the next twelve months:

The Brainerd branch of the St. Paul and Pacific; the Glyndon cut-off; the Minneapolis and St. Louis; the Midland, from Wabasha to Faribault; the Martin County Railroad; from Fairmount to Blue Earth City; from Caledonia to connect with the Dubuque and Minnesota Railroad; the Burlington, Cedar Rapids and Northern; and the Knife Falls Railroad. Fourteen other railroads have been projected, which are either regarded as necessary to the working of other completed lines, or are extensions of roads the owners of which may reasonably be expected not to let their talents lie idle. These roads, making a total of twenty-three in progress and projected, are: the St. Vincent branch; the line from Pembina to Winnepeg; from Melrose to Glyndon; Luverne and Sioux City Falls; Northern Minnesota, or Fergus Falls; St. Paul and Minneapolis air line; Des Moines and Minnesota; St James and Winnebago City; Hastings and Dakota; Minneapolis and Hutchinson; Northern Pacific extension; North Wisconsin; Hudson and River Falls; and Chippewa Falls and Medford.

☞ It is suggested that the Elevated Railway Company extend their system of cabs to Fourteenth street and Sixth avenue to some point about Union square, so that people living east of Fifth avenue may have a chance equally with those living west. There are three large hotels about the square, and others being built, so that it is quite evident that sufficient patronage would be extended to make the venture a permanent success.

### Passenger Agents' Association.

The General Ticket and Passenger Agents' Association, comprising among its members the heads of the passenger departments of all the principal railways in the United States and Canada will hold its next semi annual convention at the Hotel Brunswick, Boston, on the 14th inst., and continue in session during the succeeding four or five days.

This association has for its object the harmonizing of all adverse interests in the passenger transportation departments of our various railways, the organization of combinations of routes and rates of travel for the greater convenience and economy of the traveling public, the establishment of rates between connecting lines and the discussion of all matters relating to passenger transportation generally, and being composed of gentlemen from all sections of the country is entirely national in its character, working unselfishly for the general good.

### Statement of the Public Debt of the United States, September 1, 1877.

DEBT BEARING COIN INTEREST.

| | Amount Outstanding. | Accrued Interest. |
|---|---|---|
| 5 per cent. bonds, 1858 | $260,000 00 | $2,166 67 |

### Chesapeake and Ohio Canal Construction Bonds.

The United States Supreme Court has rendered an opinion in the case of W. W. Corcoran, appellent, vs. the Chesapeake and Ohio Canal Company, an appeal from the Supreme Court of the District of Columbia. The issues in the case have been narrowed down to a single material point, viz: Whether what is known as the coupons of the canal construction bonds are entitled to bear interest—that is interest upon the interest of said bonds. This question has been decided negatively by the Circuit Court of Baltimore city. The Court of Appeals of Maryland has also decided that under a special statute of the State authorizing the pledge of the canal company of its revenues for the payment of said bonds and interest thereon, simple interest only was meant, and that as to the lien on those revenues and tolls, interest on the coupons was not included in the lien. The Supreme Court, thereupon, thinks the decisions of the Maryland courts became the law of the whole case as to the parties thereto, and affirms the decision of the court below.

## The Alden Crusher.

New in Principle, Simple in Construction, Economical in Use of Power, and of Remarkable Efficiency.

ALEX. FROTHINGHAM & CO., BANKERS AND Brokers, No. 19 Wall St., make for customers desirable investments of large or small amounts in stocks of a legitimate character, which frequently pay from five to twenty times the amount invested every thirty days.

Reliable stock privileges negotiated at favorable rates. Stocks bought and carried as long as desired on deposit of three to five per cent. Circulars and weekly reports sent 1y23*

### Sign of Speed.

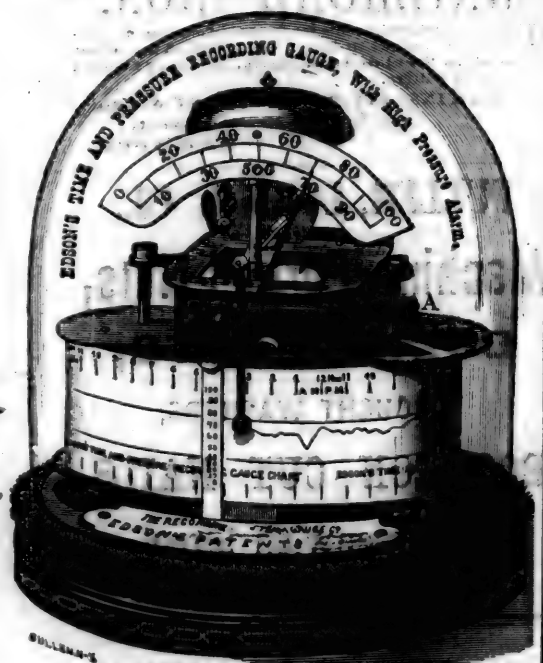
The Pennsylvania Railroad Company has recently introduced on freight trains a new signal. It consists of a flashing light that indicates the speed and distance of a train, and shows whether it is at rest or in motion. This light is of two colors, one of them red and the other white, placed on the caboose, so that they may be seen in both directions on the line. A simple device for hiding the light at intervals is affixed to each lamp, so that it may be made to alternately appear and disappear, and by suitable gearing this is connected with one of the axles of the car. While the car is at rest the lights flash once for each revolution of the wheels, and thus its movement and actual speed can be easily estimated as far as the lights can be seen.

☞ Work on the Pittsburg, Wheeling and Kentucky Railroad was commenced at the Wheeling end on the 25th ult.

NOTICE TO THE HOLDERS OF

**Alabama & Chattanooga Railroad**

**FIRST MORTGAGE BONDS.**



The circular of Messrs. EMILE ERLANGER & CO., of London, containing their proposal to the bondholders, can be obtained, together with forms for subscriptions, by applying to the undersigned.

Bondholders' subscriptions will be received until the 10th of September next at the office of

### The Signs of the Times.

Accounts reach us through the press and personal communications of a general revival in trade and commerce throughout the country. During the past week the business portion of New York City assumed the appearance it did in years previous to the panic. Streets are blockaded by packing cases, and the transportation lines have found it necessary to increase their number of laborers to handle the freight. The manufactories and machine works are receiving more orders, mills are starting up again, ocean steamers depart laden with large cargoes, and the railroads are getting all they can do in the transportation of freight. But the signs of better times are by no means confined to this metropolis. There has been increased activity in almost all departments of trade in Philadelphia, Boston, Baltimore, Louisville, Savannah, Cincinnati, St. Louis, Chicago, and the manufacturing cities of Lowell, Lawrence, Manchester, &c.

In face of all these cheering aspects there are a number of grumblers whose discontent and persistency in always looking at the dark side of things would be scarcely worth the mentioning were it not on account of the bad influence they sometimes have on others. There are three classes of men found in business circles; one who, in spite of all difficulties and drawbacks, speak hopefully and work energetically, relaxing no effort to change affairs for the better, curtailing with one hand and keeping up vigorous policies with the other—such men are the core of business affairs. Another class yield gracefully and easily to the depression of the times, fall back on their capital, and refuse to enter any enterprise or speculation, until others set the example—these do a safe business. Another, and third class are chronic grumblers, with whom the times are always hard, they have neither push nor energy, they want the same prices as heretofore and reduce wages to the "lowest notch," forgetting that the more drawbacks and difficulties there are the greater need there is for energy, boldness, pluck, and industry. The man who rows with the stream has less power to exert than he who has to pull against it. Let these chronic grumblers now cease their utterances of discontent and join in the general good feeling that seems to pervade the whole country. And if some do not see better prospects to get money and business at once, let them not clog the wheels of trade and commerce by putting discontent and dejection and personal ill luck in their path.

### Ohio and Mississippi Railroad Bonds.

Application having been made before Judges Drummond and Gresham, of the United States Court, by the receiver of the Ohio and Mississippi Railroad Co. for permission to pay the coupons of the first mortgage bonds of said company due January 1, 1877, it is ordered by the court that the receiver be and is hereby authorized to pay out of any earnings of said railroad which may come into his hands, or which are not needed for the proper operation of said road, and for the payment of current expenses, the interest coupons due January 1, 1877, of the first mortgage bonds of said railroad, without prejudice to any claim for interest on said coupons which the holders thereof may claim and hold for future consideration of the courts. By virtue of this authority, John King, Jr., Receiver of said road, gives notice to the bondholders that said coupons will be paid in New York the 1st of October next.

### Steam Navigation.

In the convention of the national board of steam navigation at Pittsburg, Pa., on the 6th inst., a report was submitted showing that no progress had been made toward obtaining the legislation required for the relief of the steam navigation interests in the United States, and vigorous efforts to secure amendments to the steamboat laws at the next session of Congress urged. A report was made in favor of removing the rocks and widening the channel of the Ohio river at Louisville. After some discussion a resolution was adopted appointing a committee of five to consider the practicability and probable expense of removing the bars in the Ohio river which interfere with navigation. A similar resolution was adopted as to the improvement of the Mississippi from the Missouri to New Orleans. A resolution was adopted declaring the present charges for licenses to officers of steam vessels unfair and onerous. A committee of three was appointed to investigate the light and signal service as now applied to lake and river navigation, and report such suggestions as will improve the service, the committee consisting of Gen. Negley, Henry M. Hart and R. S. Semple. Cincinnati was selected as the next place of meeting, and the convention adjourned.

### Iowa Central Railroad.

The United States Circuit Court at Des Moines, Iowa, on the 31st ult. confirmed the sale of the Iowa Central road made by the master to the Farmers' Loan and Trust Company for the benefit of the bondholders, and ordered the deed to be made accordingly. Three new companies, formed by different factions of the bondholders, one known as the Cate party, one the Cowdry and one as the Gilfan party, were present, each claiming to be reorganized as the company, to which the trustees should be ordered to convey the property. This matter the court referred, to be determined by the written vote of the bondholders, and appointed a master to take such vote and report.

### Mississippi Central Railroad.

The Mississippi Central Railroad was sold by order of the United States Court, at Jackson, Mississippi, on the 23d ult., and was purchased by the representatives of consolidated mortgage bonds for $425,000, subject to prior mortgages. The road is the upper part of the New Orleans, St. Louis and Chicago Railroad, which was formed in 1874 by the consolidation of the New Orleans, Jackson and Great Northern and the Mississippi Central railroad companies. The New Orleans, Jackson and Great Northern runs from Canton, Mississippi, to New Orleans, and the Mississippi Central runs from Belmont, opposite Cairo, Illinois, to Canton, a distance of 342 miles. The former road was sold some time ago, and was purchased by the same persons. Default was made in 1876 in the payment of the interest on the $4,842,000 bonds of the consolidated company, held by the Illinois Central Railroad, and the roads were placed in the hands of a receiver. The aggregate outstanding bonded indebtedness of the Mississippi Central is as follows:

| | |
|---|---|
| Tennessee state debt, first mortgage, 1851, and second mortgage, 1856... | $4,272,500 |
| Consolidated mortgage (gold), 1872.. | 3,723,500 |
| Income and equipment mortgage, 1874 | 5,000,000 |
| Second mortgage scrip, 1874 ..... ..... | 395,115 |
| Total ..... ..... ..... ..... ..... ..... | $13,391,115 |

### Central Pacific Railroad.

The earnings of this road for the year ending December 31, 1876, were as follows:

| | Coin. | Currency. |
|---|---|---|
| From freight. ..... | $6,603,545 64 | $3,423,872 04 |

| | $7,742,158 43 | $115,058 14 |
| Earnings over operating expenses..... | $2,458,980 00 | $6,678,024 78 |

The following is a recapitulation of the earnings and expenses for the year 1876, together with a comparison of the same with the year 1875:

| | 1875. | 1876. |
|---|---|---|
| **EARNINGS.** | | |
| Gross earnings, coin | $9,063,739 03 | $10,201,133 43 |
| Gross earnings, currency ..... ..... | 6 601,352 90 | 6,798,082 27 |
| Total earnings, coin and currency... | $15,665,081 93 | $16,906,216 80 |
| Tot. earnings, equal to currency .... | $17,021,015 79 | $18,146,944 37 |
| **OPERATING EXPENSES.** | | |
| Operating expenses, coin.... ..... .... | $6,221,554 74 | $7,742,153 43 |
| Operating expenses, currency.... .... | 256,645 10 | 115,058 14 |
| Total expenses, coin and currency:... | $6,487,199 84 | $7,857,211 57 |
| Total expenses, equal to currency.. ..... | $7,417,744 43 | $8,732,074 90 |
| Earnings over operating expenses (all in currency) | $9,603,071 36 | $9,414,869 47 |
| Percentage of operating expenses to gross earnings... | 43.58 | 48.11 |

The percentage of operating expenses to gross earnings as shown above, was 4.53 per cent more than in 1875.

| | |
|---|---|
| The earnings over operating expenses for 1876, were (all in currency) .... .... .... .... .... .... | $9,414,869 47 |
| The year ending Dec. 31, 1875. ..... | 9,603,071 36 |
| Being a decrease of .. .... .... | $188,201 89 |

The amount of capital stock authorized is $100,000,000; of which $62,608,800 is subscribed, and $54,275,500 paid in. Of the amount subscribed, there is held in trust for the company $8,333,300.

The debts of the company are: funded debt $55,457,000, less sinking fund $2,368,309 71—leaving $53,088,690 29; to which add United States subsidy bonds, $27,855,680, and balance of accounts $1,015,068 24—making a total of $81,959 438 53. Of the lands bonds there have been 9,840 sold, leaving 140 unsold. The trustees have redeemed 1,136 for $1,038,015 83 gold coin, leaving 8,704 bonds outstanding July 1, 1877.

The assets of the company, as given in the annexed balance sheet, amount to $147,297,754 38; to which add farming lands, (estimated value), $30,000,000; undivided half of 60 acres of land in Mission Bay, in San Francisco, 500 acres water front at Oakland, and about 140 acres and water front at Sacramento, (estimated value, independent of improvements) $7,750,000—making a total of $185,047,754 38.

The number of engines owned by the company at the close of the year was 228, against 203, at the close of the preceding year, a gain of 25. The number of miles run in 1876, as compared with the preceding year, is as follows:

| | 1875. | 1876. |
|---|---|---|
| Miles run on passenger trains. | 1,385,281 | 1,570,485 |
| Miles run on freight trains... | 3,218,824 | 3,359,107 |
| Miles run on switching trains. | 705,829 | 710,474 |
| Miles run on miscellaneous trains.... .... .... .... .... | 366,596 | 556,238 |
| Totals ..... ..... ..... ..... | 5,676,030 | 6,196,254 |

—being an increase of 520,224 miles. Cost of repairs per mile run, 8.03 cents; wiping, 1.08; enginemen, 7.51; fuel, 17.90; stores, 0.79; watching and despatching, 0.44—total, 35.75 cents. Miles run to ton of coal, 39.40; to cord of wood, 29.83; to pint of oil, 16.17.

At the close of the year, the number and kind of cars were as follows: 115 first-class passenger, and 72 second-class and smoking, 31 sleeping, 22 mail and express, 37 baggage, 1 directors', 1 superintendent's, 1 pay, 2,517 box, 31 fruit, 2 powder, 1,499 platform, 7 tank oil, 65 caboose, 200 section, 220 hand, 110 dump, 1 track laying, 6 derrick, 1 tool, and 9 snow plows.

There were also in service on that portion of the Southern Pacific Railroad south of Goshen, leased, 19 engines, 11 first-class and 3 second-class passenger, 2 baggage, mail and express, 2 baggage, mail and express, 2 baggage and smoking, 208 box, 137 platform, 62 hand, and 25 section cars.

The total number of miles run by cars of all kinds in 1876 was 61,599,570, against 56,568,674 for the previous year—an increase of 5,030,896. Central Pacific cars made on foreign roads in 1876, 7,473,888 miles, and in 1875, 6,886,701. Average cost per mile run of all cars for repairs in 1876, 1.03 cent; in 1875, 1 cent.

The company have 11 steamers employed in the ferry service between San Francisco and Oakland. Also, 15 river steamers and 13 barges. The Superintendent, A. N. Towne, Esq., in his report, from which the above is obtained, says:

To appease public clamor, and to remove all doubt or uncertainty relative to the question of survey and measurement, and that it might hereafter remain beyond cavil, Congress, on the 19th day of July, 1876, by a resolution of the House of Representatives, requested the Hon. Secretary of War to detail a sufficient force from the Engineer Corps of the army, to make a careful and exact survey of the Central Pacific Railroad, it having been alleged that the measurement reported by the company was at least hastily made, if not intentionally incorrect.

But it will be seen by the report of Government engineers in charge, that after a most careful and accurate survey, they certify that the road is 0.951 of a mile *longer* than the distance upon which bonds were issued.

In this connection it is but proper that I should quote from the closing paragraph of the Official Report of W. H. Heuer, Captain of U. S. Engineers in charge, in which he says: "Although not required of me in this report, I feel it but doing the Central Pacific Railroad Company an act of justice to mention the admirable condition in which their road bed was found. It is certainly maintained to that high standard of excellence so important and necessary to a National Road."

Accepting the Government survey of the distance between Sacramento and Oregon, together with a careful measurement of other portions of the road, we had at the commencement of the year, including the ferry between San Francisco and Oakland Wharf and that portion of the Southern Pacific Railroad between Goshen and Caliente (operated under lease), in the aggregate 1308.87 miles. There was laid during the year, 0.71 miles of track—0.70 between East Oakland and Melrose, and 0.01 between Broadway and Mastick. Also additions of leased lines have been made at different times, as follows:

| | |
|---|---|
| **SOUTHERN PACIFIC R. R. Co.** | |

making a total, at the close of the year, of 1660.46 miles operated.

The completion of that portion of the Southern Pacific Railroad (leased to the Central Pacific Railroad Co.,) to the Colorado river, secures to that company the traffic to and from Arizona, which promises to be very large, and as the road shall be extended beyond the river, through this rich mining territory, it will largely develop and secure the trade also of New Mexico and the adjacent country.

The looked for remunerative business over this long line will, we confidently believe, materially increase the earnings for the current year, and more than compensate for the loss of traffic we may expect from the short harvest, consequent upon the drouth more or less affecting the southern portion of the State.

From the report of the General Freight Agent, J. C. Stubbs, we learn that the number of pounds of freight transported during the years ending December 31, 1875 and 1876, was as follows:

| | 1875. | 1876. |
|---|---|---|
| Local freight | 1,499,979,366 | 1,850,622,684 |
| Through freight | 347,587,072 | 376 547,959 |
| Company's freight | 520,695,478 | 658,000 531 |
| Total | 2,368,261,916 | 2,886,171,174 |

Of the local freight, there was forwarded to the general markets, from the agricultural districts, 331,014,564 pounds of grain, as follows:

| | 1875. | 1876. |
|---|---|---|
| First six months | 83,670,206 | 36 372,889 |
| Last six months | 128,447,636 | 284,641,675 |
| Total | 207,117,842 | 331,014,564 |
| From which we earned, in coin | $347,041 42 | $565,113 83 |

Exhibiting for 1876, as compared with 1875, in local freight, an increase of 23.38 per cent. or 350,643,348 pounds, and an increase of 21.68 per cent. tons hauled one mile.

In through freight, there was an increase of 29,960,887 pounds or 8.62 per cent., and of tons hauled one mile, 7.96 per cent. in excess over 1875.

Company's freight hauled, increased over previous year in tons hauled, 26.56 per cent., and in tons hauled one mile, 19.18 per cent.

Exclusive of grain hauled to the general markets the local traffic shows an increase in 1876 of 226,746,596 pounds, or 17.53 per cent. over 1875.

The freight earnings per mile, on a basis of 1,809 miles in operation in 1875, and 1,424 in 1876, were as follows:

| In coin and currency, mixed, as earned | 1875. $6,918 31 | 1876. $7,037 82 |
|---|---|---|
| In coin, at an average rate of exchange | 6,604 29 | 6,793 91 |
| In currency, at an average rate of exchange | 7,592 29 | 7,561 55 |

Average number of tons hauled per mile operated:

| | 1875. | 1876. |
|---|---|---|
| Commercial freight | 705.71 | 781 93 |
| Company's freight | 198.89 | 230.91 |
| Total | 904.60 | 1,012.84 |
| Average length of haul in miles per ton | 267.3 | 251.9 |

As reported by T. H. Goodman, General Passenger and Ticket Agent, the number of passengers carried east was 2,770 074; do. west 8,002,485—total, 5,772,559; of these 98,420 were through, 691,282 local, and 4,982,957 ferry. Average number of miles traveled by each passenger, 29.90. Average charge per passenger per mile, 3.24 cents. In 1875 the total number of passengers carried was 4,762,814; the average number of miles traveled by each passenger 35.35; and the average charge per passenger per mile, 3.27 cents. It will be seen that the increase in the number of passengers in the past over the preceding year was 1,010,845; of which increase 899,546 was in ferry and 110,799 in rail passengers.

During the year 93½ miles of track were re-laid with steel rail, and 369,518 ties used in repairs of track.

The Trustees under Land Grant Mortgage say that since their report of July 1st, 1876, which showed a balance of cash on Land, in coin of $544,346 47, they have received from the Land Department of the Company, $325,299 88, coin, and $160 currency, which currency they have sold for $150 40, coin, and they have redeemed 572 bonds at a cost of $589,430, coin, leaving cash on hand July 2, 1877, $331,066 75, coin.

STATEMENT OF PROFIT AND LOSS FOR YEAR 1876.

| | | |
|---|---|---|
| Interest | | $3,395,468 12 |
| Taxes | | 340,508 72 |
| General and miscellaneous expenses | | 469,327 74 |
| Legal expenses | | 198,758 59 |
| Civil engineering | | 21,867 78 |
| Discount on currency receipts | | 670 528 25 |
| Dividends Nos. 5 and 6 | | 4,342,040 00 |
| Balance | | 10,265,689 27 |
| | | $19,699,088 47 |
| Balance to credit of this account, Jan. 1, 1876 | | $10,305,953 00 |
| Earnings for the year 1876 | $16 994,216 80 | |
| Less operating exp. | 7,857,211 57 | |
| | 9,137,004 78 | |
| Interest on sinking funds | 176,214 85 | |
| Operating river steamers and barges | 79,916 89 | |
| | | $19,699,088 47 |

The currency sold by the company during the year was sold at a discount equal to a premium on gold, of 11.80 per cent.

The earnings of this road monthly, for a series of years, will be found on page 1163 of this week's issue. Also a full description of the company's bonds—amount outstanding, rate of interest, when and where payable, and the date of maturity of the principal—will be found on page 1166.

GENERAL LEDGER BALANCE SHEET, Dec. 31, 1876.

President.—LELAND STANFORD.

Vice Pres't & Gen'l Agent.—C. P. HUNTINGTON.

Directors.—Leland Stanford, Mark Hopkins, E. H. Miller, jr., Robert Robinson, Chas. Crocker, David D. Colton, of San Francisco, Cal., C. P. Huntington, of New York City.

Treasurer.—MARK HOPKINS, San Francisco.

Secretary.—E. H. MILLER, jr., San Francisco.

Gen'l Sup't.—A. N. TOWNE, San Francisco.

Assistant Gen'l Sup't.—JOHN CORNING, San F.

Division Superintendents.—E. C. Fellows, Oakland, Cal.; J. A. Fillmore, Sacramento, Cal.; Frank Free, Wadsworth; G. W. Coddington, Carlin, Nev.; R. H. Pratt, Ogden, Utah; of River Steamers, W. H. Moor, San Francisco, Cal.

Chief Engineer.—S. S. MONTAGUE.

Master of Machinery.—A. J. STEVENS, Sacramento.

Purchasing Agent.—J. R. WATSON, Sacramento.

### Erie Railway Management.

Mr. James McHenry, of London, has issued a sixteen page pamphlet addressed to the bond and shareholders of the Erie Railway Company, in which he reviews the history of the company since the election of Mr. Jewett as president in 1874, and especially criticises a letter written by Mr. Jewett to Sir Edward Watkin, under date of June 1, 1877, and subsequently circulated in pamphlet form in England. Mr. McHenry says: "Two years have elapsed since Sir E. Watkin and Mr. Morris associated themselves with Mr. Jewett and assumed the responsibilities of his management," and "during these two years the floating debt has increased. No portion of the European debt has been paid out of the earnings. Mr. Jewett has claimed and been allowed $40,000 a year as receiver, in addition to his large drafts for salary as president. The monthly statements of revenue are false, the periodical reports are myths, and corrupt contracts, depleting the proper income of the bond and shareholders, have increased in a manner unparalleled in the previous history of Erie." Appended to the letter of Mr. McHenry is a statement of Erie expenditures in 1876 compared with those of the New York Central, from which it appears that the operating expenses of the former exceeded those of the Central by $2,410,761. Comparison is also made with the Baltimore and Ohio Company, showing an excess of expenditures by the Erie in certain items of $3,891,965.

☞ The directors of the Harrisburg, Lancaster, Mount Joy and Portsmouth Railroad Company, elected on the 7th inst are: Thomas A. Scott, George H. Roberts, Jas. Magee, Wistar Morris, John H. Kennedy, Josiah Bacon, N. Parker Shortridge, Jas. Young (Middletown), and Lewis Elkin.

### The Babcock and Wilcox Sectional Boiler.

The risk of life and property involved in the use of the steam boiler is still, as it has always been, a source of constant anxiety to the engineer and to the public. Explosions continually take place under circumstances of the utmost apparent security. Occurring without warning, and occupying but an instant of time, it is generally difficult, if not impossible, except in rare instances, to ascertain with certainty their true cause. There is seldom a unanimous opinion on the part of experts who examine into the causes after the event. Explosion can occur from two causes only—first, from deficiency of strength in the shell or other parts of a boiler. This deficiency of strength may be an original defect arising in the material or workmanship at the time of construction; or it may be due to deterioration from use, or from unequal expansion in the different parts, from ordinary wear, or from injuries occurring from mismanagement, want of attention and repairs, etc. Manufacturers and engineers are supposed to comprehend these causes of danger, and ought to be able to avoid them.

The other source of danger arises from an accumulation of pressure within the boiler, to a dangerous degree above that which the structure is designed to resist. This accumulation of pressure may be gradual, and due simply to the increase of pressure which attends a continued evaporation when there is not sufficient outlet for the steam constantly formed. Without enlarging on but bearing in mind these well known facts, about which and other subjects relative to them there has been so much discussion, investigation and experiment the inquiry naturally and frequently made by steam users as to the best form of boiler at present constructed may be partially considered here in an examination, description and illustration of undoubtedly one of the best known, and most extensively used boilers belonging to that class known as sectional steam boilers.

The designers and constructors of the boiler represented here are experienced engineers whose engineering skill in the building of steam yachts, vertical and horizontal steam engines, boilers of the sectional and other type is so widely and favorably known. Their aim has evidently been to meet the requirements of steam users in constructing a sectional boiler the features of which are primarily safety, durability, economy and simplicity. In this they have unmistakably succeeded, the best evidence being in the great number of Babcock & Wilcox boilers now in successful operation and the economy effected for manufacturing capitalists and corporations by a small consumption of fuel.

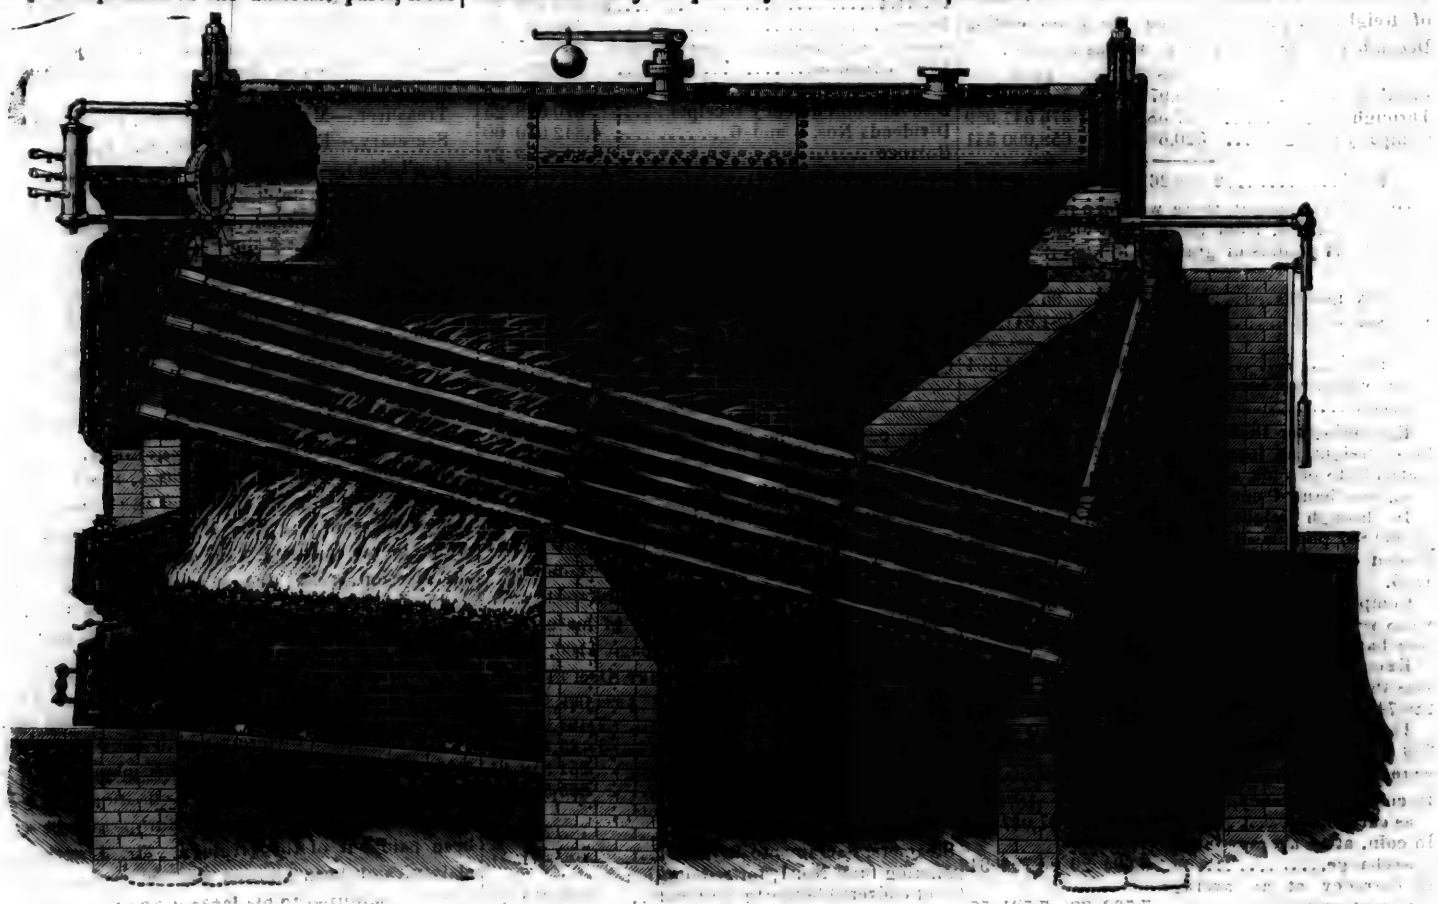

Fig. 1.

Reference being made to the engravings, Fig. 1 represents a partial longitudinal section, Figs. 2 and 3 an end view and partial transverse section.

The Boiler is extremely simple, and consists merely of a group of tubes set at a considerable inclination, connected at each end by a kind of manifold chamber, and these in turn connecting by vertical tubes to the corresponding end of one or more cylindrical drums, placed horizontally above them. The drums are of such moderate diameter as not to detract from the sectional character of the boiler, but have very considerable steam space and water surface, from the fact that they extend the entire length of the boiler. The lower half of these drums are inclosed in the brickwork and constitute a part of the heating surface; but they are so far removed from the direct influence of the fire, and the gases are so largely deprived of their heat in their passage through (between) the tubes—which latter, of course, constitute the principal heating surface—that they are subjected to only moderate extremes of temperature, and as they are constructed under an abundant factor of safety, are practically as secure against rupture as the smaller tubes upon which the flame directly impinges. The water level is carried about at the center of the height of the drums, giving not only an abundant surface for the disengagement of steam, but ample steam room as well; both of which latter considerations are those in which the sectional type of boiler falls generally short of filling the bill. Aside from the opportunity given, the water mechanically thrown into the steam drums with the steam formed in the tubes to subside to the general level maintained, foaming, as ordinarily produced in boilers having insufficient steam room, by sudden or large draughts made upon the steam within it—that is to say, within the drum itself in this case—is prevented by the abundant space above the water; while the considerable body of water and large disengaging surface renders the maintenance of the water level an easy thing to do; and this is the most uncertain of all things in some sectional boilers. The inclined tubes being always filled with water, and being set in staggered rows such as to deflect the hot gases upon almost their entire circumference in passing between them, they constitute the most effective heating surface possible. The gases are made by means of transverse walls and diaphragm plates, as shown in Fig. 1, to traverse the nest of tubes three distinct times on their passage to the chimney; and are not only thus deprived of all the heat which it would be profitable to take from them when using the natural draught,

but they are forced to make their first excursion at the higher end of the tubes, and their last at the lower end; and this, as we shall see further on, subserves an admirable purpose in the general arrangement.

The general form of the structure constituting the boiler, as will be seen in Fig. 1, is a right angled triangle, having for the two sides, including the right angle, the inclined nest of tubes and the back connecting tubes, and for its hypothenuse the steam drums. There are no natural forces known to us, which are more powerful than the expansion and contraction of metals through variations in temperature; in fact, they are irresistible by the expanding materials themselves, which are among the strongest of substances we have to deal with. Now, in structures of this kind having separate members in the same line of strain, and subjected to considerable variation of temperature, as will occur with a boiler between the periods of use under steaming conditions and when cold, and having a part of these members receive higher temperatures than the others, as where part have water in them and others only steam, the strains brought within the structure itself cannot be other than destructive; and we see that the keeping tight of the various kinds of joints connecting such members has been a fruitful source of trouble in the sectional boiler. With this boiler, it will be seen that, as the tube nest is always filled with water, and the gases pass across them three times, every tube will be expanded or contracted practically alike, one end of all the tubes being made hotter than the other, but all heated or cooled alike; so that, so far as the groups of tubes among themselves is concerned, there are no destructive strains brought upon them from this cause. But between the ranges of temperature which the boiler must undergo from time to time, the tube nest will necessarily suffer the greater expansion and contraction, being subjected to the hottest part of the fire; and with the triangular form of the whole, as shown, either one or two sides of the triangle may suffer the small change of dimension due to the change of temperature, without anything more than a proportionately small transverse strain upon the other side or sides, which, in such a case, would be far within their elastic limit, and consequently productive of no ill results.

Another important feature in this boiler is the perfect manner in which the principle of convection together with the formation and escape of the steam itself is availed of to give a rapid circulation to the water. The tubes being placed at so considerable an inclination and being below the cooler steam drum, the natural convection currents of the water would be such as to cause it to pass continuously from the back end of the drum to the lower end of the tubes, and from the upper ends of the tubes to the steam drum; but the rapid formation and escape of steam from the upper ends of the tubes will, of course, carry, mechanically, considerable quantities of water with it, increasing the rapidity of the circulation largely; and

Fig. 2.

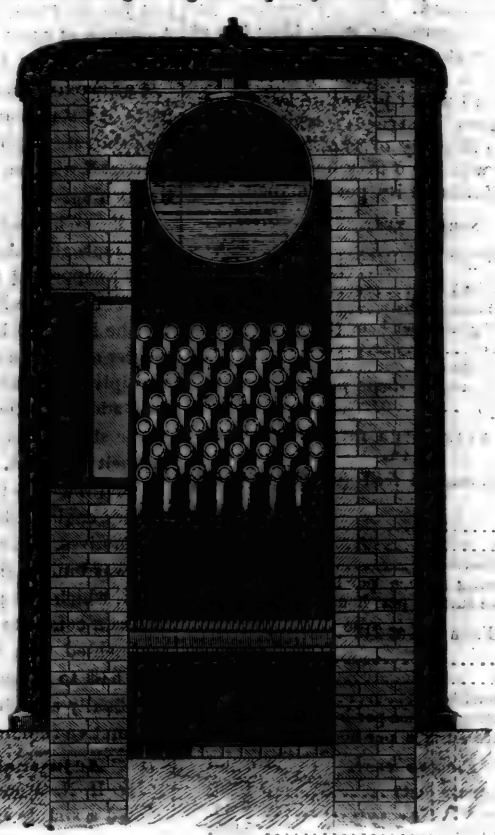

Fig. 3.

just here is where the drum subserves its best purpose. Rapid circulation of itself will tend to mix the steam and water, and in all boilers which have rapid circulation with a limited steam room and small disengaging surface, the more rapid the circulation the wetter will be the steam furnished by it. But rapid circulation is indispensible to prevent deposition of saline and sedimentary matters upon the water surfaces, and for an effective transfer of heat to the water, and in order to have it and dry steam from the same boiler, a proper and ample space must be provided for the subsidence of the agitation, and sufficient water surface to permit of the quiet disengagement of the steam from it. The drum in this boiler forms just such a place, and is more effectual from the fact that the ebullitent mixture of steam and water is projected into its front end from the tubes, and the quiescent steam with the water all drained out of it is delivered to the engine from the other.

That such is naturally the operation of this arrangement, is proved by the tests lately had at the recent Centennial Exhibition. The results of them show that, notwithstanding there is not an inch of superheating surface in this boiler, it delivered practically dry saturated steam, containing the heat units due the temperature and pressure.

Connected to the lower ends of the tubes, running transversely of the nest, and placed a little out of the current of circulation in a small drum, seen in Fig. 1, for the collection of sediment from such water as may contain it, and occupying, as it does, the only place in the boiler at which the water can come to rest, if there is a deposit of mud or sediment anywhere within it, it must be at this point. Detachable bonnets are placed upon its ends, the removal of which permits of the extraction of the mud from time to time, as may be required. The steam drums are also provided with manholes and plates, through which their interior may be examined.

The tubes are lap welded and are expanded into the connecting chambers, which latter are steel castings; and ample provision is made for access to the interior of the tubes through openings in the steel chambers opposite their ends, which are closed by means of caps, accurately fitted, metal to metal, and these, having no organic or perishable material interposed for the purpose of making a joint, should be tight and give no trouble.

The removal of dust, soot, and ashes from the fire surfaces is provided for by openings in the side walls, through which this operation may be performed.

A very excellent feature in the setting of

this boiler is that the entire metallic combination is suspended from transverse girders which are supported by cast iron columns, as shown in dotted lines in Fig. 1, which precludes the straining and cracking of the walls from the expansion and contraction of the metallic members. This is no small consideration, as fissures in the brick setting of boilers often causes serious loss of fuel by the leaking in of cold air at improper places.

The prevention of cold air leaks seems to have been well looked to, also, in the design of the iron front, a place where it is often neglected.

This part of the structure is, too, of a very tasteful and ornamental design; and, as a whole, it bears evidence of careful thought and a well considered application of correct principles. Below will be found the data and the results of the tests had at the Exhibition computed from the logs taken at the time; and they show that its efficiency and capacity are fully up to the mark. Prof. Thurston has said: "A boiler evaporating more than ten or eleven pounds of water per pound of coal" (in which he doubtless means from and at 212°) "including even all water joined, is to be looked upon with great distrust;" which, if correct, places the efficiency of this boiler at the highest place at which we may be satisfied of a correct interpretation of its performance.

NORMAL TEST.

| | |
|---|---|
| Heating surface (square foot) | 1680. |
| Grate " " " | 45. |
| Total coal burned (lbs.) | 3555.55 |
| Total combustible burned (lbs.) | 3164.55 |
| Coal per sq. foot of grate, per hour (lbs.) | 9.876 |
| Total water fed (lbs.) | 32442. |
| Per cent of water primed | 2.289 |
| HP (30lbs. of dry saturated steam per hour, from and at 212°) | 155.71 |

POUNDS OF WATER EVAPORATED INTO DRY SATURATED STEAM.

From the temperature of feed (63°.98) at 70 lbs. pressure.

| | |
|---|---|
| Total | 31699.2 |
| Per pound of coal | 8.915 |
| Per pound of combustible | 10.017 |
| Per sq. foot of heating surface per hour | 2.35 |
| Per sq. foot of grate surface per hour | 80.05 |

From and at 212°.

| | |
|---|---|
| Total | 37370. |
| Per pound of coal | 10.510 |
| Per pound of combustible | 11.809 |
| Per sq. foot of heating surface per hour | 2.78 |
| Per sq. foot of grate surface per hour | 103.80 |

FORCING TEST.

| | |
|---|---|
| Heating surface (square feet) | 1680. |
| Grate surface (square feet) | 45. |
| Total coal burned (lbs) | 5405. |
| Total combustible burned (lbs.) | 4981. |
| Coal per sq. foot of grate per hour | 15.013 |
| Total water fed | 43535.75 |
| Per cent. of water primed | 0.213 |
| HP (30 lbs. of dry saturated steam per hour, from and at 212°) | 214.55 |

POUNDS OF WATER EVAPORATED INTO DRY SATURATED STEAM.

From the temperature of feed (57°.79) at 70 lbs. pressure.

| | |
|---|---|
| Total | 43442.8 |
| Per pound of coal | 8.037 |
| Per pound of combustible | 8.722 |
| Per sq. foot of heating surface per hour | 3.232 |
| Per sq. foot of grate surface per hour | 120.67 |

From and at 212°.

| | |
|---|---|
| Total | 51492.8 |
| Per pound of coal | 9.527 |
| Per pound of combustible | 10.337 |
| Per sq. foot of heating surface per hour | 3.831 |
| Per sq. foot of grate surface per hour | 143.04 |

The Centennial Exposition Medal was awarded this boiler for highest economy and efficiency on test. The warerooms and office of Babcock & Wilcox are at No. 30 Cortlandt Street, New York.

### Queries and Replies.

Inquiries to be answered must be appropriate to the columns of the JOURNAL.

TELEGRAPH OPERATOR.—When was telegraphic communication first established between England and France? Ans. Sept. 27, 1851.

CIVIL ENGINEER.—Can you inform me what the weight of the first rails was on the Liverpool and Manchester railway? Ans. 35lbs to the yard. The steel rails on the Hudson River Railroad weigh from 56 to 60 lbs. per yard.

W. T. HOLLAND.—Please inform me what is the velocity of sound in air? Ans. At the temperature of 32° Fah. sound travels at the rate of 1092.54 feet per second.

G. B.—I have a tube the transverse area of which is one square inch; into this I wish to put just 1lb. of water, can you give me a data? Ans. A column of water an inch square and 2¼ feet high is equal to about 1lb. in weight.

AMATEUR.—What is the best shape for steam ports in a stationary engine? Ans. It is better to make the steam ports long and narrow rather than short and wide, so as to get a large area with little opening.

T. P.—What is a good composition for fast running journals? Ans. Tin, 50 parts; antimony, 5 parts; copper, 1½ parts.

J. YOUNG.—I wish to know an easy rule for finding the length of belts. Ans. Add together the diameter of the two pulleys, divide the total by 2, and multiply the quotient by 3½; then to the last product add twice the distance between the centres of the shafts, and the sum will be the length of the belt required.

INQUIRER.—Hot air has been applied to stationary engines, do you know of its application to locomotives. Ans. Several years ago a locomotive was built at the Novelty Iron Works, in New York, which was propelled by steam and hot air. It was a complete failure although built and experimented with at a great expense. The cylinders had to be constantly rebored and the plan was finally abandoned; we are not aware of any locomotive running on this principle at present.

### Adjusting Levels Underground.

Mr. H. N. Ground, an English engineer, has invented a simple and ingenious instrument for ascertaining the difference of levels underground in localities where the ordinary instruments cannot be used conveniently. He takes two standards or uprights, made of any suitable size and material, each of them having a suitable scale conveniently marked thereon, and respectively furnished with an ordinary glass gauge tube or other suitable vessel, either attached to or embedded or inserted therein. These tubes are connected together by means of a flexible tube of appropriate length, attached to their lower ends in any convenient manner, such flexible tube being preferably made of vulcanized India rubber, or of vulcanite, gutta percha, and into such connecting tube, and glass tubes, he introduces such a quantity of water or other fluid as will, when the two standards are placed together, fill the flexible tube, and reach about half the distance up the glass tubes in the standards. He then places each one of such standards directly over or under two given points, which points, for the sake of illustration, he calls A and B, and ascertains the distance which the surface or surfaces of the water or other fluids stands immediately above or below each of these points, by means of the scales marked on each of the standards or uprights, as before described. Thus, for instance, say at point A, this reads 5 feet, and at point B 1 foot, the difference of level between each point would, of course, be 4 feet, the surface or surfaces of the water being of necessity, absolutely level.

### Railroads of Mexico.

The United States Minister to Mexico has transmitted to the Department of State an interesting report upon the railroads of that country, from which it appears that there is but one railroad of any extent in Mexico—that which runs from Vera Cruz to the city of Mexico, with a branch connecting the latter place with Pueblo, 292 miles, and another branch running from near Vera Cruz to Jalapa sixty-one miles. All the other roads in the valley of Mexico aggregate less than fifty miles. The concession for the building of this road was transferred from native hands to an English company in 1857, up to which time the surveys had only been made, by whom it was completed in 1873. The principal office of the company is in London. The road is managed by a board of ten, elected by the shareholders.

The cost of the construction of the road is generalized as follows:

| | |
|---|---|
| General shares | $7,658,450 |
| Government shares | 3,638,100 |
| Privileged shares first issued, eight per cent | 12,770,500 |
| Second issue, six per cent | 5,059,800 |
| Bonded indebtedness, "A" bonds, eight per cent | 2,200,000 |
| "B" bonds, seven per cent | 5,380,885 |
| Special indebtedness | 1,000,000 |
| Total | $37,702,785 |

The total earnings of the road during the year 1876 exceeded $2,000,000, while the working expenses for the same period were only a fraction over $1,800,000. The number of passengers carried over the road for the year specified was 238,932 the fares amounting to $354,559. The freight amounted to 123,517 tons. Passenger rates from Vera Cruz to the city of Mexico, 268 miles, first class $16, second class $12 50, third class $7 25. Freight rates per ton over the same route:—Foreign goods, first class, $76 05; native goods, $38 02; foreign goods, second class, $65 18, native goods, second class, $32 59; foreign goods, third class, $54 82, native goods, third class, $27 16.

Fifteen per cent of the customs dues was set apart yearly to pay the subsidy due the company on the completion of the road but the government, in lieu of this, has agreed to pay $560,000 yearly for twenty-five years. In consequence of the steep grades on this road heavy English engines have heretofore been used thereon, but at present the American Baldwin engines are being successfully introduced and American cars are also superseding the English make.

The want of railroads is acutely felt throughout Mexico and the subject of concessions for their construction will, it is supposed, be a leading topic at the next session of Congress. The capital for their construction must come from abroad to a large extent.

# RAILROAD EARNINGS—MONTHLY.
